

Finger Print Resistant Plastic Laminates

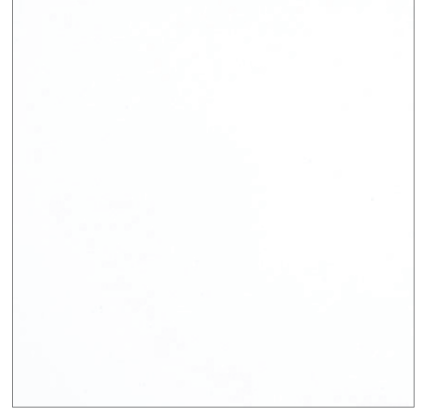

Nienkämper's Fingerprint Resistant Plastic Laminate (FPR) is an advanced material designed for both vertical and horizontal interior applications. Its surface uses nanotechnology powered by next-generation acrylic resins to deliver a premium user experience. Key features include an ultra-matte, glare-free finish, a soft-touch feel, fingerprint resistance, thermal healing of micro-scratches, enhanced durability, and antibacterial and mold-resistant properties.
