

Number Explorer Missions

Pretend to be one of the Terrible Twos! Make a pile of 6 cushions. Fly over in your UFO and split the pile into twos!

How many lots of 3 can you make from your pile of cushions? What other groups can you make?

How many 2s can you find on you? 2 feet, 2 hands, 2 eyes, 2 socks... how many is that altogether?

Play Together

Factor Beams Game! Cut out the UFO cards and collect 12 blocks or small objects (pasta shapes work well).

Hold up a UFO card and ask your little learner to divide the 12 objects by that number.

For your next mission, find the episode 'Divide and Drive'
