DAIRY RANGE

MaxiFat® Pellets

MaxiFat® is a high-energy, moderate-protein pellet with a treated fibre inclusion. It is designed to enhance feed conversion in cows grazing high-quality pastures. MaxiFat® ensures cows on such pastures achieve high milk production, good milk protein and optimal milk fat tests.

Features		Benefits
Nutritionally balanced ration	>	Supplements the nutritional requirements of cows grazing high-quality pastures. Additional treated fibre maintains or improves milk fat test
Provides a stable rumen environment	>	Allows the rumen bugs to work efficiently to extract more energy from pastures and concentrates
Can be fed safely to dairy cattle	>	Needs no introduction period
High energy, moderate protein	>	Complements high-quality pastures that already supply ample protein, maintaining milk protein without excess rumen nitrogen
Complete supplement	>	Additional feed additives normally fed to prevent acidosis are not required
Contains Bovatec® (Lasalocid sodium)	>	As an aid in the prevention of coccidiosis
	>	Aids in the reduction of bloat from pasture and reduction of ketosis in dairy cattle which can aid in reducing the incidence of clinical mastitis in lactating dairy cows
Vitamin/trace mineral premix	>	Provides the essential vitamins and minerals to meet nutritional requirements for high-producing cows
Pelleted feed	>	Reduces dust and prevents wastage
No ingredient separation	>	Even nutrient blend received by each cow
Raw material receival standards	>	High quality and safety of ingredients for quality assurance

NUTRITIONAL ANALYSIS

Nutrients	Dry matter basis
Crude Protein (min)	12.0%
Metabolisable Energy (est)	13.0 MJ/kg
NDF (min)	25.0%
Calcium (min)	0.8%
Phosphorus (min)	0.4%
Lasalocid sodium from Bovatec®	66 mg/kg

INGREDIENT SELECTION

Cereal grains, cereal grain byproducts, lupin byproducts, limesand, monocalcium phosphate, vitamin/trace mineral premix, Lasalocid sodium.

FEEDING DIRECTIONS

MaxiFat® is designed to be fed to dairy cows in all stages of lactation, providing a safe energy source to cows grazing good-quality annual pastures. It will help maintain or improve milk fat levels.

MaxiFat® can be fed in the dairy. The quantity fed should be adjusted according to the cow's production and body condition, and the availability of quality pasture.

MaxiFat®
Better conversion, maximum fat.
