

A photograph of three men sitting in a lush garden filled with various plants and vegetables. They are wearing hats and casual clothing, and are holding and examining small red tomatoes. The garden is filled with green leafy vegetables and other plants. In the top right corner, the Plantergo logo is displayed in a white hexagonal frame.

PLANTERGO

# THE TRUE SELF-WATERING PLANTER SYSTEM

GO FARM ANYWHERE

## Easy Assembling

### Fence

The Fence can be quickly assembled with a few screws and bolts and stacked up to 3 decks for deeper soil.

### Wicking Board

The Wicking Board enables self-irrigation through capillary action with 8 wicking chambers connected to the Reservoir. Wicking chambers also provide water drainage to the Reservoir.

### Reservoir

The Reservoir is made with a single sheet of ABS plastic to prevent water leakage and enhance durability. The Reservoir can hold up enough water to provide constant water supply.

## PlanterGo Mimics Nature

### Sub-irrigation & Self-watering

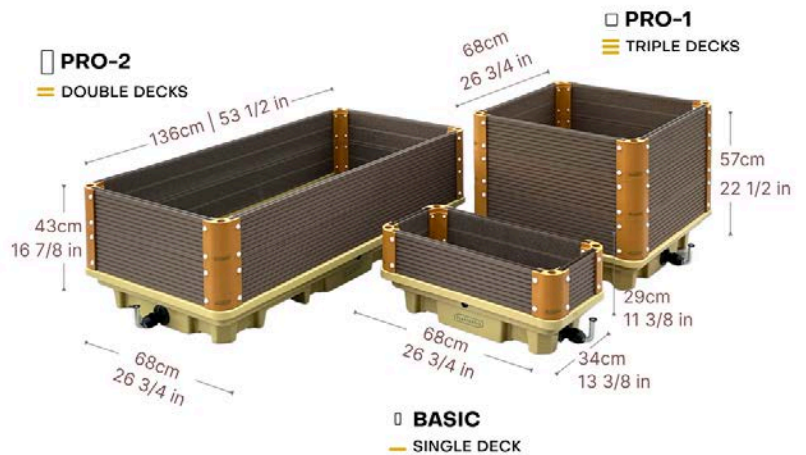

Water is wicked up from the planter's Reservoir to provide a continuous and optimal amount of moisture for the soil.

## Easily Movable by Forklift

## 3 Models with Different Soil Depth

## Water Indicator

Every planter comes with an individual water indicator. Whenever you see water inside the tube, water is enough.

### BASIC

Single Deck  
Double Deck  
Triple Deck

### PRO-1

Single Deck  
Double Deck  
Triple Deck

### PRO-2

Single Deck  
Double Deck  
Triple Deck

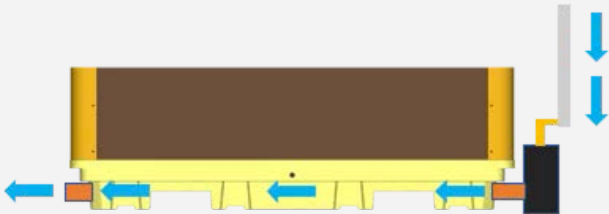

All Planters are **Connectable** to any irrigation and gardening hoses system

# Optional Accessories

## No more manual watering!

### Auto Refill Valve (ARV)

Auto Refill Value (ARV) is connected to the water supply to feed water into the planter/s automatically. Automatically maintains optimal water levels, **completely eliminating the need for manual watering!**

When water level drops, ARV will open and release water in from the water source.

- L 12cm  
(4 ¾ in)
- W 8cm  
(3 ⅛ in)
- H 20cm  
(7 ⅞ in)

## Safeguards your crops!

### Greenhouse

The greenhouse **safeguards your crops** from insects, birds, and adverse weather conditions such as rain, snow, and hail.

Water proof rooftop against rain, hail and snow

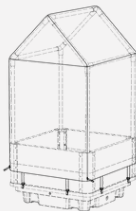

Insect netting against Insect and bird

Air Flow through Greenhouse

Strap fasten Greenhouse to the planter

#### PRO-1 Greenhouse

- L 68cm  
(26 ¾ in)
- W 68cm  
(26 ¾ in)
- H 120cm  
(47 ¼ in)

#### PRO-2 Greenhouse

- L 136cm  
(53 ½ in)
- W 68cm  
(26 ¾ in)
- H 120cm  
(47 ¼ in)

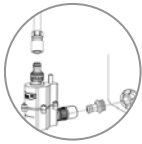

# Connect Modules Anyway You Want!

 Water Indicator

 Water tap & Speed Connector

 Auto Refill Valve (optional)

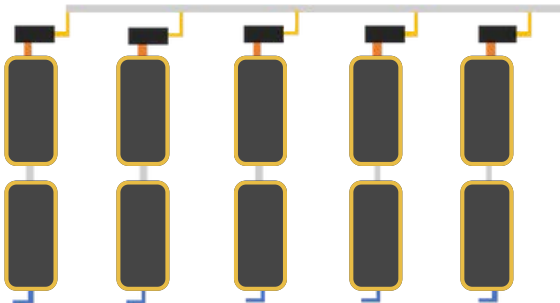

### Single Connection

### Serial Connection

### Parallel Connection

# Product List

## BASIC MODEL

L 68cm | 26 ¾ in  
W 34cm | 13 ⅝ in

	Height (cm   in)	Weight (kg   lb)	Soil Capacity (L   Gal)	Water Capacity (L   Gal)
Single Deck	29   11 ⅜	8   17.6	30   7.9	20   5.3
Double Deck	43   16 ⅞	13   28.7	50   13.2	20   5.3
Triple Deck	57   22 ½	18   39.7	70   18.5	20   5.3
