Meet the AI platform designed for small teams

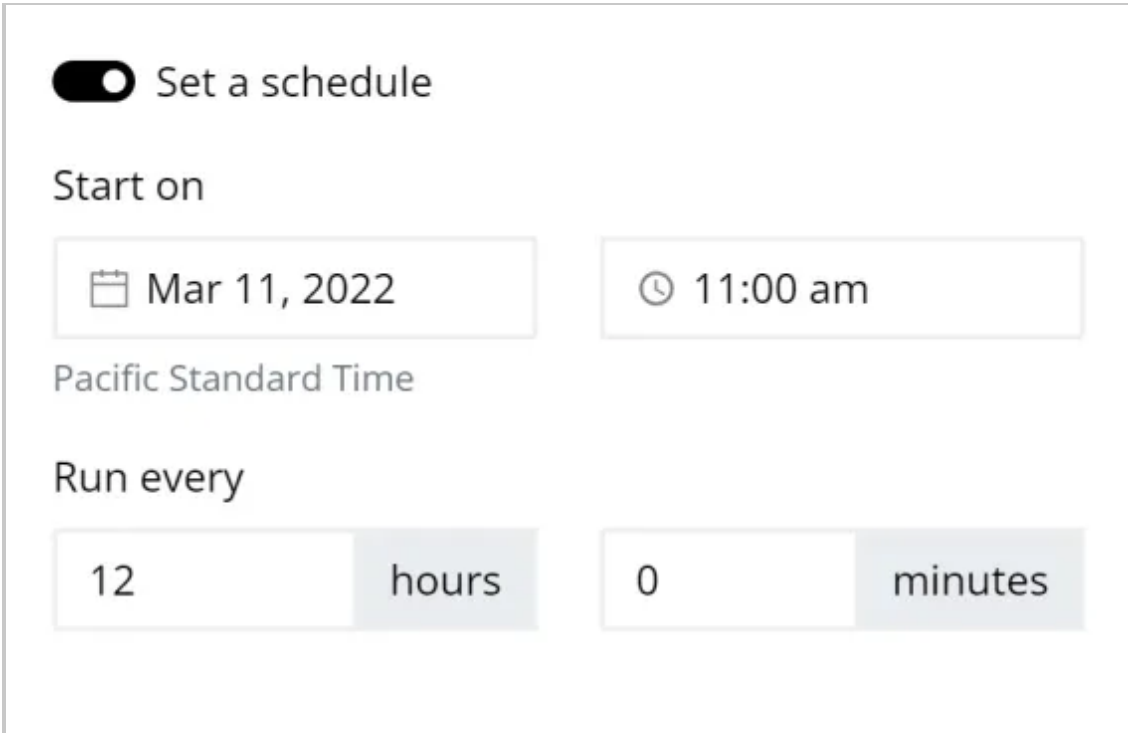

No need for expensive cloud engineering support for every new project. The JetML platform makes it easy to run and schedule Jupyter notebooks, Tensorflow, and other Python and R packages in the cloud. No lengthy set-up required. Allowing you to quickly start new projects and focus on solving them faster.

Automatically run your AI workflows

Create and automate your notebooks to run on schedules.

The image shows a configuration panel for scheduling AI workflows. At the top, there is a toggle switch labeled "Set a schedule" which is turned on. Below this, the "Start on" section includes a date picker set to "Mar 11, 2022" and a time picker set to "11:00 am". The time zone is specified as "Pacific Standard Time". The "Run every" section features two input fields: the first is set to "12" with a dropdown menu showing "hours", and the second is set to "0" with a dropdown menu showing "minutes".

Never be surprised by an unexpected cloud bill

Fixed Price Plans Starting at \$10/mo
< <https://www.jetml.com/pricing/> >

Fixed pricing plans deliver what your team needs at a consistent monthly rate.

Power your projects with adjustable memory, on-demand

- Avoid surprise costs and wasted spend
- Speed up your deep learning projects with GPU-based instances
- Use what you need, and nothing more

DS Team Share

4.9 GB (as of today, 6:50pm)

< <https://i0.wp.com/www.jetml.com/wp-content/uploads/2022/03/Share-workspaces-ds-team.jpg?ssl=1> >

fastai course

200.9 MB (as of today, 6:52pm)

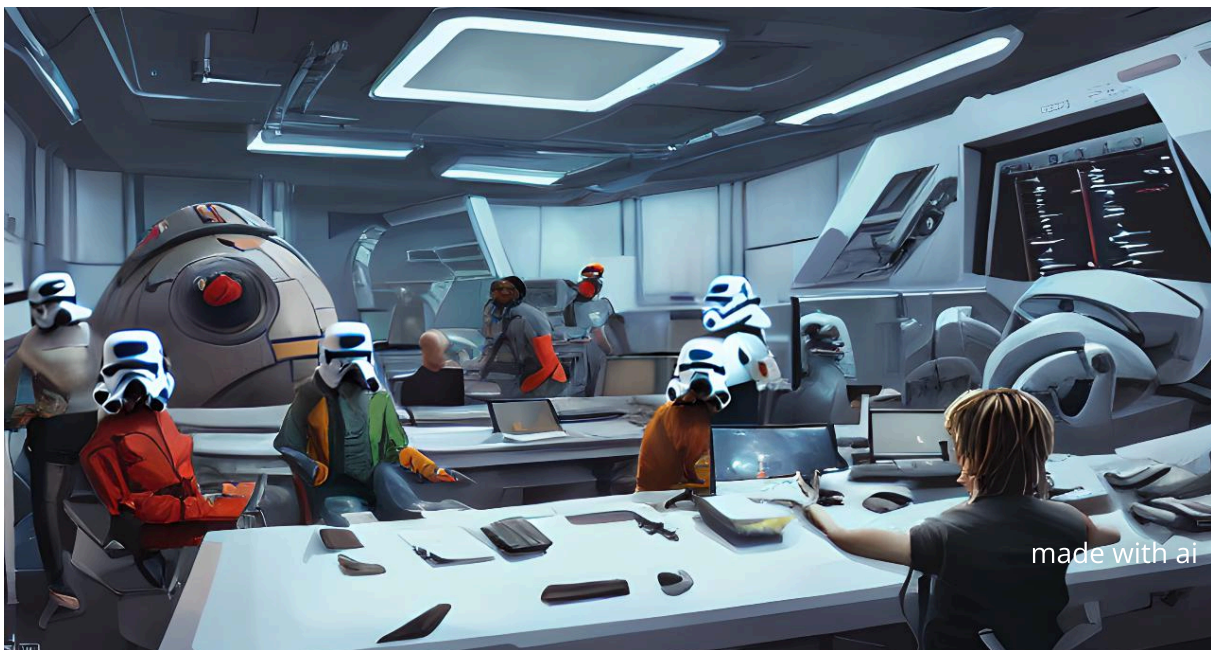

< <https://i0.wp.com/www.jetml.com/wp-content/uploads/2022/03/Share-workspaces-fastai.jpg?ssl=1> >

Expandable storage and easy sharing

- Store what you need for your project to run, from a few megabytes to a few petabytes
- Share notebooks, datasets, and project files with your team
- Keep data secure with encryption enabled by default
