

DETECTABLE PRODUCTS

MAGNETHANE | XRAYTHANE

BELTSERVICE
CORPORATION

Ensure Your Product's Reliability!

Food processing plants are increasingly concerned about food safety and are being asked to utilize detectable products.

The flexibility of our detectable products can match your customers' unique requirements. We have the largest selection of FDA/USDA compliant detectable belts available in the marketplace and we offer the next generation of "safety net" products for progressive food manufacturers and packagers.

Detectable belting and products are designed for applications, where if any part of the belt should chip, abrade or separate in the product being conveyed, a properly calibrated metal detector will register.

Extruded: Flat 85A & 95A, Positive Drive, Round and Vee profiles
Fabric Based: 1 Ply - 103MD, 2 Ply - 108MD

BENEFITS

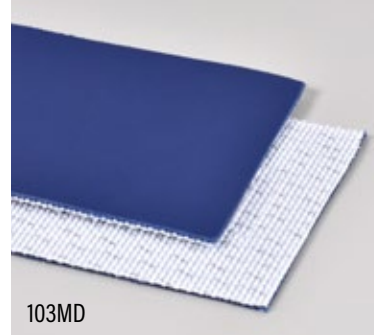

- Minimizes product recalls
- Clean, smooth, hot-welded
