BEEF RANGE

CalfGro Pellets

CalfGro is a nutritionally balanced pellet for feeding to calves and weaners. It is a high energy, high protein ration ideal for early weaned calves and young weaners, to enhance growth rates and rumen development.

Features		Benefits
Nutritionally balanced ration	>	Meets the high protein/energy requirements of growing calves and young weaners
Promotes rumen development	>	Weaners are able to perform well on pastoral pastures when fed CalfGro, which aids rumen microflora
High energy density	>	Promotes rapid growth and development
Contains 20% protein	>	Optimum protein level for growth and developmement of calves and weaners
Added Canola meal	>	By-pass protein enhances rumen development and growth
Contains Bovatec® (Lasalocid sodium)	>	For the control of clinical signs of coccidiosis and reduction of faecal shedding caused by *Eimeria bovis* and *Eimeria zuernii* in growing cattle.
Quality assured vitamin/trace mineral premix	>	Provides the essential vitamins and minerals required to sustain weaner health and growth
Pelleted feed	>	Prevents wastage and ensures consumption of all nutritional components
No ingredient separation	>	Even nutrient blend received by each animal
Raw material standards	>	High quality and safety of ingredients. Feed produced in a FeedSafe® accredited mill

*Bovatec is a registered trademark of Zoetis Pty Ltd.

NUTRITIONAL ANALYSIS

Nutrients	Dry matter basis
Crude Protein (min)	20.0%
Metabolisable Energy (est)	12.5 MJ/kg
Crude Fibre (max)	20.0%
Calcium (min)	0.7%
Phosphorus (min)	0.35%
Lasalocid sodium from Bovatec®	60mg/kg

INGREDIENT SELECTION

Lupins, barley, wheat, cereal byproducts, canola meal, limesand, mono-calcium phosphate, salt, vitamin/trace mineral premix, Lasalocid sodium.

FEEDING DIRECTIONS

CalfGro is designed to be fed to pastoral calves and weaners (up to 140 kg) on an ad lib basis. Expected intake will start at 100-200 gms/head/day in small calves, and progress to 2-3 kg/head/day as weaners reach 130-140 kg.

CalfGro must be fed with roughage, in the form of pasture, hay or straw. Ensure pellets are always fresh to encourage intake.

CalfGro aids in the development of the rumen to maximize the utilisation of pastures and dry paddock feed.

Ensure that clean, fresh water is available at all times.
