INSTALLATION GUIDE

c (UL) us   IT! READY

**MODEL FORUM M-SERIES ALL CONFIGURATIONS**

MODEL FORUM N-SERIES ALL CONFIGURATIONS

It is important to protect furniture worksurface while installing this product!

REMOVING A MODULAR FACEPLATE

1

2

- If faceplate modules have been specified for site wired connections, it will be necessary to remove faceplate modules.
- With a Phillips head screw driver, remove the two machine screws at the base of the faceplate module to be removed.

- Once the screws have been removed from the faceplate, carefully lift from the bottom and swivel the faceplate out of the assembly.

INSTALLING MODULAR FACEPLATE

INSTALLING THUMBSCREWS

3

4

- Once connections have been made, reposition faceplate, re-install screws and install assembly in table top as per 4, 5 and 6.

- Retrieve the swivel catches from the packaging.
- From the underside of the table top carefully thread the plastic thumbscrews into inserts around the square hole in the top.
- Do not tighten completely.

5

6

- Position the Vox Forum in the opening and carefully ease up into the square hole in the table.

- Pay attention to the desired direction of the lid on the unit when inserting.

Important! ⚠️ ⚡

- **This electrical device is provided fully wired and should not be tampered with.**
- **Tampering with this device voids warranty and may cause electrical shock.**
- **Please note, for detailed instructions about this Vox Forum - see the last page after the installation photographs.**
- **For information please call Nienkamper Customer Service at 1-800-668-9318.**
- **For e-mail inquiries:** *mail@nienkamper.com*

- Rotate the swivel catches over the edge of the Forum and tighten the thumb screw fasteners hand tight.

WIRE MANAGEMENT

WIRE MANAGEMENT

7

8

- Adhesive wire management strips are supplied and can be positioned directly behind the Vox Forum or where required.

- Cables can be inserted into 1 of 3 channels.

- Tables manufactured with rail supports are supplied with wire management "U" clips.

- Cables can be stored and routed along the rails to the table bases, using these clips.

- Plug cables into source.

nienkämper

9

• To access connections, simply open the lid and insert desired plug.

INSTALLATION AND OPERATING INSTRUCTIONS
VOX FORUM M & N-SERIES

Please read instructions carefully

WARNING:
- Electrical components are provided fully wired. These components should not be tampered with.
- Maximum two power output modules can be installed to one appliance.
- This installation should be made by a qualified service person and should conform to all local codes.
- More then one power supply, disconnect all power supplies before servicing.

GENERAL USE:
- Provides an access point to the top of a table surface to allow plug in convenience for audio, video, voice/data/power receptacles.
- From the top of the table the flip up door can be held open while plugging into the device.
- Requires no maintenance but care should be taken to keep the flip up door closed to reduce the risk of foreign matter or liquids from falling into the assembly.
- Flexible power cord assemblies include a reset fuse in case the power circuit is overloaded. To reset the fuse, simply push the small round black button on the faceplate.
- This product is intended for office equipment and laptop computer use only. Heavy equipment or maintenance equipment should not be plugged into the device.
- For PLUGGABLE EQUIPMENT, the socket-outlet shall be installed near the equipment and shall be easily accessible.
- For PERMANENTLY CONNECTED EQUIPMENT, a readily accessible disconnect device shall be incorporated in the building installation wiring.
- Site wired power modules are provided with a 3' long shielded metallic cable fully wired to the receptacle. Simply connect metallic cable end to source.
