

Complete base assembled

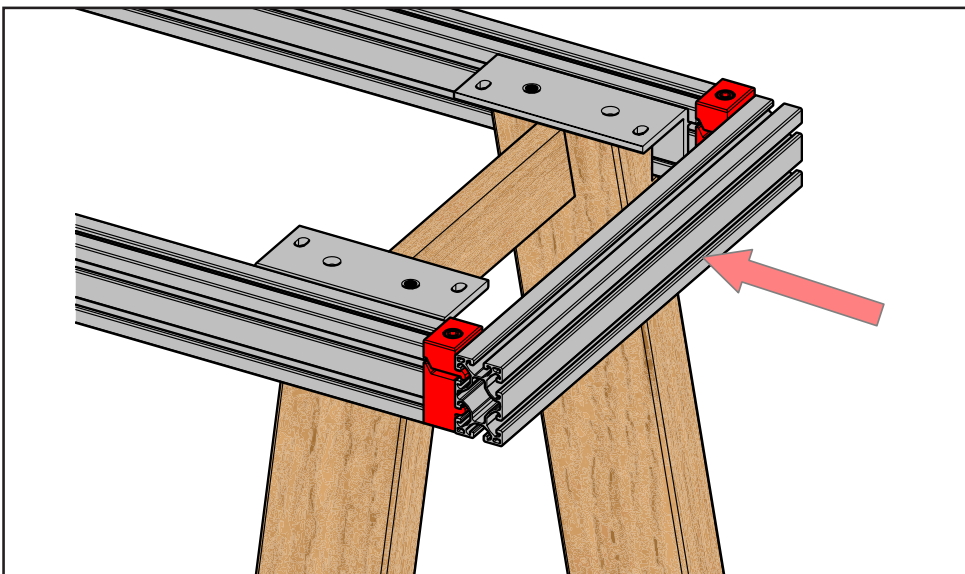

nienkämper

Installation Guide

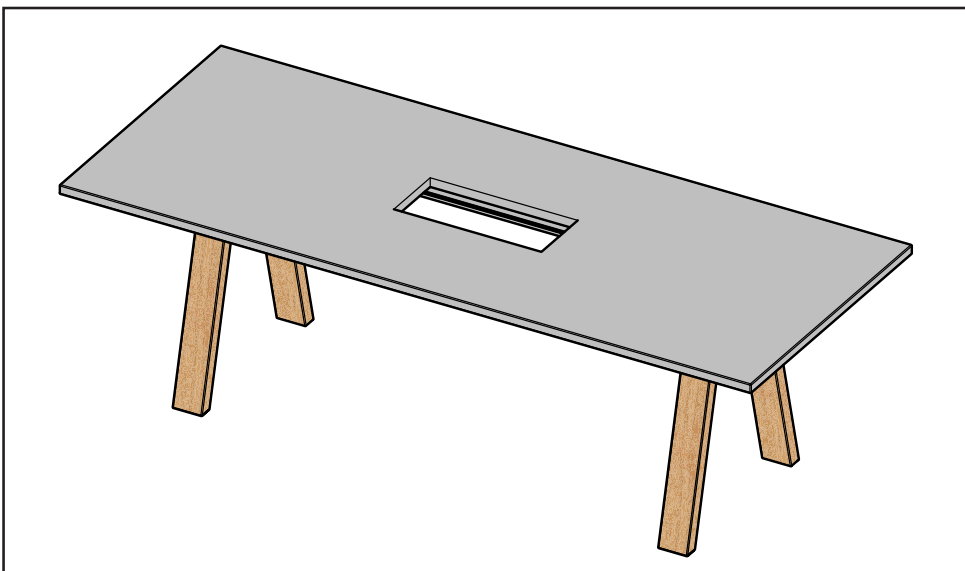

Step 1

Stand up bases and slide rails onto the base brackets.

Step 2

Install the rails on the ends to the grippers.

Step 3

Place work surface on the base assembly.
Attach base bracket to the underside of the top with 1/4-20" x 3/4" pan head screws (qty 4 per base)

Note: for smaller tables it is easier to install the power unit and troughs onto the work surface before attaching the bases.
