HOW TO ORDER VOX® CONFERENCE TABLES

Vox® Conference Tables- Designed for versatility and style, Vox tables are available in a wide range of shapes and sizes to complement any meeting space. Standard heights are 28½" or 29", and the collection can be customized to meet unique requirements. For assistance, contact your local Nienkämper Sales Representative or Customer Service at **800.668.9318**.

SELECT SHAPE

Use the table of contents, or simply flip through the Conference Tables section of the Planning Guide to select a table shape that is suitable. To help find a shape, a small outline of the top is provided in the upper corner of each page.

SELECT BASE OPTION

There are seven distinct base designs for each table shape that offer both aesthetic and functional benefits. Each base design is listed by model number for every top shape with options and choices for base finishes. For the Duo, Tri, Quad, Access, Tower and Drum Bases, a wood or plastic laminate finish must be selected, see page 8-11. If not specified otherwise, base finish will match top finish. Pages 17-23 illustrates the features of each base in detail and describes how wiring is accommodated.

SELECT SIZE AND MODEL NUMBER

L"	x	D"	Suggested Seating Capacity*	Top Finish	Top Sections	Model Number
120		42	8 - 10		2	51309/

Select the table size, from as small as 72" x 36" to as large as 240" x 84". Seating capacity is listed and can aid in determining the size required. Select a wood veneer or wood laminate option for your top.

SELECT EDGE PROFILE

Edge profiles can be specified for nearly any table shape. A small profile drawing appears at the top of each page, along with a two- or three-letter code indicating which edge profiles pair best with each top. Add this code to the end of the model number when specifying. For profile photos and scaled drawings, refer to page 13

SELECT VENEER AND FINISH

If a wood veneer top was chosen, a species and finish must be selected. Page 8 describes all wood veneer options.

SELECT LAMINATE

If a laminate top is preferred, Nienkämper offers a variety of wood grain and solid color laminates to choose from. Refer to pages 9-11 for a complete listing as well as instructions for customer specified laminates. Wood edges on wood grain laminate tops are selected to most closely resemble both the species and color of the laminate. Facet and Taper edge profiles are available with laminate tops.

ALUMINUM FINISH

Aluminum finishes must be specified for T-Base, Duo style bases, Access Base trim (if applicable), Forums and Accessories.

SELECT FORUMS (POWER / CONNECTIVITY SOLUTION)

Vox® Forums provide a large variety of options for simple to complex connectivity requirements. Pages 216-245 describe these products and their features. Pages 219-221 show Vox Forum placement along the table top for all sizes of tops. Anodized aluminum finishes are listed on page 12.

Power Troughs or Power Drawers can be added to most Vox® Conference Tables providing a full range of Connectivity and Power solutions. Details can be found on pages 246-263.

P-LAM

Wood grain plastic laminate surfaces are available on table tops with Facet, Taper and Self edges.

These tops are manufactured with a solid wood edge that is applied prior to the laminate top surface. This method conceals the thickness of the wood edge, while providing the durability required. Wood edges are selected that most closely resemble both the species and the color of the laminate chosen

Nienkämper has pre-selected a number of standard wood grain plastic laminates that represent a cross section of both color and species. Simply include the order code with the model number to make these selections. Alternatively wood grain plastic laminates selected outside of Nienkämper's standard selection can be made by specifying the manufacturer as well as the description and model number of the laminate at the time of order.

P-LAM

COLORED P-LAM

Both Taper and Self edge profiles are available with a colored laminate top.

Laminate edging on Taper tops. Edging will match the top surface and is applied before the surface laminate. By applying the laminate in this way, the seam is positioned horizontally, which makes it much less conspicuous and more durable.

Wood edging on Self and Taper Edge tops are applied before the laminate. By applying the wood edge in this way, the wood edge thickness is concealed, while providing the durability required. Wood species and finishes for edging can be selected from page 8.

For laminates specified outside of Nienkämper's standard selection, specify the manufacturer as well as the description and model number of the laminate selected at the time of order. For Facet edge tops, the laminate must be a post-forming grade.

Translucent edging on Self and Taper edge tops is applied after the surface laminate. The translucent edge is very durable. Clear translucent edge provides a good match with most white-colored laminates, while a silver translucent edge provides a metallic look and contrast to colored plastic laminates.

Access BASE

The Vox® Access Base has removable exterior panels that conveniently conceal cables. The overall footprint of the base provides a significant area at floor level to conceal cabling, core drills or floor monuments.

Bases come in a variety of sizes, which are noted beside the model numbers of the Vox® Tables. Specific dimensions and interior clearances for each base style and size are shown on pages 17-21.

Once cabling has been routed through the base to the underside of the top, it can be channeled and secured with Wire Management "U" Clips (supplied) which can be positioned along the length of the rail support system. Wire Management Strips are also provided, which can be adhered to the underside of the top as required.

When including a quantity of Vox® Forums to be hard-wired on site, the electrician should allow for one J-Box per Forum on the underside of the top to complete site-wiring.

Voice and data cabling can also be consolidated by mounting a Data Hub (provided by others) to the underside of the table.

WARRANTY

There are no express or implied warranties, conditions and obligations of the manufacturer, whether statutory or otherwise that extend beyond the description on the face hereof. Our furniture is made to the highest standard and is warranted free from defects of material and workmanship for five years from the date of delivery. During the warranty period we will repair or replace such merchandise as shall prove to be defective, during normal usage in accordance with manufacturer's specifications. The manufacturer shall not be liable for defect wholly attributable to normal manufacturing process. Replacement or repair of the Product shall be the sole remedy of the Customer, and the manufacturer shall not be liable for any direct, indirect, incidental, or consequential loss or damage suffered by the Customer by reason of any defect in workmanship or manufacture of the Product or inability to use the Product. Moreover, this warranty does not cover accidental damage, abuse, alteration, ordinary wear and tear of Goods, negligence and misuse nor variations over which we have no control such as heat or humidity or damage to which the Goods are connected that is not attributable to the failure of the goods themselves. This warranty is null and void when the product is installed with hardware other than that supplied and/or when installed differently than recommended in the installation guide. Modification to the product or hardware may result in failure of the product and cause damage and/or injury.

WOOD FINISHES

Nienkämper offers a wide variety of standard light finishes on cherry, mahogany and figured anagré wood veneers, and a clear natural finish on figured anagré, figured sycamore, maple, bird's eye maple and curly maple.

Light finishes do not mask the grain and other characteristics of each wood species. It is important to understand that pieces of the same type of wood will not look identical when a light finish is used. The appearance of the finish will also depend on the natural color of the veneer. Cherry darkens over time as the wood ages. Pin knots and gum pockets are inherent traits.

Wood is a naturally variable raw material; its variances are not within the furniture manufacturer's control and are therefore not considered defects under this warranty.
