

# Number Explorer Missions

Look for number patterns when you are out or at home. Can you find any? Talk to a grown up about the patterns you find.

Try to make your own pattern of numbers by drawing shapes or using small things. For example 3, 6, 9 and 12 groups of pasta shapes. How far can you get?

Try writing the Numberlings for each number in your pattern. How many can you write?

## Play Together

**Finishing Patterns.** Find the grid on the extra sheet. Help your little learner to complete the pattern by drawing or placing small objects on the grid to make the shape. How far along the pattern can you get?

For your next mission, find the episode 'Hidden Talents'

Making Patterns

## Say the Pattern

Look at these  
Numberblocks.  
Can you see  
a pattern?

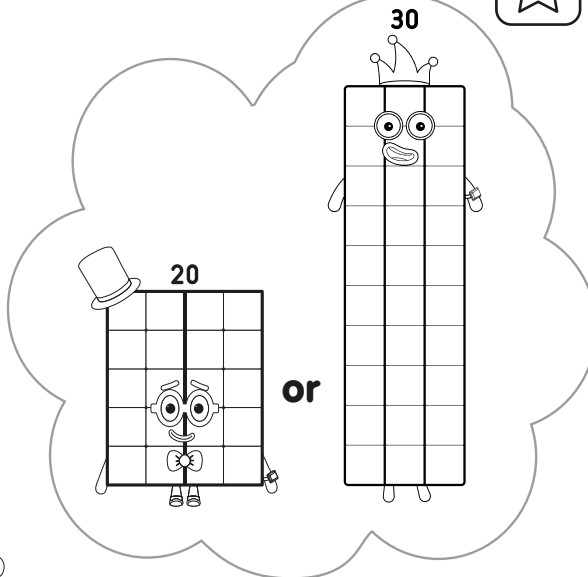

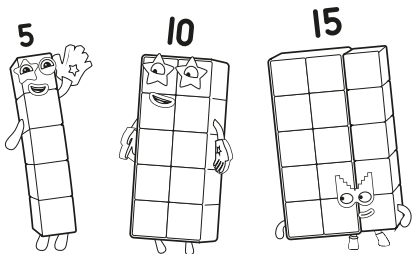

Hint: How many  
more blocks can  
you see each time?

2

## Who Is It?

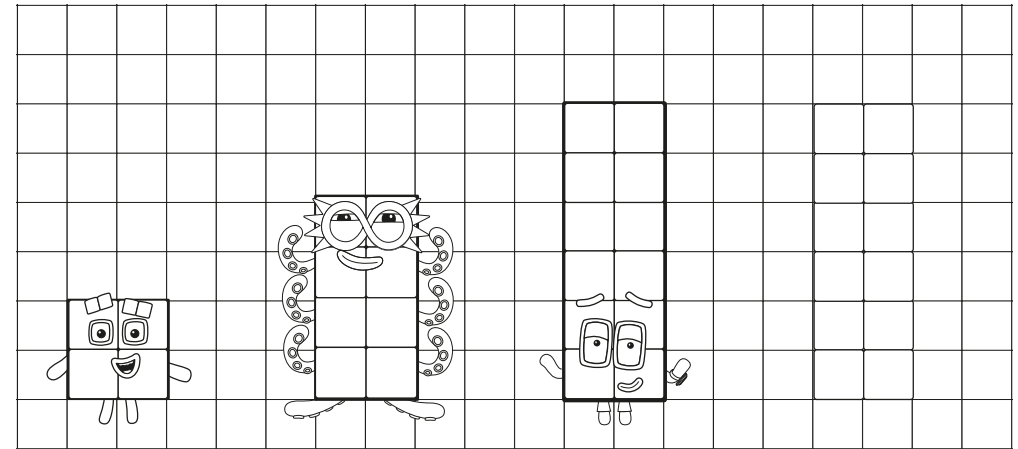

Can you see the  
pattern? Which  
Numberblock  
comes next?  
Circle them!

## Draw the Blocks

Can you draw the right number of  
blocks to complete the pattern?

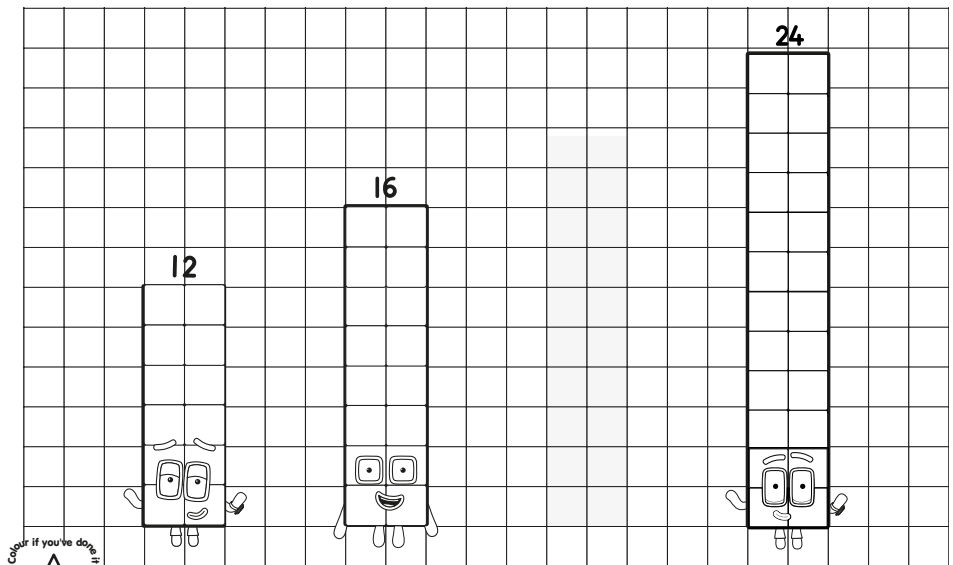

Hint: How many more blocks each time?

3

## Finish the Pattern

Which Numberblock is missing?  
Draw them in and say their name!
