

# Number Explorer Missions

**Go on a big number hunt! How many different numbers can you find in 1 minute?**

**Look for things to count when you are out. Try windows on buildings, wheels on cars or petals on flowers to start! Which thing did you count the most of? How high did you count?**

**Choose a number to start with, then count on from that number in Ones. Can you get all the way to 100? How high can you go?**

## Play Together

Fun with Patterns! Try making patterns with your little learner, using potato prints, finger prints, drawn boxes or similar. Ask them to say the pattern out loud as they make it. Challenge your little learner: can they copy your pattern? Can they continue it? How big can they make their pattern? Can they count all the shapes in it?

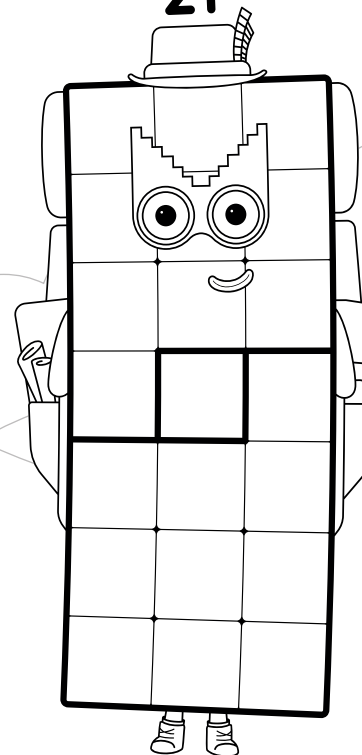

For your next mission, find the episode 'Fun Times One Times Table'

Level 5

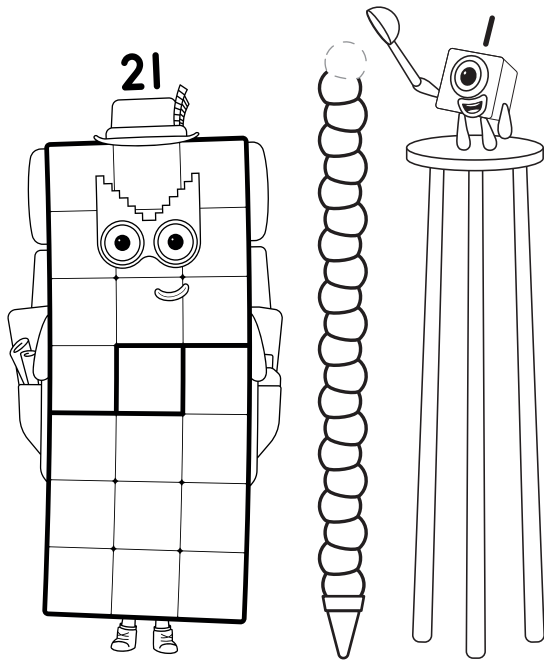

Endless Numbers

More to Explore

## Add One Cafe

2

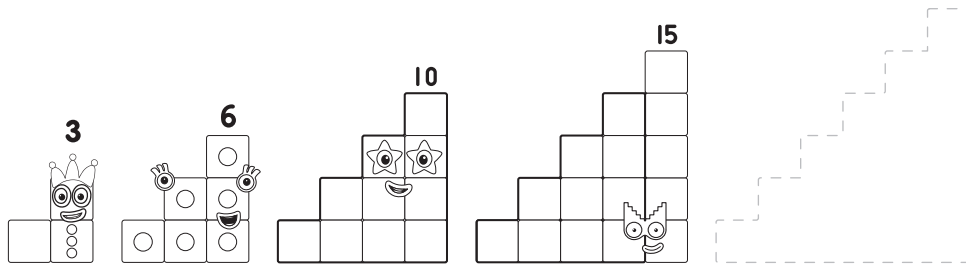

How many scoops of ice cream does Twenty have? Can you draw one more scoop? How many scoops is that altogether?

## What's next?

Can you see a pattern? Can you describe it? Which Numberblock comes next? Draw them!

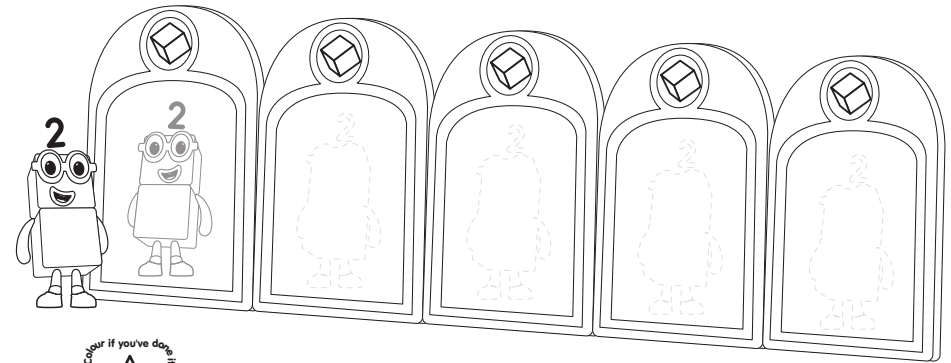

## Magic Mirrors

3

Draw Two in each magic mirror. How many blocks can you count altogether?

EXTRA: What if you added Two again? How many blocks would you have altogether?

## Square Shapes

Can you colour all of the squares? How tall and how wide are they?

EXTRA: How many blocks can you count in each square?
