

Number Explorer Missions

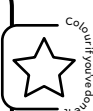

Build a tower of 14 blocks and find a dice. Roll the dice and see how quickly you can remove that number of blocks from the tower. Can you say how many blocks are left?

When you're playing in a sandpit, make as many sandcastles as you can, ask your grown-up to say a number, then have fun jumping on some! How many are left?

Gather together 13 of your toys. Ask your grown-up to hide some and then tell them how many you can see.

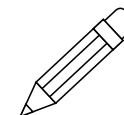

Play Together

Play a subtraction squash game! Make 15 small balls of play clay. Take turns to say a number to take away from 15. When it's your turn, squash the number of balls to take away. Tell your grown-up how many balls are left.

For your next mission, find the episode 'Rekenrek Bowling'

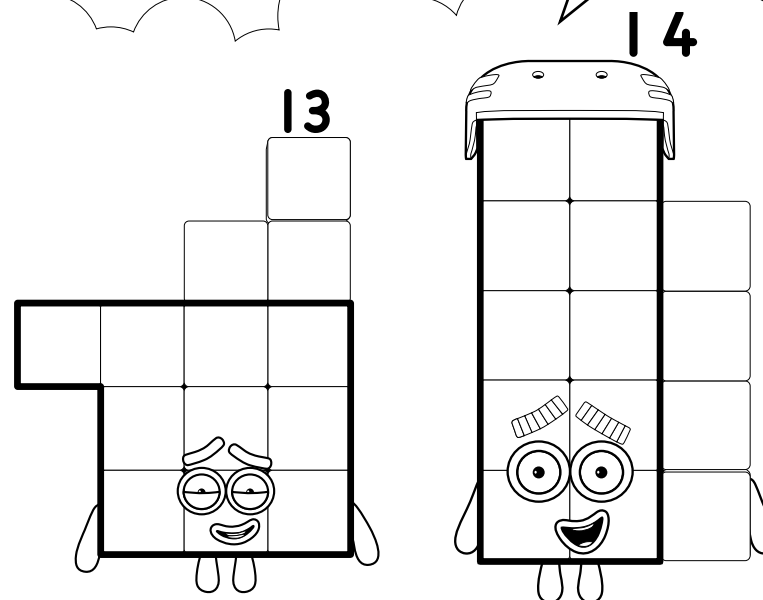

Subtraction Somersaults

This mission belongs to _____

Help Thirteen take away some blocks!

Let's show my friend how subtraction somersaults work!

Up to 20

Taking Away

Subtraction Somersaults

Take Away

Fourteen first! It's time to take away and somersault!

$14 - 5 = ?$

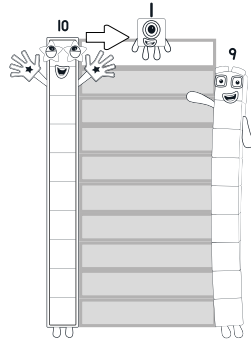

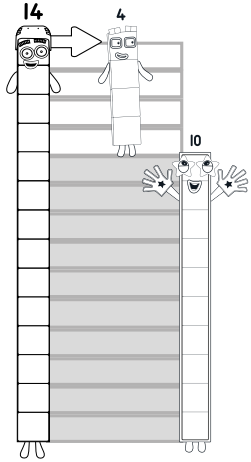

Get to 10 first!

$14 - 4 =$

10

$10 - 1 =$

9

Jump!

Tip!

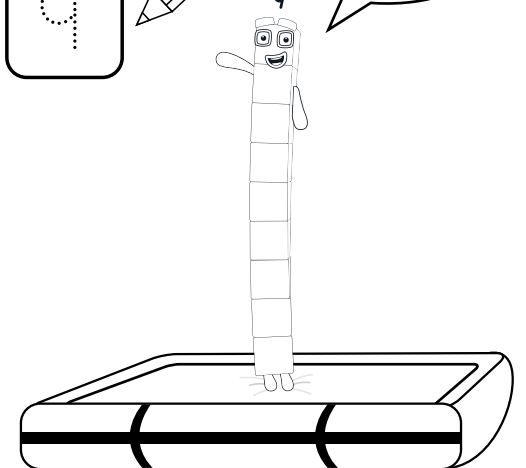

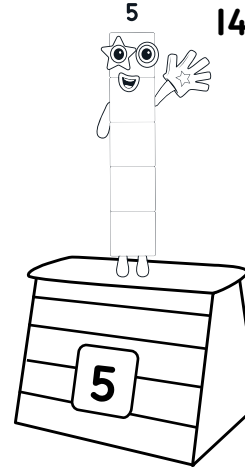

Use the number towers to help you count!

Five has jumped on the box!
Who has landed on the mat?

$14 - 5 =$

9

It's me!

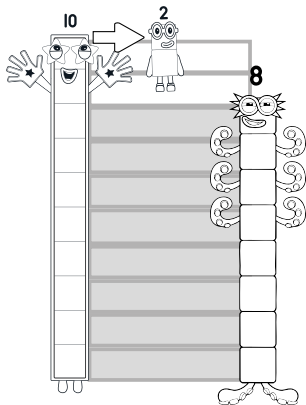

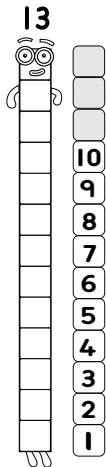

$13 - 5 = ?$

Get to 10 first!

$13 - 3 =$

$10 - 2 =$

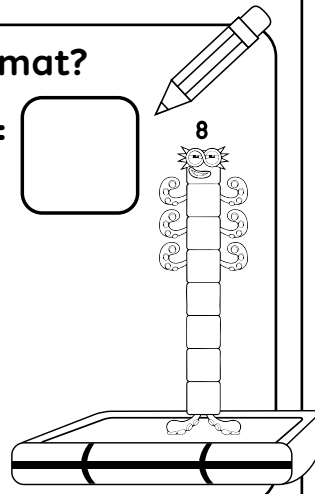

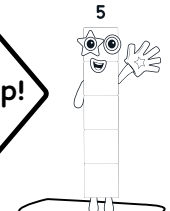

8

Who is on the mat?

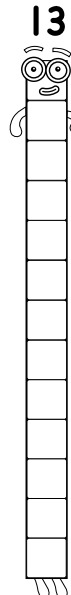

$13 - 5 =$

Jump!

Now try taking away from the bottom.

$13 - 5$

Try a new way!

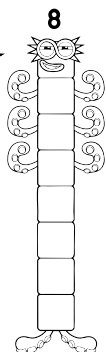

Scribble on numbers 1-5 to take them away.

$5 + 3 =$

Colour in Eight.

Great work!

You've tried two ways to take away, well done!
