RedEye AB is assigned as Certified Adviser.

About NextCell Pharma AB

NextCell Pharma is a clinical-stage cell therapy company developing ProTrans, a patent-protected platform based on allogeneic mesenchymal stromal cells (MSCs) from umbilical cord. Using a proprietary selection algorithm, ProTrans delivers optimised cell tailored to specific indications. In type 1 diabetes, a single infusion has been shown to preserve insulin production and delay disease progression for at least five years. A Phase III trial is planned to commence upon securing a commercial partner. ProTrans is also being evaluated for other autoimmune and inflammatory conditions. NextCell's subsidiaries include Cellaviva, Scandinavia's largest private stem cell bank, and QVance, the Nordic region's first dedicated provider of quality services for developers of advanced therapies.
