

ALL FRP F1600, F2000 & Atlantic Competitors 2026 Season

FORMULA RACE PROMOTIONS TECHNICAL BULLETIN 26-04

UPDATE - Flagtronics in-car flag display - **SEE BELOW**

(No Requirement - Suggested only until further Notice)

<https://flagtronics.com>

Teams / Drivers –

Flagtronics has released a new firmware update for all Flagtronics in-car devices. This update is **required** for the 2026 season.

What's new:

- The firmware is now series-agnostic — the same firmware can be used across all sanctioning bodies.
- No series-specific firmware changes are required when moving from one organization to another.

What you need to do:

- Update your device using the Flagtronics Device Manager software on a Windows-based laptop.
- The update is performed via the USB connector at the end of the device harness.
- Full instructions and the Device Manager software are available on our Downloads page: <https://flagtronics.com/downloads>
- For a detailed walkthrough, see our FT200/FT-RD Firmware Update Guide: https://scribehow.com/viewer/Updating_FT200FT-RD_Firmware_with_Flagtronics_Device_Manager_Software_gvY21QZvS2ayuCgfedIPzQ

We recommend completing this update before your first on-track event of the 2026 season to ensure proper operation.

If you have any questions or run into issues during the update process, feel free to reach out.

Thanks,
R. Collie King III
CEO
Flagtronics, Inc.
