## Why home education might be the best choice for your child

**Every child is unique. With home education, you can tailor learning to suit your child's individual needs.**

Children can study at their own pace, anytime, anywhere.

Children can spend more time on difficult subjects.

Children can follow a flexible study schedule.

Children can continue their schooling at home in a safe and nurturing learning environment.

Parents can instil personal beliefs, values and ethics in their children.

“

*“Thank you Impaq for all that you do. My daughter has been with Impaq since Grade 9, and she is now in Grade 12. Your assistance with keeping us updated and the much-needed online classes from your dedicated team is very much appreciated.”*

**Kerry Seagreen, Impaq parent**

“

*“The Impaq lesson materials are amazing and make it interesting for a learner to want to continue learning.”*

**Koketso Matlala, Impaq parent**

## What do we offer?

Downloadable assessments and support services.

Lesson material (printed books, e-books, videos, and more).

Facilitator's guides – the cornerstone for the home education parent (printed books and e-books available).

Selected online classes every weekday for additional support.

An online portal to capture marks, generate reports, and monitor your child's progress.

Additional guidance and support through the Optimi Learning Portal – available in selected subjects for Gr 8 – 12.

## Why Impaq?

- Impaq is the largest home education curriculum provider in South Africa.
- More than 24 000 learners made use of Impaq's lesson material in 2020.
- We have over 19 years' experience in home education.
- More than 1 500 independent tutors made use of our products and services in 2020.
- We provide CAPS-aligned products and services, available in English and Afrikaans, to facilitate learning for Grade R to 12 learners successfully.
- At the end of Grade 12, Impaq learners receive a National Senior Certificate (NSC).
- We are registered with SACAI, the assessment body for distance education.
- We are continuously developing products and services to enhance learning.

More than  
**24 000 learners**  
made use of Impaq's  
lesson material in  
2020.

## Our academic model and curriculum

The curriculum is based on a distance-learning model.

Impaq's products and services support parents in becoming their child's primary educator.

The learner applies self-learning and can study at their own pace. Learners can choose to spend more time on difficult subjects and less time on subjects they find easy to understand.

Impaq's lesson material is aligned with the national curriculum (CAPS).

Impaq registers learners in Grades 10 to 12 with SACAI, the assessment body for distance learning in South Africa.

At the end of Grade 12, Impaq learners may qualify to obtain the National Senior Certificate (NSC).

Learners can easily integrate back into school if required.

//

*"For those in doubt, find reassurance in my belief that Impaq provides not only primary and secondary education but a necessary stepping stone toward a fruitful tertiary education and/or career."*

**Dené Janse van Rensburg, former Impaq learner**

## Legal requirements

Homeschooling is a legally recognised alternative to formal education in South Africa. Please take note of the following important aspects outlined in the Home Education Policy:

### Policy requirement

- Parents should register their children for home education with their Provincial Education Department (PED).
- Parents need to compile a portfolio of evidence (containing the activities and assessments) for every child.
- Parents must provide the PED with feedback on the learner's progress. Progress must be assessed by qualified teachers registered with the South African Council of Educators (SACE).
- Parents can follow any curriculum that meets the minimum outcomes as set out in the national curriculum.
- Parents are responsible for the education of their children. Tutorial or other educational support may be enlisted as needed.
- Learners in the FET Phase (Grades 10 to 12) must be registered with an assessment body.

### What Impaq offers

- Impaq assists with information about the necessary steps to follow to register with the PED.
- Our offering includes portfolio activities that assist parents in building a portfolio of evidence for their child.
- Impaq provides parents with progress reports, which can be provided to the PED at the end of every phase.
- We make use of qualified teachers (as per the policy requirements) to develop all our assessments. For quality purposes, assessments can also be sent to Impaq for marking.
- Registration with Impaq ensures that learners follow the national CAPS-aligned curriculum.
- Impaq equips parents with all the materials needed to be the primary educator. Supporting tutorial services are subject to the restrictions contained in the policy.
- Assessment bodies do not register independent candidates. FET learners, therefore, must register with a curriculum provider who is registered with an assessment body. Impaq is registered with SACAI, which ensures the credibility of the NSC.

To learn more about the legal aspects of educating your child at home, please contact our legal team by sending an email to [info@impaq.co.za](mailto:info@impaq.co.za). Alternatively, seek independent legal advice.

## Registration requirements

Go to our website ([www.impaq.co.za](http://www.impaq.co.za)) for an obligation-free quote or to register online.

### What do I need to register?

#### Grades R – 9

- Birth certificate/identity documents for the learner, parent, and account holder.
- A computer or laptop with internet access and a reliable email address.
- Upon registering, the parent confirms their child's readiness and compliance with the requirements of the previous grade\*.

\*See grade and registration information on the Impaq website.

#### Grades 10 – 12

- A valid copy of the learner's South African birth certificate/identity document or South African study permit.
- A computer or laptop with internet access and a reliable email address.
- A successful final report on the CAPS curriculum from the previous year.
- If a successful final report from the previous grade is not yet available (before January), the learner will only be accepted provisionally if a term two report card is submitted during registration.
- Subject requirements apply.

## Examination requirements

### Grade R

It is not compulsory for Grade R learners to complete any formal assessments.

### Grades 1 – 9

Parents will receive all the formal assessment components and memorandums required to assess their child at home. If parents do not want to mark the assessments themselves, they can:

- Ask a qualified teacher/tutor to assist.
- Send the assessments to Impaq and Impaq will mark the assessments for the parent. Parents, however, still need to assess their child's oral tasks as Impaq does not mark oral tasks in Grades 1 to 9.

### Grades 10 – 12

Learners must write the June and November examinations and Grade 12 preliminary examination under the supervision of an Impaq-approved invigilator. An Impaq-approved invigilator may include a commissioner of oaths or a teacher or tutor who has been pre-approved by Impaq. Learners write the Grade 12 final examination at a SACAI examination centre. Grade 10 to 12 learners must complete the orals in the language subjects and practical components of certain subjects under the supervision of an Impaq-approved assessor. It is the responsibility of the parent/guardian to nominate and pay for invigilators and assessors.

Refer to the FAQs available at [www.impaq.co.za](http://www.impaq.co.za) for more details.

## Additional resources

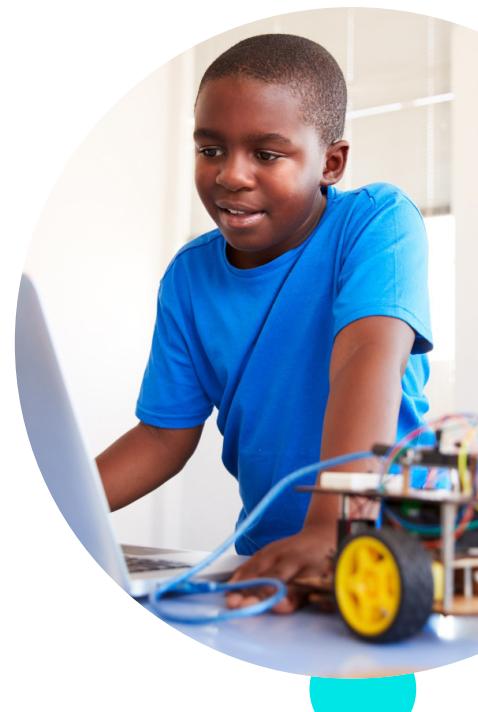

We also offer other resources to help you achieve home education success.

### Cami practice software

A collection of fun and interactive educational software programs that consists of Cami Web (available online) and Cami EduSuite (available offline). Cami Web includes unique programs for mathematics, mathematics for special needs, and perceptual skills. Cami EduSuite includes programs for mathematics, perceptual skills, reading, and literacy.

Cami's highly effective programs are CAPS-curriculum compliant and available in both English and Afrikaans.

To learn more, visit [www.cami.co.za](http://www.cami.co.za).

### Robotics

The perfect tool to introduce children to robotics, engineering, and programming. Children will be able to build their own robot and bring it to life. Robotics requires a once-off purchase and includes the full kit for the grades specified below. More than one child can use the materials.

- **Lego Robotics and Coding for Grades 1 – 5**
- **Resolute Robotics for Grades 7 – 12**

Join the Impaq family today and complete your learning journey at home.
