

Number Explorer Missions

Make a big pile of toys. Can you split your pile into teams of two? How about into teams of three? Can you find a number that **CAN'T** be split into teams of 2 or 3?

Find 18 blocks, toys or pieces of pasta. How many teams of two can you make? How about teams of three?

Find an empty egg box and draw faces inside each egg cup. Now, choose whether to tear the box into twos or threes. How many teams can you make?

Play Together

Teams Game. Cut out your Numberblocks cards and shuffle them. Pop them in a stack face down. Draw cards one at a time with your little learner, taking turns to guess and call out 'Team of Twos', 'Team of Threes' or 'Teams of Twos AND Threes! If the Numberblock on the card is divisible by the number you call out, you keep the card. If not, shuffle it back into the deck. The player with the most cards at the end of the game wins.

For your next mission, find the episode 'Rectangle Racers'

The Team Factor

This mission belongs to

Tag! Can Numberblock Fifteen be split into teams of Threes? Draw lines to show how!
