

Number Explorer Missions

Have a grown-up help you find ten little things (counters, bottle-tops, pebbles etc)

Start by putting two little things in a row. How many are there?
Now add another row of two. How many are there now?

Keep going until you've used all your things!

Try doing this again with rows of 5, or 3, or 4!

Play Together

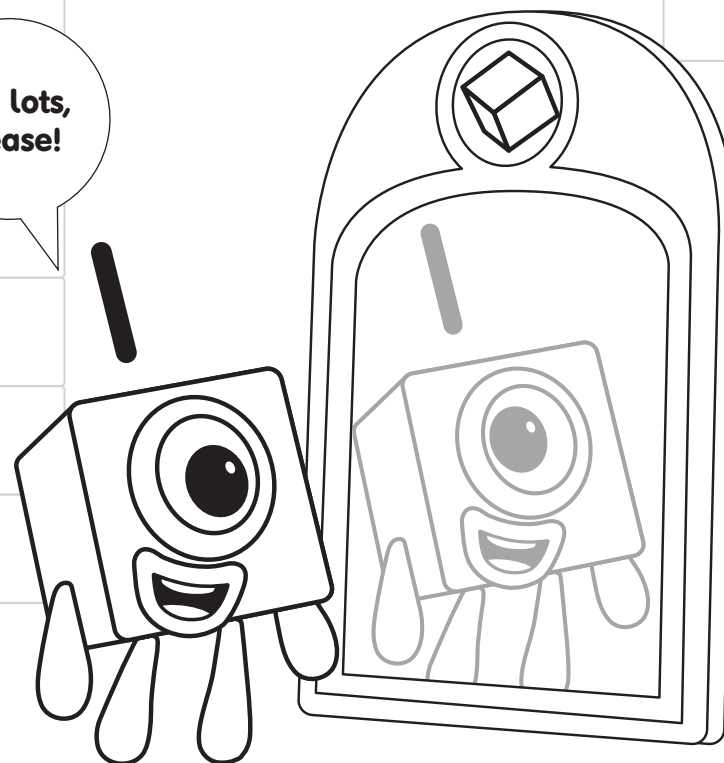

Magic Mirror Matches! Divide a piece of scrap paper with a line. Ask your little learner to choose a Numberblock and draw them on one side of the line. Once they have drawn their Numberblock, match their drawing on your side of the line. Ask your little learner who these two Numberblocks can make together.

For your next mission, find the episode 'The Wrong Number'

Mirror, Mirror

This mission belongs to _____

Two lots, please!

Numbers to 10

Adding multiples of the same number

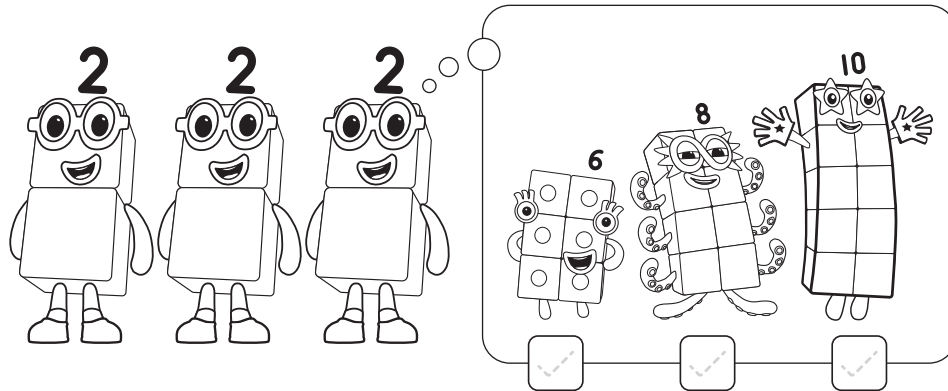

Mirror, Mirror

Count and tick!

2

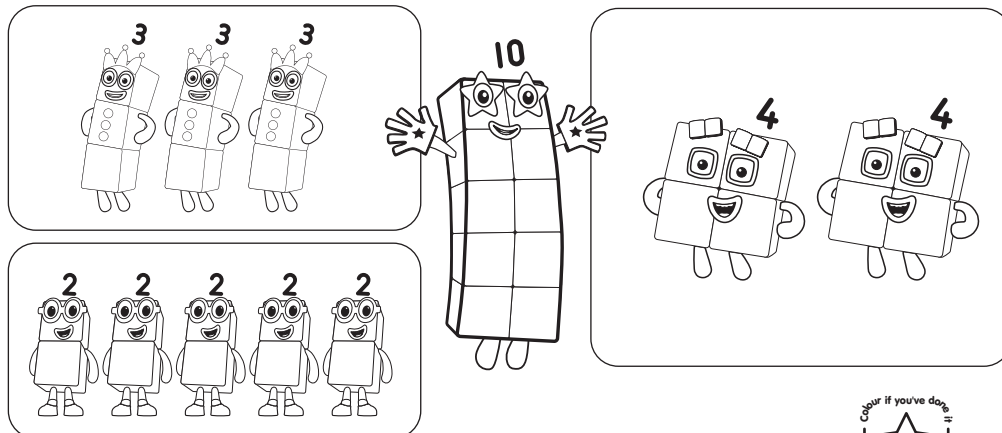

Who can these Numberblocks make all together? Tick the right Numberblock.

Tip: count all the block!

Who is it?

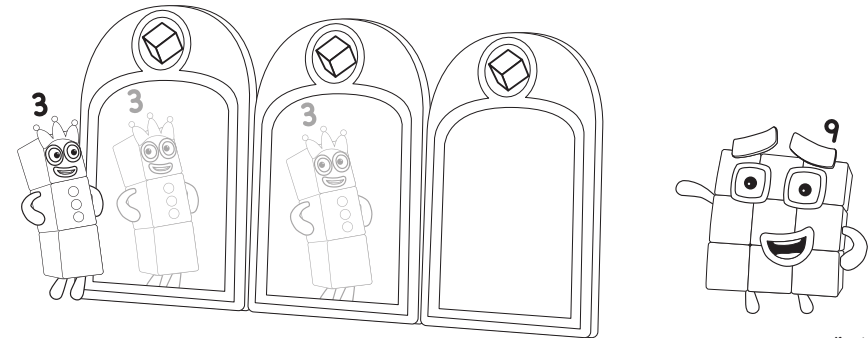

Which group of Numberblocks can make Ten?
Point to them and say their names.

Spot it!

3

Who is missing from the magic mirror?
Can you find them hiding somewhere on the page.

Who does Five need to
help them make 10?
Draw them in the
magic mirror!

Draw it!
