

Number Explorer Missions

Hold up 1 finger. How many fingers are folded down across both hands? That's the difference between 1 and 10

Now hold up 4 fingers. What's the difference?

Now hold up 7 fingers. What's the difference?

Play Together

Ten's Race Track. Cut out the two Numberblob tokens and give one to your little learner. Using a six-sided dice or an online dice roller, take turns rolling the dice. When you roll the dice, count your token that many spaces along the track and ask your little learner to help you figure out how many more you need. First one to get to the end wins!

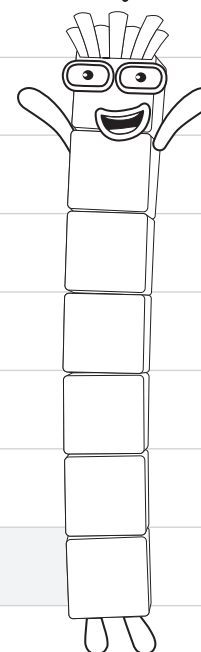

For your next mission, find the episode 'Numberblock Rally'

What's the Difference?

This mission belongs to _____

What's the difference?

7

Numbers to 10

Composition of numbers to 10

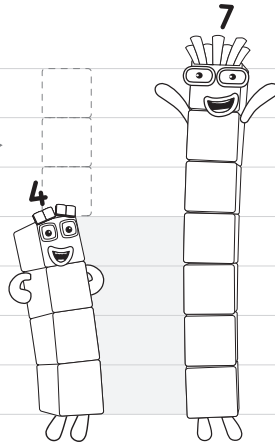

What's the Difference?
