

Number Explorer Missions

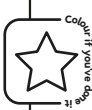

Scan the QR code for a toy play dominoes video!

Use the dominoes you made and 2 dice to play this game. Take it in turns to roll the two dice. Find a domino that has the same number of spots as the dice you've rolled. For any blank spaces, you choose the number! Who can collect the most dominoes?

Shuffle and split the dominoes between you. Place them face down in a row in front of you. The first player flips one domino over and places it in the middle, they then flip another one over. If it has matching spots to the one in the middle, place it down. If not, it's the other player's turn! Keep going until you've placed all your dominoes!

Play Together

Play a real life matching game! Pick who will be the searcher, and who will be the chooser. The chooser pops 1 to 3 objects down, and arranges them however they like. This could be 2 bananas and 1 apple, or 2 coins, or 3 books. The searcher has to look for similar items, and place them down in the same arrangement! Make it more challenging with a time limit.

For your next mission, find the episode 'Ten in the Bed'

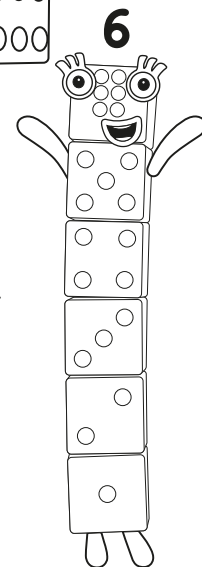

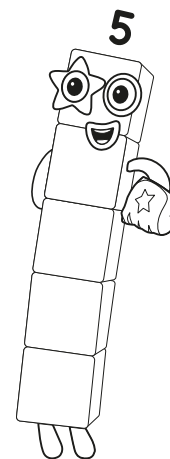

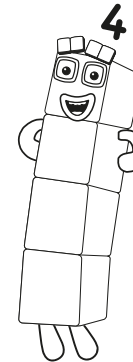

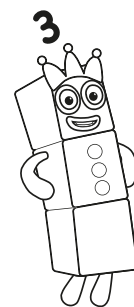

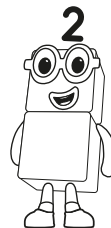

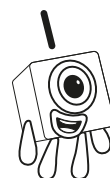

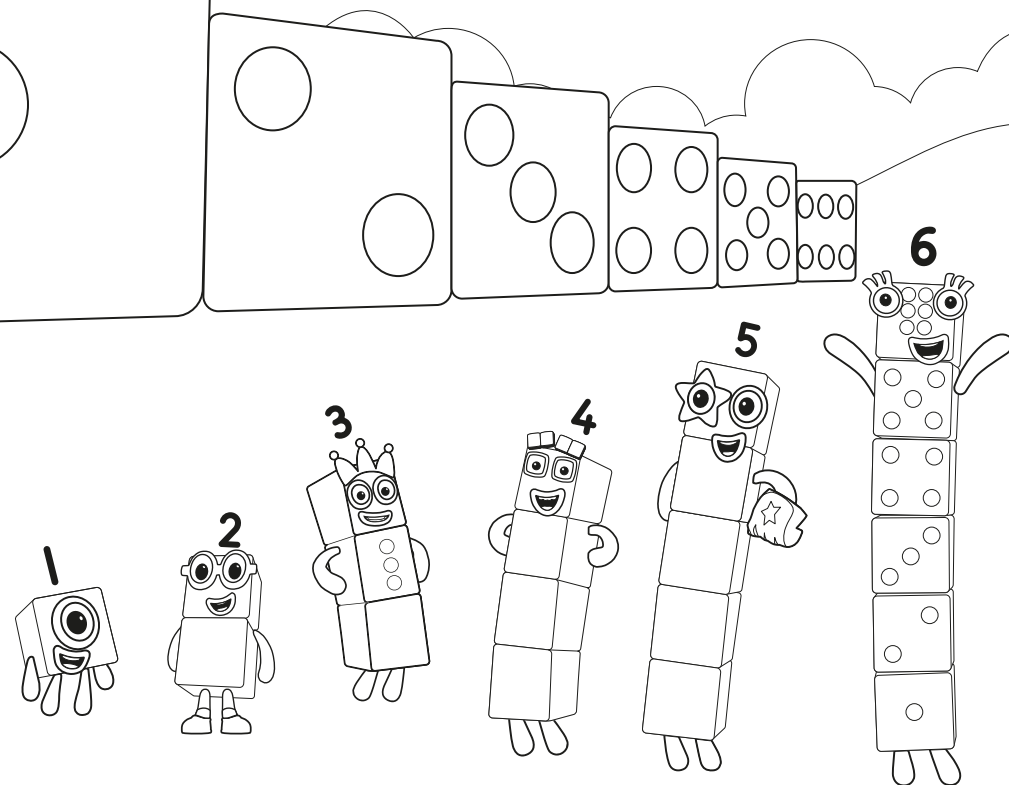

Go Go Domino

This number quest belongs to...

Get ready for a Pattern Palace game!
But first, colour in the friends.

Print pages 1 and 2 double-sided and fold in half to make a booklet
