BRICK TOILET

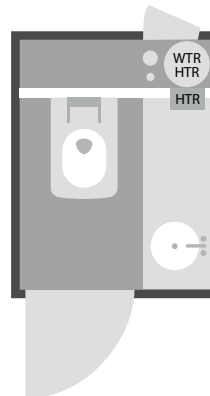

Satellite Industries' Brick Toilet models are revolutionizing portable sanitation with innovative designs tailored to meet diverse industry needs. The Brick Toilet provides the comfort and familiarity of a traditional home restroom and is offered in two models — the Brick Connect and the Brick Traveler. These toilets offer self-contained, independent solutions ideal for remote locations. Both models feature compact, stackable designs for easy transport and storage, along with built-in heating, ventilation, and LED lighting for user comfort. Engineered for reliability and flexibility, these portable sanitation units set a new standard for convenience and performance in construction, events, and beyond.

**Available internationally.*
