Publications List – Geothermal: The Next Generation research program (2019-2025)

Journal Papers

Solms, T., et al. (2026). The potential for supercritical geothermal resources in the Taupō Volcanic Zone. *Journal of Volcanology and Geothermal Research,* 479. https://doi.org/10.1016/j.jvolgeores.2026.108687

Simpson, M., et al. (2026). The Rotokawa geothermal system, New Zealand: Hydrothermal minerals and punctuated evolution. *Journal of Volcanology and Geothermal Research,* 477. https://doi.org/10.1016/j.jvolgeores.2026.108665

Kirkby, A & Massiot, C. (2026) Direction-dependent permeability and resistivity of fractured rocks tuned to New Zealand geothermal reservoirs. *Geothermics,* 136. https://doi.org/10.1016/j.geothermics.2026.103620

Bannister, S., et al. (2025). Multi-scale controls on veining in New Zealand greywacke basement rocks: implications for geothermal fluid circulation. *New Zealand Journal of Geology and Geophysics,* 78(3), 399-420. https://doi.org/10.1080/00288306.2025.2488416

Massiot, C., et al. (2025). Multi-scale controls on veining in New Zealand greywacke basement rocks: implications for geothermal fluid circulation. *New Zealand Journal of Geology and Geophysics*, 68(3), 399-420. https://doi.org/10.1080/00288306.2025.2488416

Kirkby, A., et al. (2025). Heat flow in an active plate margin: New Zealand's crustal thermal regime from borehole temperatures and numerical modelling. *Tectonophysics*. 899. https://doi.org/10.1016/j.tecto.2025.230638

Rendel, P., et al. (2024). Solubility of anhydrite in supercritical water from 380˚C to 625˚C and 220 bar to 270 bar. *Geochimica et Cosmochimica Acta,* 406, 82-89. https://doi.org/10.1016/j.gca.2024.09.030

Altar, D., et al. (2024). Natural state geothermal reservoir modelling: Mineralogical and geochemical evolution perspective. *Geothermics,* 123. https://doi.org/10.1016/j.geothermics.2024.103132

Kissling, W., et al. (2024). A source-to-surface model of heat and fluid transport in the Taupō Rift, New Zealand. *Journal of Volcanology and Geothermal Research,* 446. https://doi.org/10.1016/j.jvolgeores.2023.107995

Miller, C., et al. (2023). The Thermal Structure of Central Te Riu a Māui / Zealandia Continent as Determined From the Depth to Base of Magnetic Sources. *JGR Solid Earth,* 128(12). http://doi.org/10.1029/2023JB027557

Kissling, W., & Marriot, C. (2023). Modelling of flow through naturally fractured geothermal reservoirs, Taupō Volcanic Zone, NZ. *Geothermal Energy*, 11, 20. https://doi.org/10.1186/s40517-023-00262-6

Rooyakkers, S., et al. (2023). Using oxygen isotopes to track movement of water through the crust in geothermal systems. *Geochimica et Cosmochimica Acta,* 355, 195-209. https://doi.org/10.1016/j.gca.2023.07.004

Mortimer, N., et al. (2023). Crustal basement terranes under the Taupō Volcanic Zone, New Zealand: Context for hydrothermal and magmatic processes. *Journal of Volcanology and Geothermal Research*, 440. https://doi.org/10.1016/j.jvolgeores.2023.107855

Altar, D., et al. (2023). Reactive transport modelling under supercritical conditions. *Geothermics*, 111. https://doi.org/10.1016/j.geothermics.2023.102725

Rendel, P., & Mountain, B. (2023). Solubility of quartz in supercritical water from 375°C to 600°C and 200–270 bar. *The Journal of Supercritical Fluids,* 196. https://doi.org/10.1016/j.supflu.2023.105883

Chamberfort, I., & Dilles, J. (2023). Chemical vectoring in continental geothermal systems: composition of altered rocks and illite as guides to magmatic degassing. *Geothermics,* 110. https://doi.org/10.1016/j.geothermics.2023.102682

Rooyakkers, S., et al . (2022). Tracking Magma-Crust-Fluid Interactions at High Temporal Resolution: Oxygen Isotopes in Young Silicic Magmas of the Taupō Volcanic Zone. *Geochemistry, Geophysics, Geosystems,* 24(1). https://doi.org/10.1029/2022GC010694

Altar, D., et al. (2022). Numerical geochemical modelling of basalt-water interaction under subcritical conditions. *Geothermics,* 105. https://doi.org/10.1016/j.geothermics.2022.102520

Sharpe, M., et al. (2022). A sulfur and halogen budget for the large magmatic system beneath Taupō volcano. *Contributions to Mineralogy and Petrology,* 177, 95. https://doi.org/10.1007/s00410-022-01959-w

Rooyakkers, S., et al. (2021). Eruption risks from covert silicic magma bodies. *Geology,* 49(8), 921-925. https://doi.org/10.1130/G48697.1

Jolie, E., et al. (2021). Geological Controls on Geothermal Resources for Power Generation. *Nature Reviews Earth & Environment,* 2, 324-339. https://doi.org/10.1038/s43017-021-00154-y

Kamila, Z., et al. (2021). Reinjection in geothermal fields: An updated worldwide review 2020. *Geothermics,* 89. https://doi.org/10.1016/j.geothermics.2020.101970

Chamberfort, I., & Stefánsson, A. (2020). Fluids in Geothermal Systems. *Elements*, 16(6). https://doi.org/10.2138/gselements.16.6.407

Conference Papers

Kirkby, A. (2025). Linking fracture networks to geophysical observations through numerical modelling. *NZGW Conference, Auckland, New Zealand*. NZGW2025 – Kirkby, A. – permeability, resistivity, modelling

Siahaan, Y., et al. (2024). Reactive Transport Modelling of Fluid-NCG Reinjection in Ngā Tamariki Geothermal Field. *NZGW Conference, Auckland, New Zealand*. NZGW2024 Siahaan et al - NCG reinjection Nga Tamariki

Rajput, V., et al. (2024). Reactive Transport Modelling of NCG-Reinjection at Ngawha Geothermal Field. *NZGW Conference, Auckland, New Zealand*. NZGW2024 Rajput et al - NCG reinjection Ngawha

Barretto, J., et al. (2024). Refining geological models through 3D gravity modelling at Wairākei, Tauhara and Rotokawa geothermal fields. *NZGW Conference, Auckland, New Zealand*. NZGW2024 Barretto et all - refining geological models with 3d gravity modelling

Chambefort, I., et al. (2024). Geothermal The Next Generation: Five years of findings to propose a new exploration phase for New Zealand. *NZGW Conference, Auckland, New Zealand*. NZGW2024 Chambefort et al summary of exploration research GNG

Bromley, C., et al. (2024). Superhot Geothermal – A Net Zero window of opportunity for New Zealand? *NZGW Conference, Auckland, New Zealand*. NZGW2024 Bromley et al superhot geothermal

Mountain, B., et al. (2024). Expanding the Limits of Experimental Water-Rock Interaction: The Supercritical Laboratory at GNS Science. *NZGW Conference, Auckland, New Zealand*. NZGW2024 Mountain et al supercritical lab

Kissick, D., et al. (2024). Unlocking our potential: a superhot geothermal future for Aotearoa New Zealand. *NZGW Conference, Auckland, New Zealand*. NZGW2024 Kissick et al unlocking our potential

Lynne, B., et al. (2024). Characterisation of Core from a New Zealand Geothermal Field and its Potential Reaction to Receiving CO2-rich Injection Fluids. *Geothermal Reservoir Engineering, California, USA*. GRC2024 Lynne et al - rock characterisation for injection

Chambefort, I., et al. (2024). The Superhot Opportunity for New Zealand- Joining the Ends Together. *Geothermal Reservoir Engineering, California, USA*. GRC2024 Chambefort et al superhot opportunity for NZ

Blair, A., et al. (2024). The Waiwhatu Project: Developing Shared Language (English-Te Reo Māori) for Communicating Geothermal Scientific Terms. *Geothermal Reservoir Engineering, California, USA*. GRC2024 Blair et al Waiwhatu project

Milicich, S., et al. (2024). Fracture Permeability in Basement Greywacke for Supercritical Geothermal Drilling Planning. *Geothermal Reservoir Engineering, California, USA*. GRC2024 Milicich et al fracture permeability

Siahaan, Y., et al. (2024). Modelling Non-Condensable Gas Reinjection Geochemical Dynamics in Geothermal Fields: A Case Study of Ngā Tamariki, New Zealand. *Indonesia International Geothermal Convention & Exhibition, Jakarta, Indonesia*. IIGCE 2024 Siahaan et al NCG reinjection - Nga Tamariki

Altar, D., et al. (2024). Structural and Dissolution Trapping of Carbon in Geothermal Reservoirs: A Numerical Assessment. *Geothermal Reservoir Engineering, California, USA*. Altar et al 2024 - Stanford Workshop - Trapping Carbon

Kissling, W. & Ellis, S. (2023). Long Term Production in TVZ Geothermal Systems using a 2D Source to Surface Model. *NZGW Conference, Auckland, New Zealand*. NZGW 2023 Kissling & Ellis 2D model

Kaya, E. & Lynne, B. (2023). Reversing Carbon Emissions in the Geothermal Energy Industry Project: A Geoscience Perspective. *NZGW Conference, Auckland, New Zealand*. NZGW 2023 Kaya & Lynne reversing carbon emissions

Altar, D., et al. (2023). Understanding Mineralogical and Geochemical Evolution in Geothermal Reservoirs through Reactive Transport Modelling. *NZGW Conference, Auckland, New Zealand*. NZGW 2023 Altar et al reactive transport modelling

Rivera, J. & Burnell, J. (2023). Supercritical Well Performance Simulation using GFlow Wellbore Simulator: A Case Study of Ultra-hot IDDP Wells in Iceland+. *NZGW Conference, Auckland, New Zealand*. NZGW2023 Rivera & Burnell - Wellbore Simulator

Milicich, S., et al. (2023). Fracture permeability in basement greywacke for supercritical drilling planning. *NZGW Conference, Auckland, New Zealand*. NZGW2023 Milicich et al - Fracture characterisation

Rivera, J. (2023). Comparison of Icelandic Supercritical Well Forecasts with Subcritical Geothermal Production Well Outputs. *NZGW Conference, Auckland, New Zealand*. NZGW2023 Rivera - Production Comparison

J. Rivera., et al. (2023). Characterisation of Supercritical Fluid Production in Taupo Volcanic Zone (TVZ) through Wellbore Modelling and Simulation. *Geothermal Rising Conference, Nevada, USA*. GRC 2023 paper - wellbore modelling

Chamberfort, I. (2023). Geothermal: The Next Generation - Exploring New Zealand future supercritical resources. *Geothermal Rising Conference, Nevada, USA*. GRC2023 GNG Overview & update

Climo, M., et al. (2023). Stakeholder Engagement: A Supercritical Geothermal Example. *World Geothermal Congress, Beijing, China*. WGC2023 Paper 255: Communication & Engagement

Carey, B. & Chambefort, I. (2023) What is the end use for ultra-hot geothermal energy in Aotearoa New Zealand? *World Geothermal Congress, Beijing, China*. WGC2023 paper 208 - end use for supercritical geothermal

Kissick, D., et al. (2023). Planning Preparation for Six Kilometre Deep Geothermal Wells in the Taupō Volcanic Zone, New Zealand. *World Geothermal Congress, Beijing, China*. WGC2023 paper 258 - consenting supercritical wells

Carey, B., et al. (2023). A Supercritical Geothermal Inventory for New Zealand? *World Geothermal Congress, Beijing, China*. WGC2023 paper 604 - supercritical inventory

Chambefort, I., et al. (2023). Geothermal: The Next Generation - Advancing the Understanding of New Zealand's Supercritical Resources. *World Geothermal Congress, Beijing, China*. WGC2023 paper 1038 GNG overview

Bromley, C. & Carey, B. (2023). Ultra Hot - Supercritical Geothermal - IEA Geothermal Collaboration. *World Geothermal Congress, Beijing, China*. WGC2023, paper 333 - IEA-GIA ultra hot projects

Rendel, P. & Mountain. (2023). The Solubility of Quartz in Supercritical Water from 375 to 600˚C and 200 to 270 bar. *Water-Rock Interaction conference, Sendai, Japan*. Abstract 2023 - Quartz Solubility (Rendel & Mountain)

Rendel, P. & Mountain. (2023). Experimental Results of Supercritical Fluid-Rock Interactions Geothermal: The Next Generation. *Water-Rock Interaction conference, Sendai, Japan*. Abstract 2023 - supercritical fluid-rock interactions (Rendel & Mountain)

Altar, D. et al. (2022). Insights from reactive transport models of basalt and water experiments. *NZGW conference, Auckland, New Zealand*. NZGW 2022 Altar et al, basalt-water interactions

Kaya, E. & Zarrouk, S. (2022). Reversing Carbon Emissions in Geothermal Energy Production: Te Ara Whakamua. *NZGW conference, Auckland, New Zealand*. NZGW 2022 Kaya& Zarrouck - Reversing carbon emissions in geothermal energy production

Chambefort, I., et al. (2022). Geothermal: The Next Generation, Advancing the Understanding of New Zealand's Supercritical Resources – Programme Update. *NZGW conference, Auckland, New Zealand*. NZGW 2022 GNG Update (Chambefort et al)

Climo, M. et al. (2022). Commercial Arrangements Underpinning Aotearoa New Zealand's Industrial Scale Geothermal Operations. *NZGW conference, Auckland, New Zealand*. NZGW2022 Paper - Commercial Arrangments

Rendel, P., et al. (2022). Experimental Studies of Supercritical Fluid-Rock Interactions. *NZGW conference, Auckland, New Zealand*. NZGW Paper: Experimental studies of supercritical fluid-rock interaction

Carey, B., et al (2021). Moving Forward to Exploration Drilling. *NZ Geothermal Workshop, New Zealand*. NZGW Paper: Moving forward to exploration drilling

Climo, M., et al. (2021). Advancing New Zealand's Supercritical Geothermal Opportunity. *Proceedings of the World Geothermal Congress 2020+1, Reykjavík, Iceland*. WGC 2021 GNG & NZ's Supercritical Opportunity

Climo, M., et al. (2020). New Zealand's Supercritical Opportunity: moving from Potential Resource to Deployed Technology. *New Zealand Geothermal Workshop, Northland, New Zealand*. NZGW2020 GNG Strategy Opportunity Paper

Kissick, D., et al. (2020). New Zealand's Regulatory and Planning Framework for Conventional Geothermal Resource Use. *New Zealand Geothermal Workshop, Northland, New Zealand*. Kissick et al Paper - review of planning framework NZGW2020

Climo, M., et al. (2020). Developing a Strategy to Accelerate Utilisation of NZ's Supercritical Resources. *Geothermal Rising Conference, online*. GNG Supercritical Strategy GRC Transactions 2020

Pauline, R. & Kaya, E. (2019). Modelling Geothermal Power Generation from the Waiotapu - Waikite - Reporoa Geothermal Fields. *NZ Geothermal Workshop, Auckland, New Zealand*. NZGW2019 Pauline & Kaya

Chambefort, I., et al. (2019). Geothermal: The Next Generation. *NZ Geothermal Workshop, Auckland, New Zealand*. 2019 Chambefort NZGW GNG Paper
