

AquaSource Education Nutritional Pack

Nourishing children with the right nutrients can be a daily challenge for parents. Picky eating, allergies, certain gastrointestinal diseases, or even vegan and vegetarian diets can create gaps.

The AquaSource Education Nutritional Pack combines four natural nutrition supplements specifically selected to support the physical and cognitive development of children aged 7 to 18 years. This special combination also provides the nutrition needed to support your child's immune system.

AquaSource Education Nutritional Pack

The pack features four trusted AquaSource supplements designed to empower young minds and bodies.

What's inside:

1 x AquaSource Organic Super Berry Power C

An all-organic blend of acerola berry, freeze-dried maqui berry, acai berry powder and sea buckthorn fruit powder. Rich in natural Vitamin C and antioxidants, it is perfect for active children, supporting recovery, vitality, and everyday immunity.

1 x AquaSource Sea Power Algae (60 caps)

Four organic marine superfoods - brown, red, green, and blue-green algae packed with iodine, calcium, iron, Vitamin B12, and essential fatty acids to support muscles, bones, teeth and cognitive health.

2 x AquaSource Fatty Acid Complex

Polyunsaturated fatty acids are essential for maintaining a healthy heart, joints, skin and more. With over 98% organic ingredients, this organic mixed oil blend contains the optimal ratio of Omega 6 to Omega 3 as specified by research to support heart health. It is also a good source of Omega 9.

1 x AquaSource Organic Vitamin D

Combines organic mushroom-derived Vitamin D2 with organic red algae and organic alfalfa to support strong bones, teeth, muscle function and immunity.

AquaSource Education Nutritional Pack

Key advantages

- ✓ For children aged 7-18 years.
- ✓ Excellent source of calcium and Vitamin D.
- ✓ Optimal vitamins, minerals and other nutrition to support normal bones, circulation and nervous system.
- ✓ Omega fatty acids that support normal heart and brain development, including development of the myelin sheath.
- ✓ DHA-rich oil from a microalgae source supports cognitive development.
- ✓ Rich in antioxidants, especially targeted to support the immune system.
- ✓ Gluten free, GMO free and certified by The Vegan Society®.

Myelin sheath development

Nutrition from fatty acids plays a key role in the development of the myelin sheath in children. Myelin is a fatty substance that wraps around nerve fibres and serves to help increase the speed of electrical communication between neurons.

The myelin sheath develops throughout childhood and is fully developed at around 18 years old. Essential fatty acids help supply the necessary building blocks for myelin production.
