

Number Explorer Missions

Hold up 10 fingers. Fold one down. How many fingers are up? Keep folding fingers down until you only have 1 left.

**March down 10 steps and count down from 10.
"10, 9, 8, 7..."**

Play Together

Alien Houses. Cut out the Ten aliens with your little learner, then help your little learner draw two big boxes on a piece of paper. Ask your little learner to put some aliens in one house and the rest in the other. Challenge them to see how many different ways they can split the aliens between the two houses.

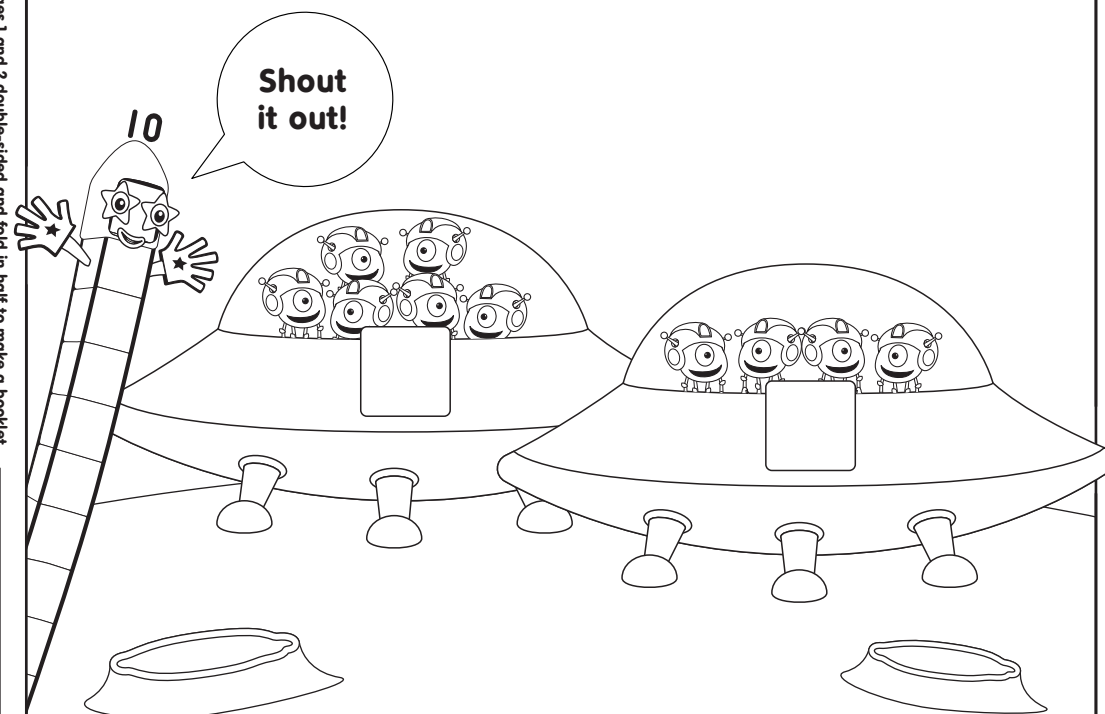

You may want to record what they have already tried.

For your next mission, find the episode 'The Two Tree'

Blast Off

This mission belongs to

How many aliens are there all together?

Level 2

**Number bonds
that total 10**

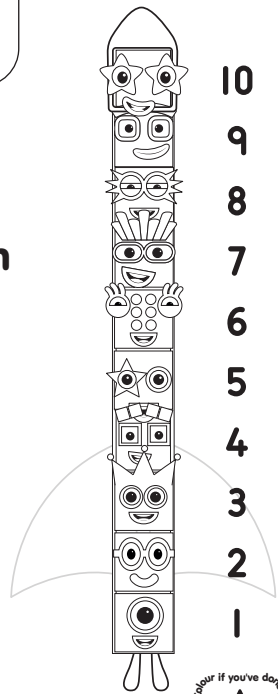

Blast Off
