## BASE, SHAPE, EDGE & CONNECTIVITY

Designer - Hadi Teherani

A sculpture in space: this conference table by architect Hadi Teherani combines high functionality with perfected quality and visual lightness. The Hadi table resonates in contemporary settings where design integrity and material matter most. Like a ribbon, the elegant curved metal base bracket continues on the surface of the tabletop where it becomes a functional surface - the central element. It can be equipped with multimedia modules; depending on the requirements, the equipment can be adjusted at any time. All cables are hidden in the support structure of the Hadi table. The table's elegant look remains undisturbed, timeless and architectural.

**Wood grain plastic laminate surfaces are available on table tops with Facet, Taper and Self edges.**

These tops are manufactured with a solid wood edge that is applied prior to the laminate top surface. This method conceals the thickness of the wood edge, while providing the durability required. Wood edges are selected that most closely resemble both the species and the color of the laminate chosen

Nienkämper has pre-selected a number of standard wood grain plastic laminates that represent a cross section of both color and species. Simply include the order code with the model number to make these selections. Alternatively wood grain plastic laminates selected outside of Nienkämper's standard selection can be made by specifying the manufacturer as well as the description and model number of the laminate at the time of order.

## WOOD FINISHES

Nienkämper offers a wide variety of standard light finishes on cherry, mahogany and figured anagre wood veneers, and a clear natural finish on figured anagre, figured sycamore, maple, bird's eye maple and curly maple.

Light finishes do not mask the grain and other characteristics of each wood species. It is important to understand that pieces of the same type of wood will not look identical when a light finish is used. The appearance of the finish will also depend on the natural color of the veneer. Cherry darkens over time as the wood ages. Pin knots and gum pockets are inherent traits.

Wood is a naturally variable raw material; its variances are not within the furniture manufacturer's control and are therefore not considered defects under this warranty.
