

# HSS Falcon Security Scanner

Body Scanners

Product Code: 1090-26

WESTMINSTER  
GROUP PLC

## Key Features

Real-time detection of concealed items

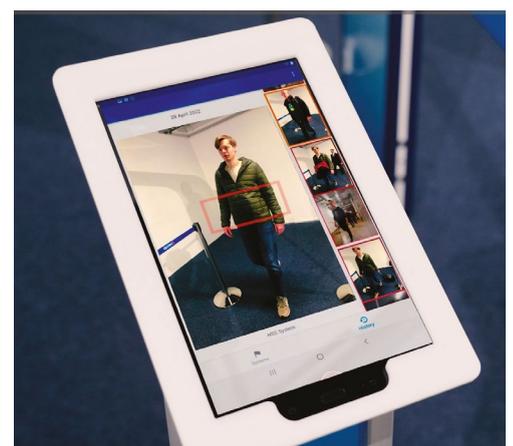

Automatic alerts for swift response

High mobility and rapid deployment

Low-power millimetre wave technology

## Overview

**The HSS Falcon Security Scanner is a cutting-edge solution designed to detect concealed items such as explosives, weapons & narcotics.**

This innovative system automatically screens individuals in real-time, seamlessly integrating into operational environments. Its high mobility and rapid deployment capabilities make it adaptable to indoor and outdoor settings.

Utilizing low-power millimetre waves and advanced algorithms, the HSS Falcon Security Scanner offers a seamless screening process, enhancing operational effectiveness.

HSS Falcon provides real-time alerts upon detection of concealed items, enabling swift responses without disrupting workflow.

The technology is cost-effective and simple to operate.

## Specifications

- Width 134 cm
- Height 239 cm
- Depth 62cm
- Free passage 120 cm
- Weight 130kg (2pillars)

### Installation

- Minimum space needed: 150cm W 180cm D and 300cm H
- Power: 200W /220 V / 50 Hz
- Work in temperatures: -10°C to +55°C
- Humidity conditions: 5-90% non-condensing

## Highlights

**Placement** | Indoor & Outdoor

**Throughput** | 2500 people/hour

**Detection** | Explosives, weapons and narcotics

**Screening** | People and their hand-carried or body worn bags

**Setup** | Mobile

**Installation** | Quick

## Setup
