

# FREE RANGE POULTRY CRUMBLE

Nutritionally balanced to give your chicken and poultry the energy, protein, vitamins and minerals they need for a happy life and healthy laying.

Features	Benefits
Nutritionally balanced ration	> Meets the energy, protein, vitamin and mineral requirements for optimal egg production
Additional energy	> Provides birds with the energy they need for maximum growth
Optimal calcium to phosphorus ratio	> Ensures good shell formation and quality hardness
Quality assured vitamin/trace mineral inclusion	> Provides the optimal balance of vitamins and minerals to meet laying bird nutritional requirements
Crumbled feed	> Prevents selective feeding, reduces dust/wastage and reduces risk of bacterial contamination
Enzyme inclusion	> High quality phyate enzyme helps improve nutrient bioavailability and digestibility, which helps minimise wet litter
No ingredient separation	> Even nutrient blend received by each bird
Raw material receival standards	> High quality and safety of ingredients for quality assurance
Natural ingredients	> For healthy egg production

## Nutritional Analysis

<b>Nutrients</b>	<b>As fed basis</b>
Crude Protein (min)	14.0%
Metabolisable Energy (min)	2350 kcal/kg
Crude Fibre	8.0%
Added Salt (max)	0.2%
Calcium (min)	3.6%
Available Phosphorus (min)	0.3%

## Ingredient Selection

Cereal grains, oilseed meals, lupins, cereal byproducts, limesand, minerals, amino acids, vitamin/trace mineral premix.

## Feeding Directions

Milne Poultry should be fed ad lib from about 17 weeks of age (1 - 2 weeks before point-of-lay) through to the end-of-lay.

Birds can be expected to eat about 120 g/day depending on hen size, type and conditions.

## FOR HEALTHY, HAPPY CHICKENS AND POULTRY
