NOTE: To ensure fresh water supply, BF16S Stainless Steel Bottle Filler is provided with an Auto-Purge Sensor feature. Auto-Purge function is Factory pre-programmed to activate Bottle Filler for 10 second duration, 24 hours after the last activation of the unit. Purge cycle adjustments are possible with the optional **-AP Auto-Purge Function Controller** offered with the fixture or after the unit has been received using P.N. 2563-398-000. https://www.murdockmfg.com/option-ap-auto-purge-bottle-filler

### **NOTES TO INSTALLER:**

**IMPORTANT** 

- 1. Please leave this documentation with the owner of the fixture when finished.
- 2. Please read this entire booklet before beginning the installation.
- 3. Check your installation for compliance with plumbing, electrical and other applicable codes.

### **PRIOR TO INSTALLATION**

Important: Some options may slightly alter installation. To ensure proper installation, review the manual thoroughly and verify rough-ins before beginning any work. File this Manual with the owner or maintenance personnel upon completion of installation.

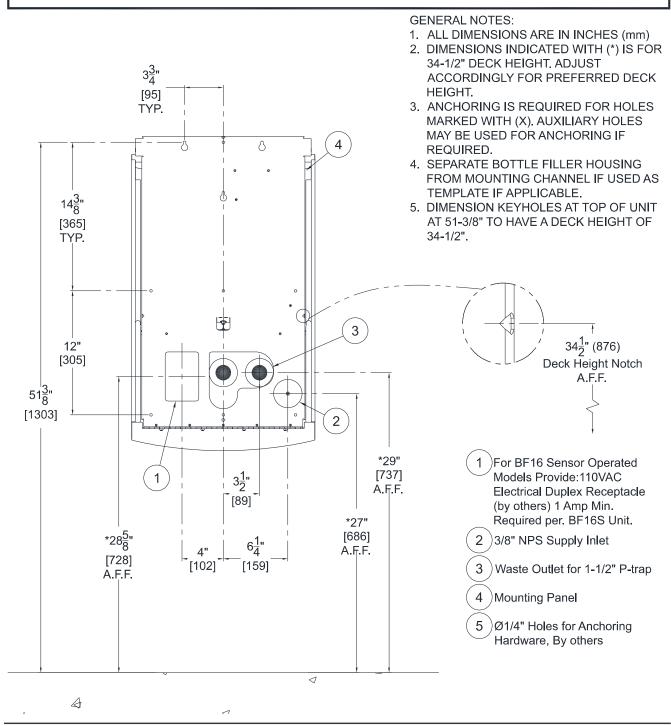

- Fixture mounting requirements: Industry standard wall construction, adequate to support the fixture and (installer provided) wall anchors sufficient to secure the fixture.
- Fixture operates within water pressure range of 20 to 105 PSIG. Murdock will not warranty fixtures damaged when connected to supply lines with flow pressure lower than 20 PSIG or higher than 105 PSIG.
- Per UPC 609.10- All building water supply systems in which quick acting valves are installed shall be provided with devices to
  absorb the hammer caused by high pressure resulting from the quick closing of the valve. These pressure-absorbing devices
  shall be approved mechanical devices. Water pressure-absorbing devices will be installed as close as possible to the quick
  closing valve.
- Water supply inlet is 3/8" O.D. Copper Tube.
- Completely flush supply of all foreign debris before connecting to fixture. Bottle Filler is designed to provide trouble- free drinking water unaffected by fixture connection tubing and fittings and not cause problems with taste, odor, color or sediment.
- Electrical Receptacle(s) must be wired to a GFCI protected circuit. Fixture must be earth grounded per N.E.C. (National Electrical Code).

## **INSTALLATION INSTRUCTIONS ROUGH-IN:**

Provide wall openings as indicated in rough-in detail provided, ensuring to block out the electrical service rough and Waste connection for 1-1/2" Waste Outlet. Use Mounting Channel as template.

## **INSTALLATION INSTRUCTIONS CONTINUED:**

4

With the Mounting Channel secured to finished wall, install 1-1/2" O.D. P-Trap Waste Outlet.

Connect 1/4" O.D. x 1/2" "Y" Strainer assembly to main water supply. Recommend using angle stop for easy maintenance. Angle stop must not extend more than 3-1/2" from finished wall.

### **INSTALLATION INSTRUCTIONS CONTINUED:**

- With fixture tested, hook Wire Strap from Bottle Filler Housing to Mounting Panel and tighten Screw.
  - 1 Bottle Filler Housing
  - (2) Wire Strap
  - (3) Mounting Channel
  - 4 Wire Strap Mounting Screw
- 9 Lift up from Fill Spout area to close the unit by swinging Bottle Filler Housing up and secure with Screws from step 1. Do not force closed. Address any interference if necessary. Do not over-tighten.
  - 1 Bottle Filler Assembly
  - 2) #10-32 x 1/2" Long Philips Head Screw
  - (3) Bottle Filler Housing
  - (4) Mounting Channel

10 To open unit for maintenance purposes, remove Top Screws. Lift Bottle Filler Housing up from Fill Spout area then pull away from wall.

- 1) Bottle Filler Assembly
- (2) #10-32 x 1/2" Long Philips Head Screw
- (3) Bottle Filler Housing
- (4) Mounting Channel

### **OPTIONAL WF3000 INSTALLATION:**

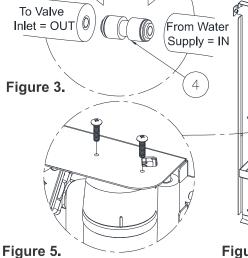

## WF3000 - Important - Before Starting

- Turn water service off before attempting installation.
- Refer to Push-in Fittings installation for information on connecting, disconnecting and testing Push-In Fittings.
- Test fittings and restore water service prior to encasing with insulation tubing.
- NOTE: Fittings and ½" OD Tubing shown for clarity however insulation tubing may conceal fittings.
- NOTE: Mounting the Filter on the right side of the frame, the "OUT" port or outlet side of the filter should always be facing the center of the frame assembly.

### **INSTALLATION INSTRUCTIONS:**

- 1. Access Filter Compartment: Remove screws [1] at the top of the bottle filler to free the face from the Housing Back Plate Assembly and lower to fully open position. Figure 1.
- 2. Prep Water Supply Riser: Remove supply riser tubing [2] from center Fixing loop [3] (Figure 2.) . Disconnect 1/4" O.D. tubing connector [4] as show in Figure 3.
- **3.** Install Filter In-Line: Using Push-in elbows [5] dry fit 1/4" O.D. tubing to Filter Cap [6] to the "IN" port of the Filter (Water Supply Side) and to the "OUT" port to the control valve inlet [7]. If needed, cut 1/4" tubing as required for proper fit. Figure 3 & Figure 4.
- **4. Mount Filter Assembly:** Route Supply Tubing [8] through center Fixing Loop [3]. Mount the Filter [9] to the upper back plate as shown. **Figure 5 & Figure 6.**

**SEPARATE**

### **ELECTRICAL INSTALLATION:**

#### NOTE: PLUG-IN POWER IS A STANDARD FEATURE FOR BF16.

- 1A. Plug-In Operation: Plug transformer provided into GFCI protected electrical service, used by the Bottle Filler.
- 2. Connect the Sensor Wires to either the Solenoid Valve or -BCD Bottle Counter Display (if equipped).

#### **START UP:**

1. Air within the Bottle Filler System or the structure supply piping will cause an irregular Spout outlet stream until purged out by incoming water. Hold cup (or similar object) directly below Filler Spout is recommended when first activating Bottle Filler to prevent excessive splashing. Activate sensor until steady water stream is achieved.

#### **OPERATING INSTRUCTIONS:**

Position container to be filled directly in front of the Sensor and centered under the Filler Spout. Water flow starts automatically. When the container is almost filled, remove container. The water will stop flowing.

#### **BOTTLE COUNTER ADJUSTING & RESETTING INSTRUCTIONS:**

#### **NOTE: Bottle Counter Has Multiple Functions**

Reset/ Mode Button

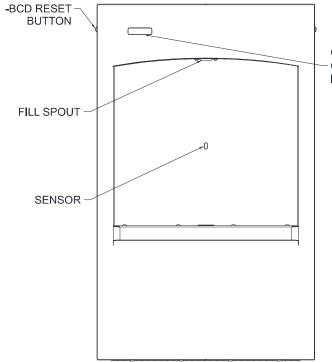

- Counts refilled bottles
- · Adjustable for units with and without Filters
- "RÉPLACEMENT FILTER" alert function
- Alert reset, when Filter is replaced

#### Description

Illuminated LCD Display counts bottles and has a Filter replacement alert function.

#### **Bottle Counting Function**

The software applies a flow volume of approximately 16.9 fl oz (volume in standard size plastic water bottle) to each bottle counted. If the flow volume is less than 16.9 fl oz, there will be no count but the volume will accumulate, so that part way through the next cycle the total bottle count will change.

OPTIONAL -BCD BOTTLE COUNTER DISPLAY w/ ILLUMINATED DISPLAY

NOTE: To ensure fresh water supply, BF16S Stainless Steel Bottle Filler is provided with an Auto-Purge Sensor feature. Auto-Purge function is Factory pre-programmed to activate Bottle Filler for 10 second duration, 24 hours after the last activation of the unit. Purge cycle adjustments are possible with the optional -AP Auto-Purge Function Controller offered with the fixture or after the unit has been received using P.N. 2563-398-000.

### FILTER REPLACEMENT FUNCTIONS:

NOTE: When the volume accumulates to programmed Filter volume, the "REPLACE FILTER" alert will appear on the display every time the Bottle Filler is activated.

#### **Counter Modes:**

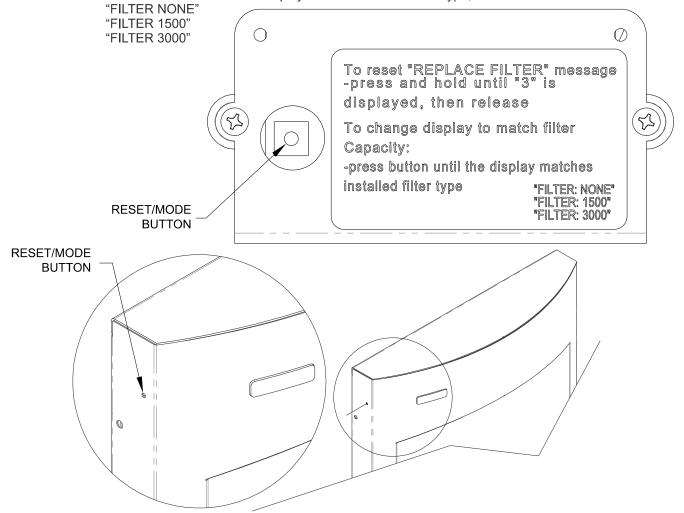

Located on the back of the Display you will find the Reset/Mode Button for the mode settings. The Reset/Mode Selection Button is accessible by removing the Housing, then locate the large hole in the back of the Display Mounting Bracket. Use your finger or nonconductive object to depress the Reset/Mode Selection Button

#### **CAUTION: DO NOT USE SHARP OR METAL OBJECTS!!!**

With this Reset/Mode Button, you are able to indicate whether the unit has a Filter or does not have a Filter. The Reset/Mode Button is used to remove the "**REPLACE FILER**" alert after the Filter has been replaced.

### **Systems With or Without Filter:**

- •To reset "REPLACE FILTER" message:
  - -Press and hold Button until "3" is displayed, then release.
- •To change display to match Filter capacity:
  - -Press and hold Button until the Display matches installed Filter type, then release.

### **PUSH-IN FITTING INSTALLATION**

NOTE: FITTINGS AND TUBE SHOULD BE KEPT CLEAN, BAGGED AND UNDAMAGED PRIOR TO INSTALLATION.

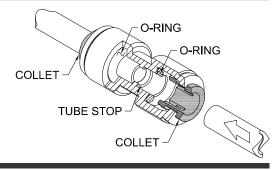

#### TO CUT TUBE:

Cut to fit length of 1/4" PE Tubing and remove any burrs or sharp edges. Ensure that the outside diameter is free from score marks. Tube ends should be square.

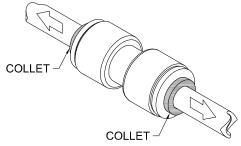

#### **INSERTING THE TUBE:**

 Firmly and fully insert the Tubing end into the Push-In Fitting up to the Tube Stop located approximately 1/2" deep.

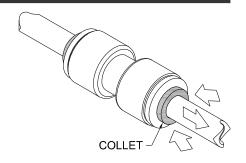

Pull on the fitted Tubing to ensure it is secure. Tube should not come free from the Fitting. Water test the connection assembly prior to leaving the site to ensure there are no leaks.

### **DISCONNECTING THE TUBE:**

Prior to disconnecting the Tube from the Fitting, ensure that the water line is depressurized. Push Collet Square towards the Push-In Fitting Body and hold. While holding the Collet in, pull on the PE Tubing to remove from the Push-In Fitting.
