

# The Secure Digital Signature Platform for the Department of War

Move missions forward with secure search, signatures, and storage—all in one place.

## The National Security Need

When national security is at stake, there’s no time to chase approvals or get bogged down in manual document exchanges. Delays can lead to mission failure and wasted man-hours.

## The Inkit Solution

Inkit is a secure, DoW-compliant platform that streamlines signature workflows, providing warfighters real-time visibility across the approval chain and in-browser CAC/PIV signatures.

## Modernize Your Mission with Inkit

|                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                   |

| <br><b>Authorized for Impact Level 5</b><br>Protect mission-critical data with IL4 & IL5 compliance, using role-based access and multi-factor authentication. | <br><b>In-browser CAC/PIV Signatures</b><br>Sign, track, and manage all your signatures with full visibility from a single real-time dashboard. | <br><b>Predefined Workflows</b><br>Assign roles, set rules, and track every document's journey, so nothing falls through the cracks.         |
| <br><b>Automated File Retention</b><br>Retention schedules are enforced automatically, aligning with DoW 5015.02 to eliminate risk.                           | <br><b>Secure API Connections</b><br>Interoperability with Microsoft, Salesforce, and other federal IT applications via open API.               | <br><b>Audit-ready Tracking</b><br>Every document interaction is logged immutably, giving you full visibility and audit-ready at any moment. |

# How Government Organizations Use Inkit

- + **Military Personnel & HR**  
Securely generate, sign, and store service member records, evaluations, onboarding approvals, and off-boarding documents.
- + **Procurement & Acquisition**  
Automate contract approvals, vendor agreements, and compliance reviews with digital signatures that ensure non-repudiation.
- + **Cyber & Security Ops**  
Protect mission-critical Controlled Unclassified Information (CUI) with custom role-based access controls and real-time audit trails.

## Proven Performance for Government & DoW

- + Trusted by The Pentagon, U.S. Air Force, Space Force, and federal organizations.
- + Authorized for IL4 & IL5, with the ability to process mission-critical CUI.
- + Awarded a SBIR Phase III sole source contract vehicle, reinforcing Inkit's trusted status as a compliant, mission-ready solution.
- + Supporting organizations in the transition to fully digital government.

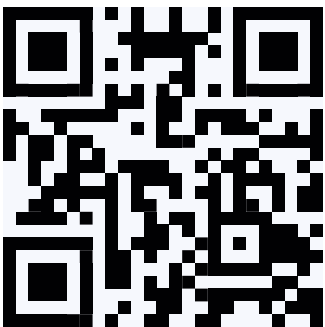

Trusted by Those Who  
Put Privacy First

**U.S. AIR FORCE**

**UNITED STATES  
SPACE FORCE**

**Move Missions Forward.**  
**Search. Sign. Store. All in one place.**
