GitGuardian

Take Control Of Your Secrets Security

NO 1 GITHUB SECURITY APP
TRUSTED BY 500K+ DEVELOPERS

Discover all your secrets. Prioritize and remediate leaks at scale.
Protect your non-human identities and reduce breach exposure.

AVAILABLE ON SAAS OR SELF HOSTED

Secrets Detection

Find and fix hardcoded secrets across your entire software development lifecycle. (Git, CI/CD, Jira, Slack, Confluence, Teams, etc.)

Public Monitoring

Monitor shadow developer activity and secure your external attack surface on public GitHub.com and Postman collections.

Honeytoken

Create and deploy decoy secrets at scale to detect intrusion in your developer environments (SCM, CI/CD, K8s...).

TRUSTED BY SECURITY LEADERS AT THE WORLD'S LARGEST COMPANIES

Acquia · bouygues TELECOM · orange · PayFit · DATADOG · ING · talend · B/S/H/ · iress · MIRANTIS · snowflake · BASF We create chemistry · Maven Wave · Webflow

What makes GitGuardian different?

✓ **Data-driven approach**
We believe application security is a data problem. Our detection engine offers unmatched value by training on actual data from the extensive code on GitHub.

✓ **Remediation at scale**
Leverage machine learning to eliminate false positives, prioritize high-impact issues with rich context and severity scoring, and automate resolution. We pinpoint files for code fixing and you can track progress via pull requests, leading to faster remediation and more fixed incidents.

✓ **Addressing both security and developers**
Built for both developers and security. Our battle-tested shared responsibility model has achieved over 90% incident closing rate and 50% shift-left adoption.

✓ **Enterprise readiness**
Deployed by enterprise leaders like Snowflake and ING etc., GitGuardian ensures resilience in complex environments, focusing on multi-domain, enterprise-grade security.

"We have been able to significantly reduce our number of exposed secrets. Within three to six months, we were able to investigate and revoke around 70 to 75% of existing exposed secrets."

Brian Hamill
Senior Application Security Engineer at **Bazaarvoice**
