

Number Explorer Missions

When you're out in a nice big space, pretend your two feet are on a two ray track. Zoom and whoosh along and shout 'Ride the rays!'

Draw a house that is 7 blocks wide and 2 blocks tall. Which Numberblock could live here?

Find 6 pairs of shoes and build a 2 by 6 rectangle. How many shoes altogether?

Look for rectangles when you are out. How many can you find?

Play Together

Switch! Draw a rectangle that is 3 blocks by 4 blocks, then ask your little one to cut out the 12 blocks using safe scissors.

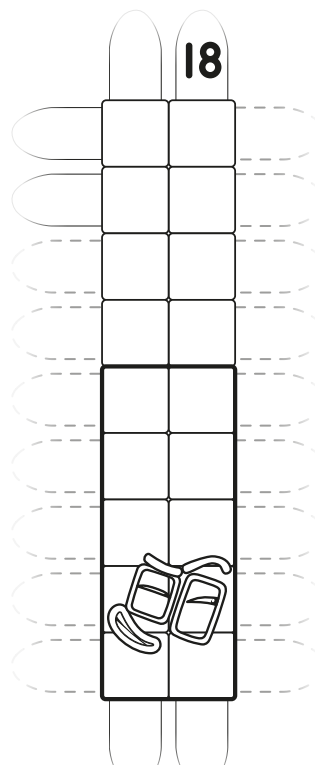

Can they use the blocks to build a new rectangle? See if they can build a new rectangle every time you say, "Switch!"

For your next mission, find the episode 'Nineteen'

Loop the Loop!

This mission belongs to _____

Can you finish drawing Eighteen's rectangle rays so he can go for a ride?

I change shape when I want to go faster!

Let's go!

Numbers to 20

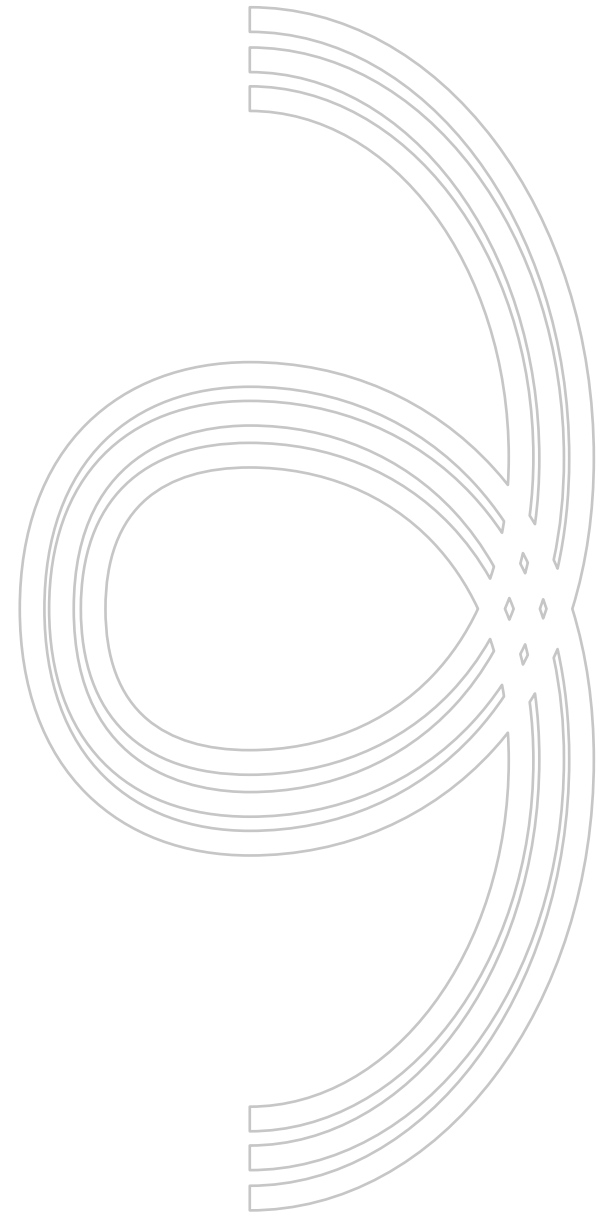

Numbers that can make rectangle shapes

Loop the Loop

Loop the loop

**Cut out the Numberblocks in their rectangle arrays.
See who can fit each track and take them for
a loopy ride – wheeee!**

Loop the loop

I need a track
that's 1 ray wide!
