Important Information

In addition to instructions below, also refer to the SABS Installation of Resilient Thermoplastic and similar flexible floor covering materials STANDARD - SANS 10070. All Belgotex Luxury Vinyl Tile products are to be installed by a professional installer, also follow the Belgotex installation guidelines which is available on request from our technical department.

CARING FOR YOUR BELGOTEX LVT

- Use protective walk-off mats in front of doors to remove excess soiling from shoes/feet. If mats are placed directly on top of your Belgotex vinyl floor, be sure the mats have a non-staining back as plasticizer migration will occur (no rubber mats to be used)!
- Use proper floor protectors on furniture legs, etc to prevent damage to your vinyl floor. It is recommended to use protector mats to protect the floor from damage where castor wheels are in use (soft wheels, non-rubber).
- Clean liquid spills immediately to prevent the possibility of stains, slips or falls. Use warm water/neutral cleaner appropriate for vinyl flooring. Also refer to maintenance guideline for Belgotex LVT's from our website or contact our technical department.
- Do not wax or use chemical treatment of any kind on your Belgotex luxury vinyl floor.
- Do not use excessive water to clean as this can start to re-emulsify the water-based adhesive (softening of glue line).
- Belgotex LVT's are scratch resistant but not scratch proof.
- Unclipped pet nails cause scratching.
- Flooring subjected to excessive heat and light exposure, is subject to thermal degradation/fading, and as such must be protected from direct sunlight by installing UV Film to the windows , drawing curtains or closing blinds when direct sun is present.
