

RISK TD1 Walk Through Metal Detector

WESTMINSTER
GROUP PLC

Product Code: 1070-34

Key Features

33 Independent Detection Zones

7" LCD Touchscreen Display

Conforms to NIJ0601.02 standards

IP54 Rated

UKCA Certified

2 Year Warranty

Overview

The TD1 Walk Through Metal Detector is a highly sensitive and very reliable targeted detection system. Designed to be installed at a fixed-position on site, with minimal interference to be installed at a multitude of different locations.

This advanced Walk Through Metal Detector features targeted technology that shows the location of metal objection on the body. This is displayed on a 7" LCD touchscreen located on the rear of the unit. When connected to a PC or laptop, the same data can be viewed remotely. This is in addition to the LED Strip along the sides which will also indicate where a detection has occurred.

The TD1 has been tested to the standards of NIJ0601.02, however it is not certified.

Features

- Able to detect mobile phones, vapes and knives.
- Audio and vibration alerts can be altered to be silent and visual only.
- 255 adjustable sensitivity levels.
- 100 selectable frequency bands.
- Robust rugged design.
