

Patient initials / ID:

Date:

Medical diagnosis (for context only):

1. Assessment

- **Subjective data:** *(what the patient tells you, in their own words)*
- **Objective data:** *(what you measure or observe: vitals, labs, physical findings)*

2. Nursing Diagnosis

- (NANDA-I problem) related to (cause/etiology) as evidenced by (signs and symptoms from your assessment)

3. Goals / Expected Outcomes

- **Short-term goal:** *(SMART: specific, measurable, achievable, relevant, time-bound)*
- **Long-term goal:** *(SMART)*

4. Interventions

- **Independent:** *(action on your own nursing authority)*
- **Dependent:** *(action requiring a provider order)*
- **Collaborative:** *(action involving the wider team)*

5. Rationale

- Why each intervention works, with a citation to a textbook, guideline, or protocol
