

## **ALL FRP F1600, F2000 & Atlantic Competitors**

### **2026 Season**

#### **FORMULA RACE PROMOTIONS TECHNICAL BULLETIN 26-02**

##### **Flagtronics in-car flag display**

##### **No Requirement - Suggested only until further Notice**

Until further notice, it is only suggested that all cars participating in F1600, F2000 and Formula Atlantic races become equipped with a functioning Flagtronics in car display.

Due to delivery issues with equipment, and some observed operational issues at events, Flagtronic systems will remain suggested but not required.

The requirement for in car Flagtronics is being adopted by many race series including the SCCA. Flagtronics improves situational awareness for both the officials and drivers and its use has proven effective in improving safety.
