

Number Explorer Missions

Can you find any patterns in your home or when you're out and about? How about on your socks, the tile floor in a shop or house numbers on a street? What else?

Make up your own fun pattern using some wooden blocks. You could stack them, and add one more to each new stack, or perhaps counting in twos? Can you think of any other patterns you could make?

Patterns can be active too! Why not try a one-legged jumping challenge? Jump once on the first leg, then two times on your second leg, then three times on the first leg, then four times on the second leg. How long can you keep your pattern going?

Pop on your favourite Numberblocks song. Can you listen for the repeating chorus? Or can you hear an instrument that repeats?

For your next mission, find the episode 'Rockets and Rekenreks'.

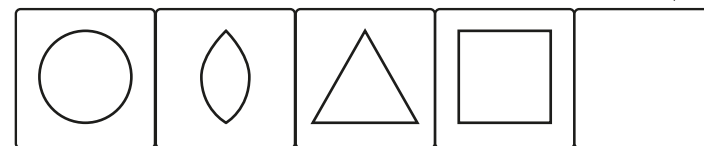

The Pattern of Patterns

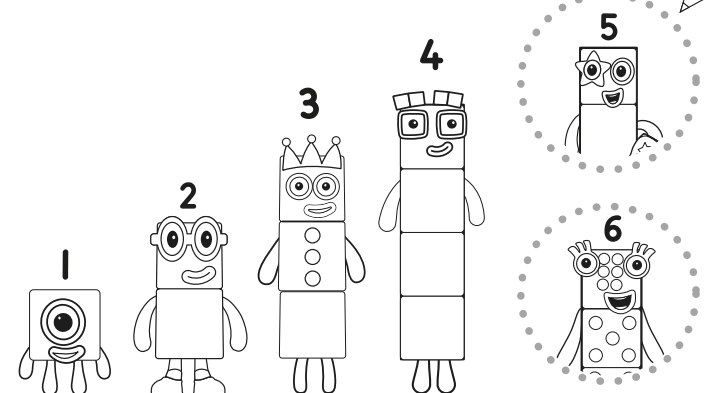

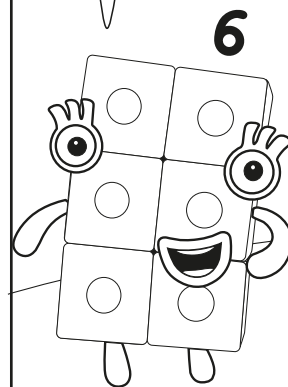

This quest belongs to...

Learn about sequences with Numberblock Six!

A pattern follows a rule. If the rule is the same in every step, you've found a pattern!

Draw a 5-sided shape next.

Circle the Numberblock next in line.

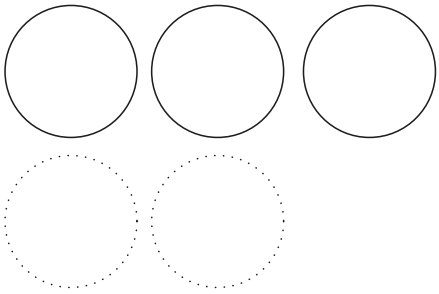

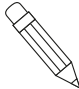

Level 3

Patterns

Twelve

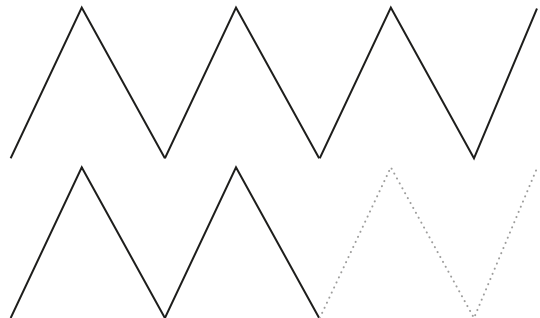

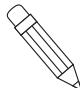

Perfect patterns!

Doodle to finish each friend's pattern!

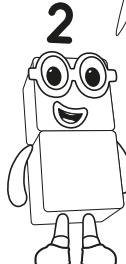

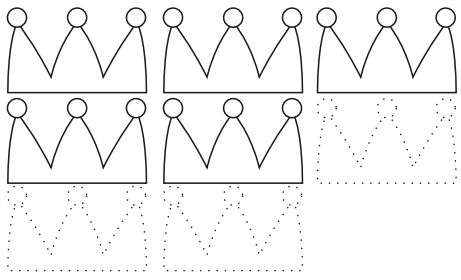

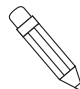

Spotty dots for me, please!

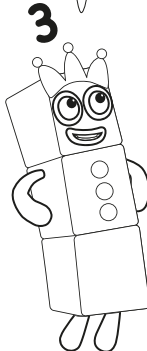

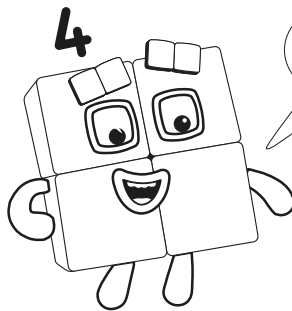

Oh, zigzaggy!

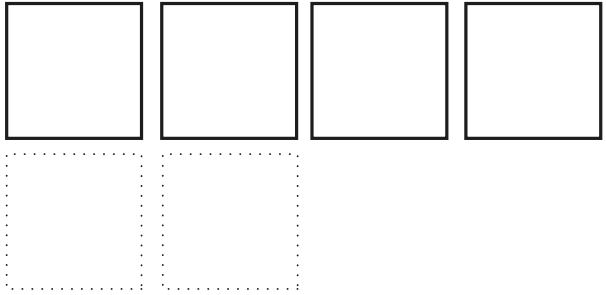

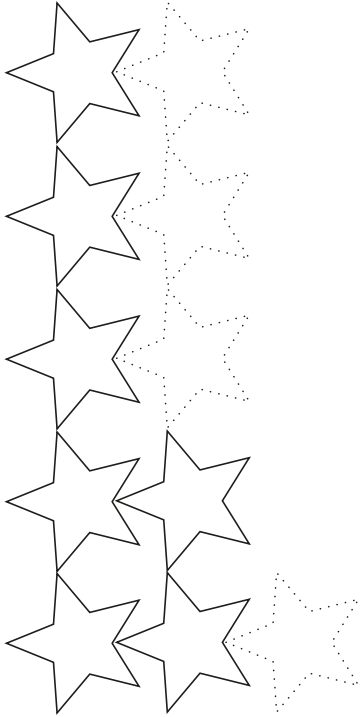

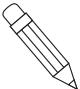

Crowns, of course!

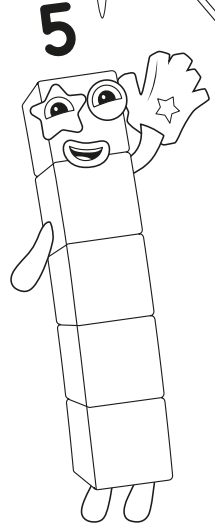

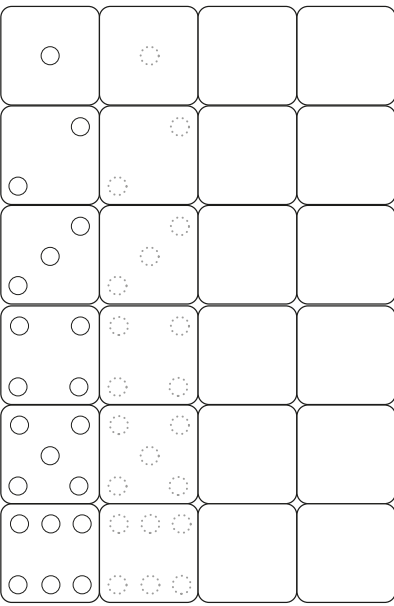

I love squares!

Super stars!

Roll up, roll up!
