Product characteristics may vary due to the nature of manufacturing. To combat colour variance do not install more than one dye lot in a single colour tile/plank installation. Where different dye lots and products are mixed and matched then size variations could take place and tiles might need to be altered during installation. When installing two or more different colours in tiles/planks/shapes then there is no issue mixing dye lots together. Sample swatches have been cut from an overall design; therefore, the decoration and shades may vary. A difference in appearance from the pattern is likely, as the product is not intended to have a uniform appearance.
