

BEEF RANGE

Early Weaner Pellets

Early Weaner is a nutritionally balanced pellet for feeding to pastoral calves and young weaners. It is a high energy, high protein ration, ideal for early weaned calves and young weaners, to enhance growth rates and rumen development.

Features

Nutritionally balanced ration

Benefits

- > Meets the high protein/energy requirements of growing calves and young weaners

Promote rumen development

- > Weaners are able to perform well on pastoral pastures when fed Early Weaner, which aids rumen microflora

High energy density

- > Promotes rapid growth and development

Contains 21% protein

- > Optimum protein level for growth and development of calves and weaners

Added canola meal

- > By-pass protein enhances rumen development and growth

Contains Bovatec®
(Lasalocid sodium)

- > For the control of clinical signs of coccidiosis and reduction of faecal shedding caused by *Eimeria bovis* and *Eimeria zuernii* in growing cattle.

Quality assured vitamin/trace mineral premix

- > Provides the essential vitamins and minerals required to sustain weaner health and growth

Pelleted feed

- > Prevents wastage and ensures consumption of all nutritional components

No ingredient separation

- > Even nutrient blend received by each animal

Raw material standards

- > High quality and safety of ingredients. Feed produced in a FeedSafe® accredited mill

NUTRITIONAL ANALYSIS

Nutrients	Dry matter basis
Crude Protein (min)	21.0%
Metabolisable Energy (est)	13.0 MJ/kg
Crude Fibre (max)	10.0%
Calcium (min)	1.1%
Phosphorus (min)	0.4%
Lasalocid sodium from Bovatec®	60ppm

INGREDIENT SELECTION

Lupins, barley, wheat, cereal byproducts, canola meal, limesand, dicalcium phosphate, salt, vitamin/trace mineral premix, Lasalocid sodium.

FEEDING DIRECTIONS

Early Weaner is designed to be fed to pastoral calves and weaners (up to 140 kg) on an ad lib basis. Expected intake will start at 100-200 gm/head/day in small calves, and progress to 2-3 kg/head/day as weaners reach 130-140 kg.

Early Weaner must be fed with roughage, in the form of pasture, hay or straw. Ensure pellets are always fresh to encourage intake.

Early Weaner aids in the development of the rumen to maximise the utilisation of pastures and dry paddock feed.

Ensure that clean, fresh water is available at all times.

Bovatec® is a registered trademark of Zoetis

THIS PRODUCT IS BEST STORED UNDER COOL, DRY CONDITIONS. FOR ANIMAL FEED ONLY.
