Welcome to our 2026 Coffee Transparency Report

Publishing this report is a central part of our commitment to transparency with our partners and community.

In this report, you will find the data on the prices paid we paid, the volumes we purchased, and quality scores for all the coffee we sourced last year. We are excited to continue strengthening our longstanding relationships with our producing partners and welcoming new ones as we grow our impact.

We want to extend our gratitude to everyone who touches this coffee, from seed to cup. Thank you for taking the time to review our 2026 Coffee Transparency Report.

Sincerely,
Sam Schroeder and Andy Schroeder
Co-owners

Special Projects & Initiatives

Olympia Coffee continues to be an industry leader in its commitment to transparency, environmental responsibility, and quality of life standards.

Certified B Corporation

B Corporations meet higher standards of social and environmental performance, transparency, and accountability. Olympia Coffee underwent rigorous auditing in 2019 to become a certified B Corp as part of our commitment to lead the industry in transparent coffee sourcing and to have a measurable positive impact for our staff and communities. We're proud to have earned recertification at each renewal opportunity since our initial certification.

Learn more: bcorporation.net

Certified

Living Wage Certified

This past year, we continued to strengthen our company as a place committed to quality of life for all our staff. In 2021 we chose to undergo auditing for Living Wage Certification by Living Wage for Us. As a result, we became certified as a Living Wage Leading Plus Employer for going above and beyond in providing our employees with sustainable wages and benefits. We have recertified each year since.

Specialty Coffee Transaction Guide

Olympia Coffee continues to be a data donor to the annual Specialty Coffee Transaction Guide produced by Emory University. As commodity prices in the coffee industry continue to create a volatile business environment, this data is crucial to helping farmers make informed decisions.

We remain committed transparency and fair compensation for our farmers at origin for the quality coffee they produce.

GUIDE

The Pledge

In 2019, we signed The Pledge along with coffee industry leaders to promote transparency around prices paid to coffee farmers. This growing cohort can collectively raise awareness for coffee consumers regarding how their purchases are being distributed along the coffee supply chain. The Pledge is a promise to drive equity through transparency. It can be signed by any buyer of green coffee, or by anyone wanting to support the project. We'd love to see more green coffee buyers join us in supporting The Pledge.

The
Pledge

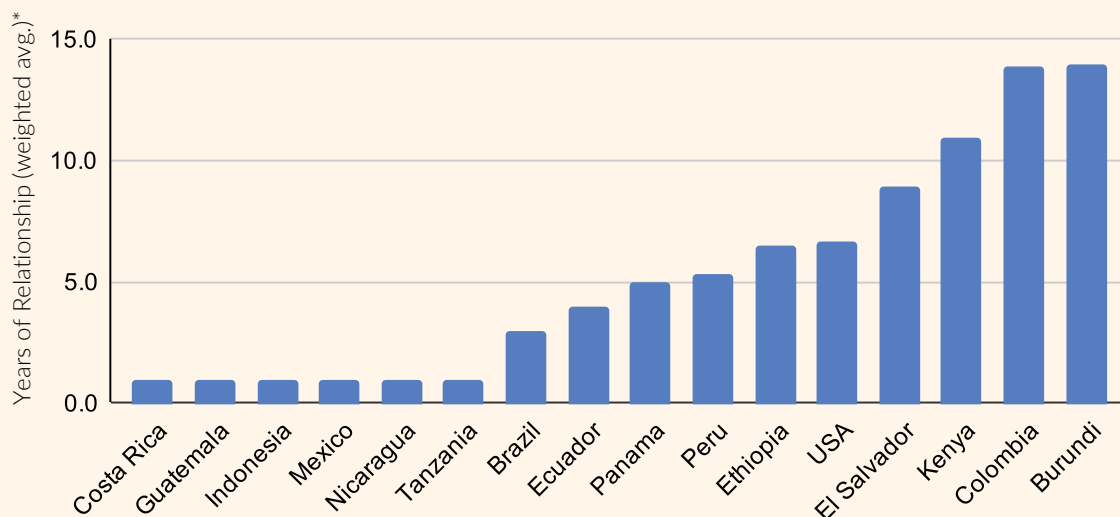

Olympia Coffee Around the World

Countries of Origin by Lbs Purchased and Varietals

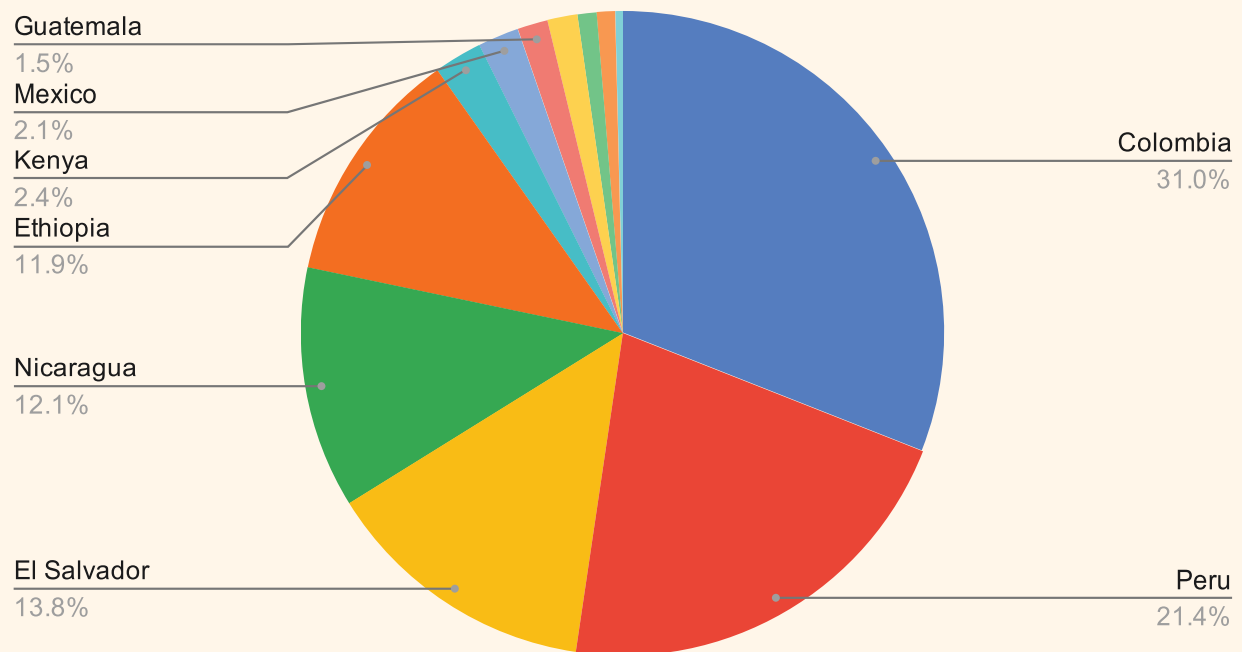

Years of Relationship vs. Country

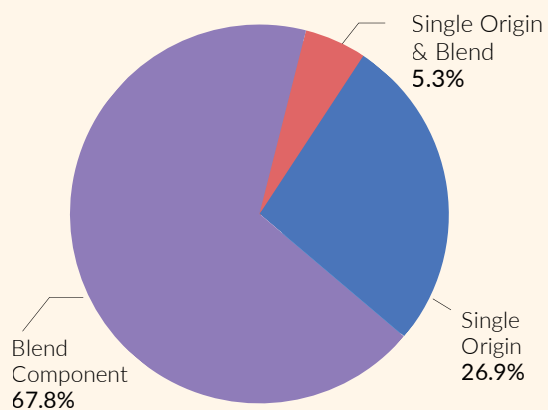

*Weighted average by pounds. We calculate the years of relationship in conjunction with the amount of coffee purchased through that sourcing relationship. What this gives is a more accurate picture of the strength and continuity of the relationships we're cultivating with our producers at origin.

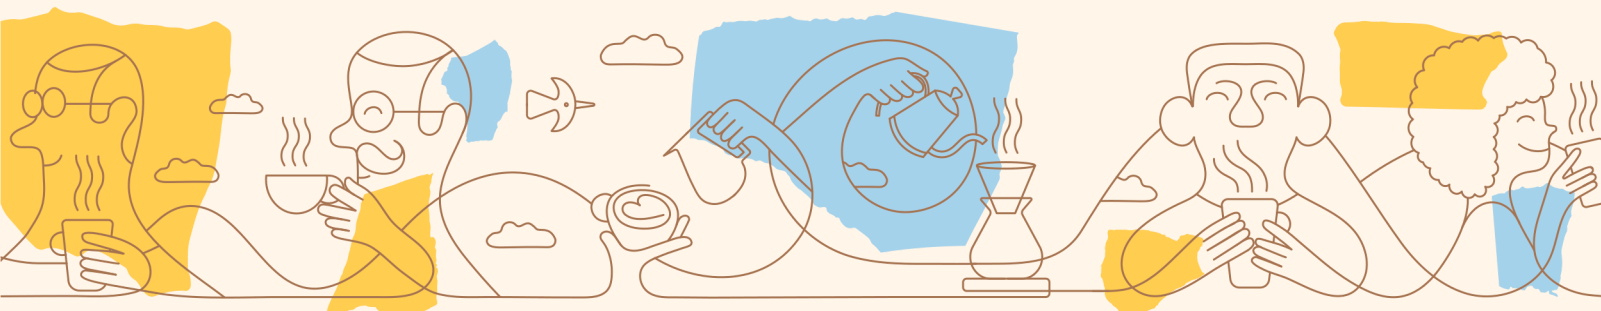

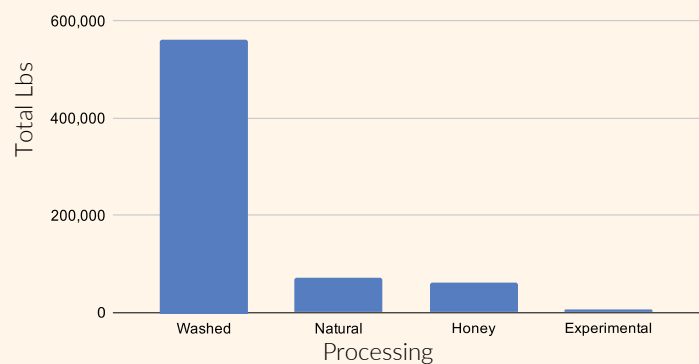

% of Total Lbs Purchased by Country

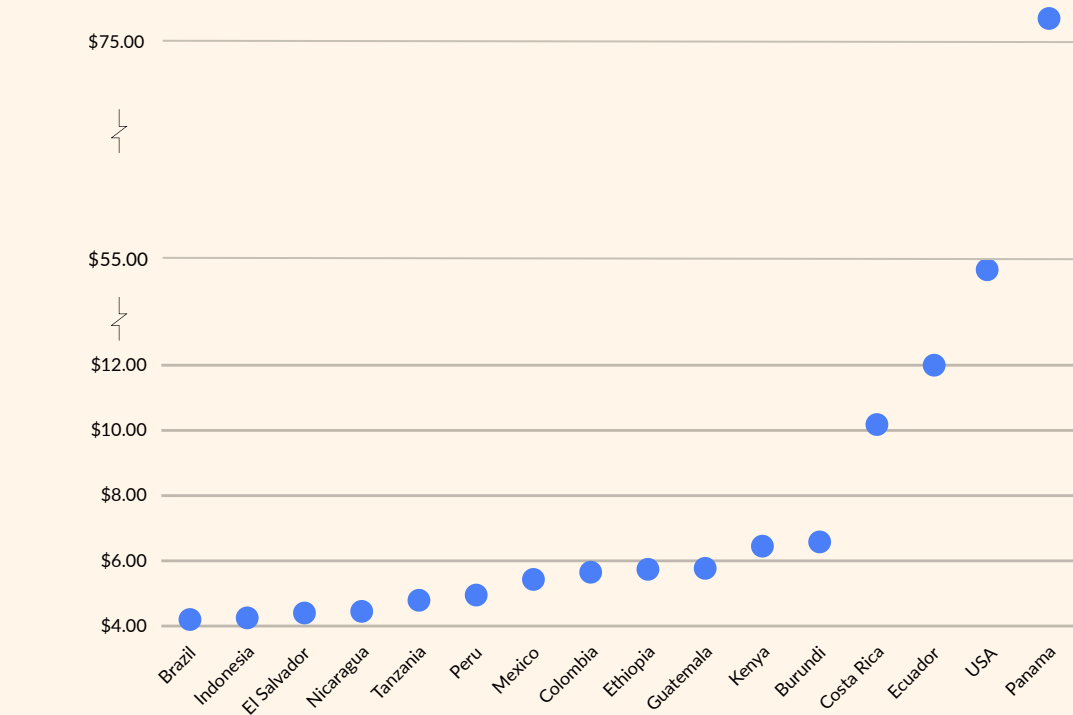

% of Total Lbs by Single Origin or Blend

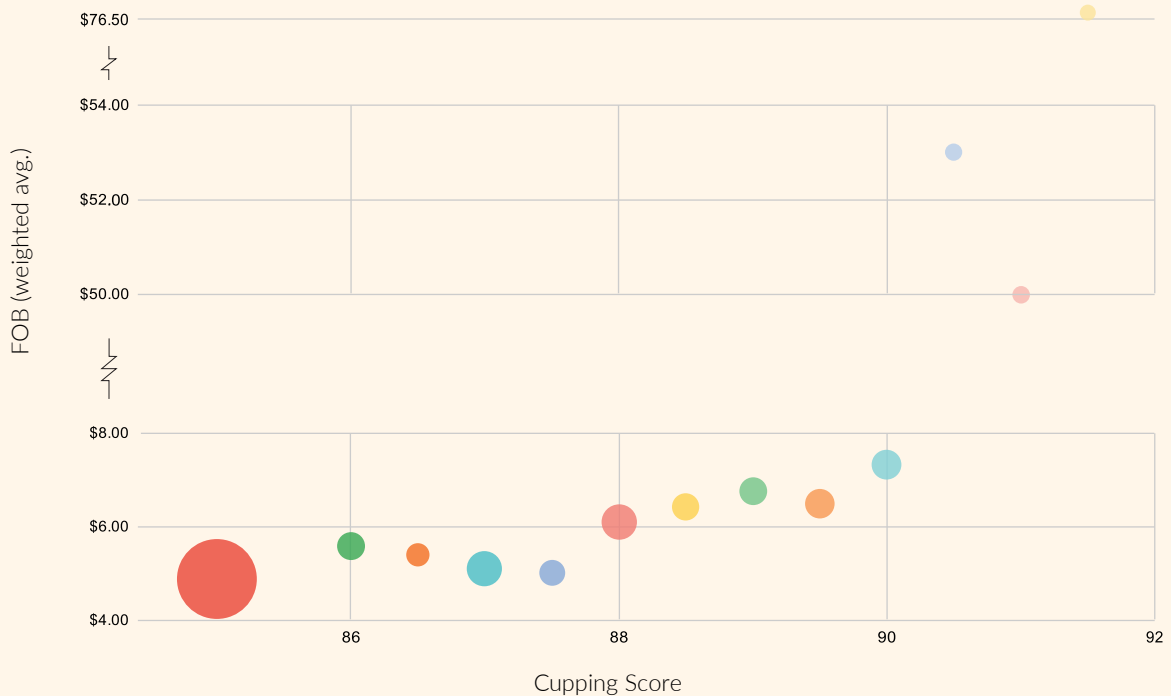

Processing Methods by Lbs

FOB by Country

FOB by Cupping Score (in Lbs Purchased)

Coffees with higher cupping scores tend to fetch better prices.

While most coffees we sourced settled between \$3-\$6 FOB, we made a few strategic investments. This reflects what we value as a company: striving for both quality coffee and quality of life.

In 2025, we were thrilled to source exciting, exceptional coffees from our producers. As a result, they were able to receive compensation commensurate to their effort and skill.
