SECONDARY SCHOOL HIGHLIGHTS CATALOGUE

Volume 5

advancing
> learning

Dear Educator

We are thrilled to introduce the 5th edition of our Macmillan Education Secondary School Highlights catalogue tailored specifically for dedicated education professionals like you. This catalogue shines a spotlight on our most eagerly anticipated products, thoughtfully designed to meet the evolving needs of today's teaching and learning landscape. You will discover helpful features, articles, and invaluable teaching insights within the catalogue. These include practical teaching strategies and innovative ideas for connecting with today's enlightened learners.

What we have created extends far beyond a mere catalogue; it is a comprehensive and complimentary learning and teaching resource. We trust that you will derive as much satisfaction from utilising it as we derived from its creation. Collaborative efforts have gone into ensuring the development of something truly dynamic.

With gratitude for your dedication to education,

The Agency and Digital Sales Team

ECO-FRIENDLY CLASSROOM PRACTICES

Teaching Sustainability and Environmental Responsibility

Teaching sustainability and environmental responsibility is crucial in an era where our planet's health is threatened. Teachers can promote environmental awareness and responsibility, highlighting the interconnectedness of ecological, social and economic systems.

Encouraging Sustainable Practices

- ✓ Reduce, reuse and recycle waste
- ✓ Conserve energy and water
- ✓ Support renewable energy sources
- ✓ Protect and preserve biodiversity

How to Achieve This?

1. Cultivate Environmental Awareness and Responsibility

Hands-on Experiences: Combine theoretical discussions with practical activities. For example, after learning about pollution's impact, organise a cleanup event in a polluted area and start a school recycling programme.

Use Technology: Incorporate virtual reality to simulate climate change effects and use online games to teach resource management.

Outdoor Learning: Provide direct encounters with ecosystems through outdoor activities. Collaborate with environmental organisations for educational programmes.

Currently the average person eats 70,000 microplastics each year!

2. Embed Sustainability Across the Curriculum

Environmental education integrated into all subjects/all disciplines

Reduce

Reuse

Recycle

Replace

Restore

Clarify Concepts:

- ✓ **Reduce:** Cut down on plastic use, avoid single-use items, and choose products with minimal packaging.
- ✓ **Reuse:** Repurpose items like carrier bags, bottles and containers. Support refill stations in stores.
- ✓ **Recycle:** Promote recycling programmes and initiatives like exchanging plastic bottles for credit on transport.
- ✓ **Replace:** Use alternative materials such as cork, coconut, bamboo, corn (PLA) and cow dung.
- ✓ **Restore:** Manage plastic waste through cleanup initiatives and innovative technologies.

Integrate Environmental Themes: Incorporate sustainability into core subjects to show its relevance across all disciplines. For example, study deforestation in social sciences and life science, and write reports in language classes.

Adopt Project-Based Learning: Engage learners in real environmental issues, promoting critical thinking and problem-solving skills.

Promote Environmental Ethics: Teach learners the importance of protecting the planet and emphasise moral responsibility towards the planet.

Cultural Relevance: Highlight diverse community experiences, incorporate indigenous knowledge, and promote collaboration. For example, study herbal medicine and invite a natural healer to speak to learners.

Goals of Eco-Friendly Classrooms

Create Stewards of the Environment:

Equip learners to make responsible decisions for long-term sustainability and become advocates for environmental protection.

Teachers can consult the following sources to assist with updated information relevant to South Africa's environmental challenges:

- Department of Environmental Affairs: What is affecting our environment?
Available: https://www.dffe.gov.za/sites/default/files/reports/environmentoutlook_chapter3.pdf
- Kate Griffin in Green Economy Journal (2022) Most concerning environmental issues in South Africa
Available: <https://greenconomyjournal.com/explainer/most-concerning-environmental-issues-in-south-africa/>

ENGLISH

Cambridge Checkpoint Lower Secondary English

Learner's Books:

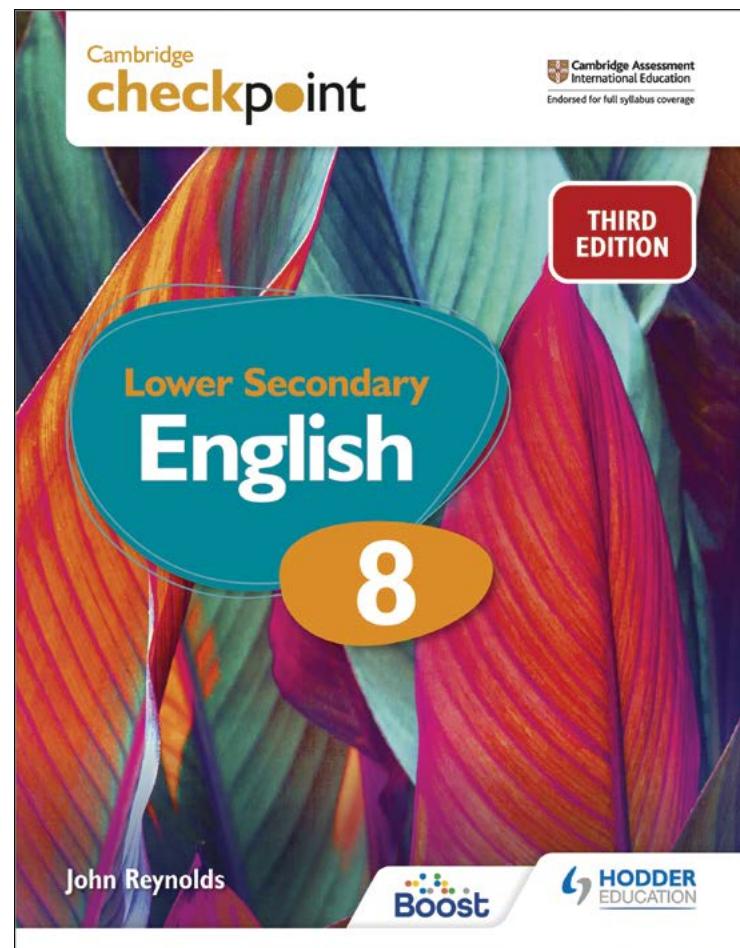

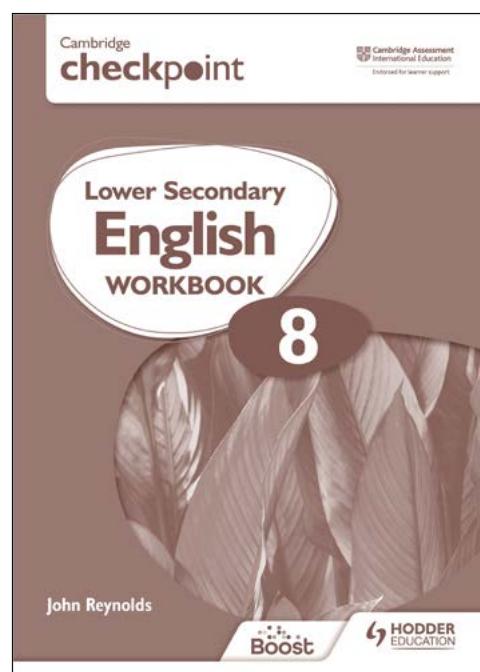

- **Boost confidence and understanding:** Questions within the chapters will help consolidate learning.
- **Develop key concepts and skills:** Information on the key skills such as grammar, punctuation, parts of speech and their functions, vocabulary and spelling is provided with linked exercises to practice.
- **Engage learners and extend understanding:** Cultivate a love of reading with diverse and wide-ranging texts to inspire learners on their reading journey, with carefully chosen discussion and reflection points for each topic.

Workbooks: Build confidence ahead of assessment with write-in activities that help gauge level of understanding and highlight any gaps.

Teacher's Guides with Boost Subscription

Guides include:

- Teacher's notes
- Activities
- Worksheets
- Audio
- Flashcards
- Knowledge tests
- Answers.

Study and Revise for AS/A Levels: Othello

This Study and Revise guide:

- increases learners' knowledge of Othello as they progress through the detailed commentary and contextual information written by experienced teachers and examiners
- develops an understanding of characterisation, themes, form, structure and language, equipping learners with a rich bank of textual examples to enhance their coursework and exam responses
- builds critical and analytical skills through challenging, thought-provoking questions and tasks that encourage learners to form their own personal responses to the text
- extends learning and prepares learners for higher-level study by introducing critical viewpoints, comparative references to other literary works and suggestions for independent research
- helps learners maximise their exam potential using clear explanations of the Assessment Objectives, sample learner answers and examiner insights
- improves learners' extended writing techniques through targeted advice on planning and structuring a successful essay.

Macmillan Communicative Shakespeare: Shakespeare's Othello

One of the most powerful dramas ever written for the stage, William Shakespeare's Othello is a story of revenge, illusion, passion, mistrust, jealousy and murder. If Iago Shakespeare created the most compelling villain in Western literature, in Othello and Desdemona, he gave us the most tragic and unforgettable lovers. Othello has been selected by the South African Department of Education for study in Grade 12, and this guide meets all the requirements of the department for the Grade 12 exams.

This edition of Othello offers the following features to help you understand and enjoy the play: a complete and authoritative Shakespearean text, clear directions for learners and teachers, systematic emphasis on the play as a blueprint for performance, and a background on the play's themes. Additionally, you'll find a biography of William Shakespeare, notes to help you analyse the play, creative ideas for individual and group work, a glossary of literary terms, and exam-style questions with suggested answers to help you prepare for your final exam.

Cambridge AS/A-Level English Literature Workbook: Othello

Containing over 150 ready-made activities for *Othello* – with comprehensive answers provided online – this write-in Workbook:

- actively develops knowledge and skills as learners practise questions that cover plot and structure, themes, characterisation, form and language, contexts and critical approaches
- ensures that every learner achieves real progress with activities that gradually build in difficulty, plus additional 'Challenge yourself' tasks to target the top grades
- helps learners make the transition from GCSE to AS/A-level, with guidance from experienced examiners and teachers on higher-level skills, such as analysing structure and using literary terminology
- focuses on exam skills with a separate section that includes practice essay questions and advice on: question types; essay planning; writing about extracts and whole texts; using evidence and context
- encourages independent learning as learners use their Workbook at home or in class, throughout the course or for revision and exam preparation
- supports the AQA A, AQA B, Edexcel and CCEA AS/A-level English Literature specifications through a wide range of activities suitable for every exam board.

Exercising English

The remastered editions of this popular language series are the ideal resources for learning and teaching English. These grade-specific titles offer a comprehensive range of English exercises, providing learners with ample practice in mastering the rules of the English language. An exciting new feature is the inclusion of online content, which offers additional theory and interactive activities to reinforce what has been studied. Each book covers all aspects of language learning, including key skills like visual literacy and summarising.

More information:

This series equips teachers with the tools they need to ensure learners not only practice and understand all key concepts but also actively engage with the content – and enjoy the process.

Illustrated First Aid in English

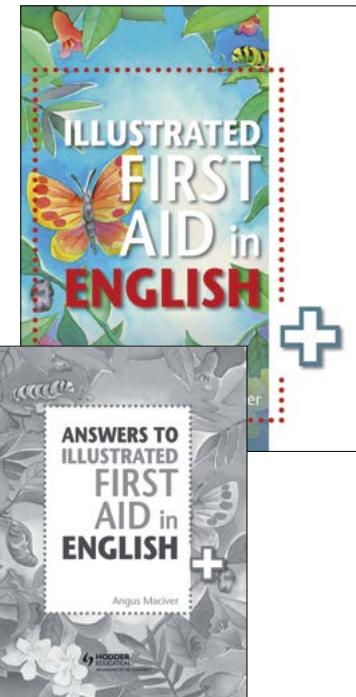

Used wherever the English Language is spoken or taught and now re-designed and beautifully illustrated to make it bright, appealing, attractive and motivating.

This illustrated edition retains the structure and approach of the original bestseller but has been produced to ensure that all the terms and information are up to date and reflect the international readership of the book. It is invaluable in class and as a reference book, both to native English speakers and to learners of English as an additional language.

- Covers vocabulary, spelling, syntax, idiom and correct usage
- Provides background information
- Includes a wide-range of exercises to test knowledge and skills

The **New Illustrated First Aid in English** is accompanied by an answer book which gives answers to all the exercises and tests.

To Kill a Mockingbird Resource Material

To Kill a Mockingbird depicts the racism of America's Deep South during the 1930s. Harper Lee's Pulitzer Prize-winning novel explores human nature and the oppression at the roots of this society, through the eyes of a young girl. This story of prejudice and intolerance, integrity and honour has become a classic of modern American fiction.

To Kill a Mockingbird has been selected by the Department of Education for study in Grade 12, and this guide meets all the requirements for the Grade 12 exams.

This guide contains the following innovative features:

- An introduction providing background on themes to enhance understanding and enjoyment of the novel
- A biography of Harper Lee, which provides information about her life and work
- There are notes on the novel providing background information, assistance with understanding and analysing the text, as well as creative ideas for individual, pair, group, and class work, portfolios, and further research
- A glossary, which provides definitions of difficult words and phrases to aid a better understanding of the novel
- Exam-style questions on the novel, so that learners can practice for their final exam; suggested answers are also provided so that they can check their progress and assess themselves.

Progress in Reading and Language Assessment

The **PiRA** tests enable schools to build a comprehensive profile of each learner's performance.

What diagnostic information will be gained for learners?

- Standardised scores immediately see whether the learner is above or below the national average for their year cohort.
- Age-standardised scores assess how the learner is doing against other learners of the same age (calculated in months for accuracy).
- Performance indicators compare each learner's score to performance within the standardisation sample and understand whether their attainment is above, below or within the national average.
- Reading ages get a quick measure of ability against the age at which the learner's performance is typical.
- Hodder Scale scores our independent scale – allows fine monitoring of progress and the prediction of future performance.

English class readers for Secondary Schools

English Home Language and First Additional Language readers to encourage reading in the English classroom.

More information:

Access Reading Test

Access Reading Tests helps compare learners aged 10–16 against their cohort at a school and national level, understand their reading skills and areas where they can improve, and provide targeted interventions throughout their education. They are available in online, interactive tests or print tests format.

Age range covered: Form 1 (Age 10–12); Form 2 (Age 12–14); Form 3 (Age 14–16)

Number of Tests: 3 sets of parallel forms (6 papers in total)

Ideal testing time: The assessment can be used at the beginning and the end of a period of interventions.

Content assessed: The New Access Reading Tests (ART) work alongside all major curricula and focus on reading ability and comprehension.

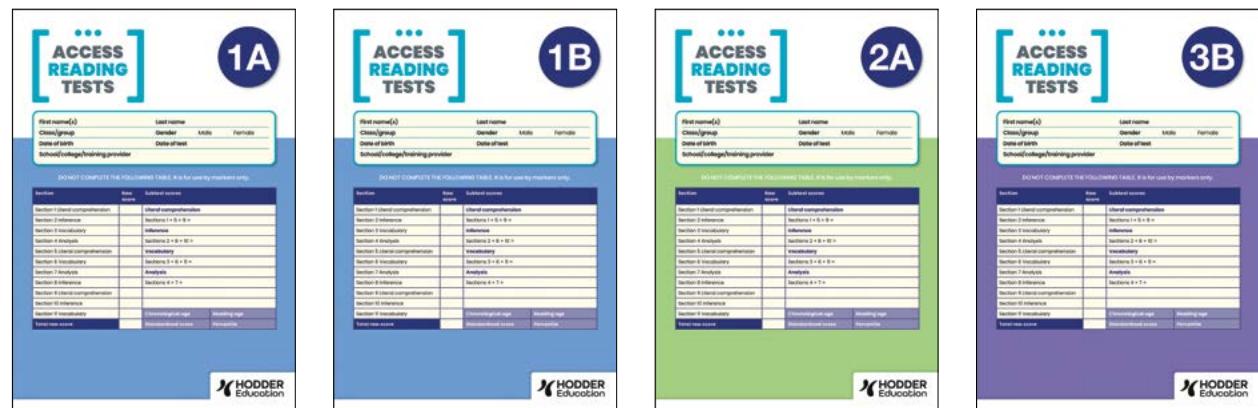

Access our value-added reporting tool

With Access Reading Tests, automatically get access to Boost Insights, our free online enhanced reporting tool that enables successful learning experiences.

- Bulk mark results.
- Analyse at the individual or group level.
- Download reports as a spreadsheet or pdf.
- Identify gaps in learning.

By accessing valuable data for interventions, you can track impact and create successful learning experiences for every learner.

If you want to learn more about Access Reading Tests, scan the QR code to view the brochure.

UNLOCKING LEARNER SUCCESS

Strategies for Effective Study Habits in the Classroom

One common misconception among learners is believing that 'learning' for a test or exam begins only when they sit down to revise. As teachers, it's crucial to convey to our learners that the learning process actually starts much earlier – right from the moment they encounter new information in the classroom. Effective study habits and skills are built continuously, and our role is to guide them in recognising and seizing these learning opportunities from the outset.

Studying starts in the classroom. Let your learners establish the following good habits in the classroom. They need to:

Listen	Listen with 100% attention
Notebook	Keep a notebook for each subject
Take notes	Take detailed notes – this will help them to remain focused
Ask	Ask questions if they do not understand something
Participate	Actively participate in discussions and activities
Group	Form a study group and work together
Write	Always write their homework in their planner/school diary

Effective studying doesn't end when the school day does; it continues at home. To help learners develop good study habits, encourage them to establish a consistent routine and create a conducive environment for learning. Alongside are some practical tips to share with your learners to help them make the most of their study time outside the classroom.

Studying continues at home. Teach your learners these tips.

They must:

- ✓ Have a set study routine every day
- ✓ Find a quiet study area where they will not be distracted
- ✓ Sit comfortably and in an upright position – not lying on a bed or couch
- ✓ Keep their study space clean and organised
- ✓ Review their notes from each class
- ✓ Make study cards of the important things they've learned in class
- ✓ Do all their homework every day
- ✓ Do the hard stuff first to get it done
- ✓ REVIEW, REVIEW, REVIEW their work regularly – this is the best way to make the knowledge stick.

Teach your learners effective study techniques that work

While there are many different ways learners may consolidate their learning, visualisation techniques that are commonly used are **mind mapping** and **summarising**.

Have a look at the free webinar 'Study skills for learners' that Macmillan Teacher Campus offers to learn how to draw a Mind Map in seven steps. Type this link into your browser or scan the QR code to view this free webinar. <https://www.gotostage.com/channel/teachercampus>.

Let your learners practise writing summaries – not only in the language classroom: they should practise in all their subjects.

Different learning styles

Learners have unique learning styles, and understanding these can help them study more effectively. By using techniques that suit their preferences, they can enhance their understanding and retention of information. Help your learners to identify their learning styles.

Visual (spatial) learners learn best by seeing

- ✓ Mind mapping
- ✓ Diagrams and charts

Reading/writing learners learn best by reading and writing

- ✓ Note-taking
- ✓ Summarising

Kinaesthetic (physical) learners learn best by moving and doing

- ✓ Encourage them to engage in experiments, build models, or use physical objects to represent abstract concepts.
- ✓ They can also benefit from studying while walking around, using gestures to reinforce concepts, or even acting out scenarios to better understand material.

Auditory (aural) learners learn best by hearing

- ✓ Listening to recordings
- ✓ Discussion and recitation

Compiling a study timetable

Creating a study timetable is crucial for learners as it helps them manage their time effectively, prioritise their tasks, and ensure they cover all subjects. A well-structured timetable not only prevents last-minute cramming but also allows for regular review.

There is no right or wrong way to compile a timetable to follow for studying. Here are a few worthwhile principles to keep in mind when they make their own timetables:

Format: Choose a format of a planner (e.g. a calendar, wall planner, or diary software such as Google calendar) with which to create a study timetable.

Plan: Plan backwards from the date of formal assessments and study weeks in order to see how many days (and therefore potential hours) there are between the date of scheduling and the formal assessment.

Commitments: Work out personal and other commitments that will take hours away from studying during this time (e.g. eating, social commitments, exercise time, other academic activities, sleeping time, etc.).

Block out: Block out time leading up to the formal assessment for studying specific subjects or topics.

Manage time: Use the 'wasted time' (time that would have been spent on watching TV or on social media apps like TikTok) for learning and reviewing schoolwork.

Teach your learners what to do a day before examinations and on the day they write. They need to:

- ✓ Only recap
- ✓ Prepare for the next day. Get all their stationery ready – 2 pens, pencil, ruler, calculator, watch or clock, tissues, lip balm
- ✓ Stop studying at 17:00 and relax. Go for a walk or watch TV
- ✓ Listen to music before they go to bed – this will help them to relax
- ✓ Get enough sleep.

The morning of the test/examinations

- ✓ Stretch when they wake up.
- ✓ Eat a good, healthy breakfast.
- ✓ Relax on their way to the exam. Listen to their favourite music.
- ✓ Arrive on time.
- ✓ Don't do any last-minute cramming! This creates stress and impairs their ability to think clearly.

As educators, our role extends beyond teaching content; we guide our learners in developing lifelong study habits and skills. By understanding their unique learning styles and encouraging effective study practices, we can help them reach their full potential. Let's empower our learners to take charge of their learning journey, both in and out of the classroom, so they can achieve academic success.

INTERNATIONAL ENGLISH (FAL)

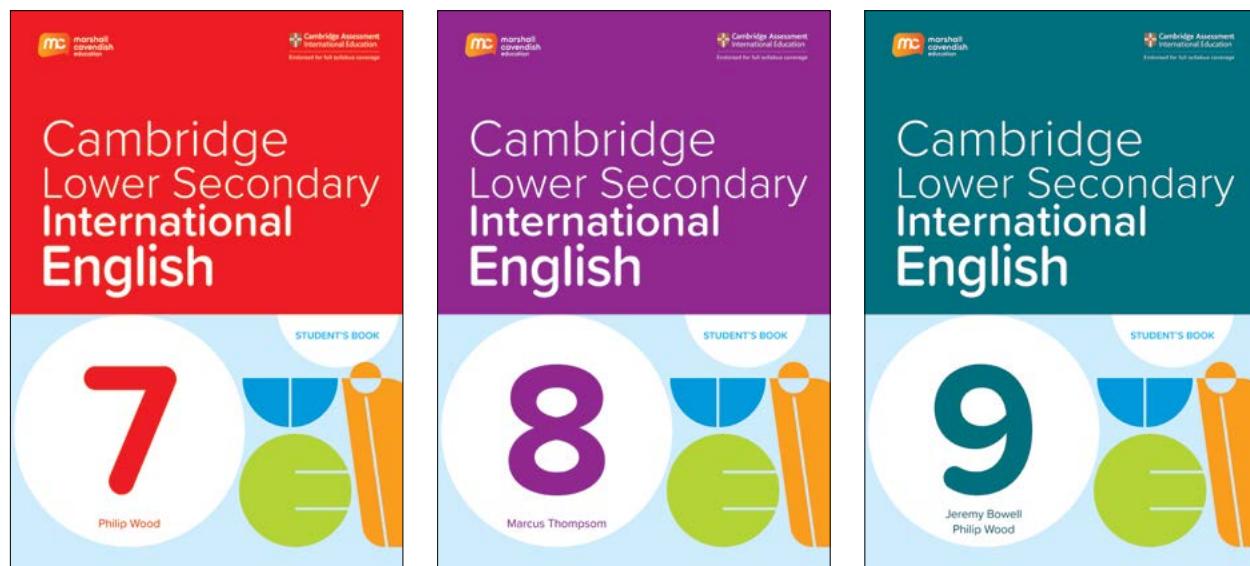

MCE Cambridge Lower Secondary International English

This series seamlessly combines the Cambridge Lower Secondary English as a Second Language (0876) curriculum framework with proven teaching methodologies employed in Singapore, specifically designed for nonnative English speakers.

This unique blend of the curriculum framework from Cambridge International Education and Singapore methods ensures a highly effective English learning experience for non-native learners.

Every stage contains 11 theme-based units, supplemented with additional resources. Each unit has a consistent structure that contains 9 core lessons and 1 optional lesson, which represent approximately 9–10 hours of lesson content.

Each lesson has a clear focus on a certain skill, as well as the integration of several related skills. Each book covers about 100 teaching hours.

MCE Cambridge IGCSE English as a Second Language

The Marshall Cavendish Education Cambridge IGCSE™ English as a Second Language 2nd Edition series is designed to support learners studying the Cambridge IGCSE and IGCSE (9–1) English as a Second Language syllabuses (0510/0511/0991/0993) for examination from 2024.

The series focuses on building communicative competence and linking language to life. The units are carefully structured according to the various functions that we use language for, such as informing, explaining, persuading, and giving opinions. By learning language in this way, learners will build strong communication skills, based around real world contexts that they can relate to.

Thorough coverage of language skills and grammar, as well as a focus on exam preparation, means that learners will gain a solid grounding in English before moving on into higher education. This series is endorsed by Cambridge International Education.

Macmillan Senior Phase English FAL Novels

Macmillan Senior Phase English FAL Novels is a series of novels that introduces readers to a range of literary works, from well-known classics to new contemporary writing. The series contains novels from various countries and time periods. Each novel in the series is presented within an accessible and user-friendly full-colour format, with illustrations that aid understanding. Each novel contains the following useful features:

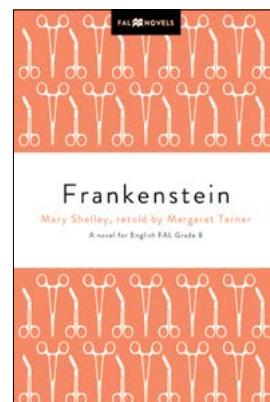

- A **summary** that provides a brief outline of the plot of the novel
- **Pre-reading activities**, which guide learners' understanding of the novel and its themes
- A **glossary**, which provides definitions of unfamiliar words and phrases as well as examples of literary terms to aid a better understanding of the novel
- **Notes on the novel**, which provide assistance with understanding the novel and its themes as well as help with analysing the literary techniques used by the author
- **Activities**, which help learners to develop literature analysis skills.

Frankenstein

... the lighting was all around me ... I looked at the huge body. The silver light reached the hands, the feet and the head ... For a moment everything was quiet. Was it moving? No ... Yes! An arm moved and then a leg. Then I heard breathing, yes; the man was breathing. He was alive!

This abridged retelling of Mary Shelley's famous novel introduces learners to the world of classic English literature. **Frankenstein** is the thrilling story of how Dr Victor Frankenstein, a man who is fascinated with the secret of life, decides to create it. He builds a body from parts of other bodies and brings his new human to life. However, Victor's creation is ugly and frightening. Victor runs away from the monster that he has made, only to find that his creation wants revenge and aims to destroy everything that Victor loves.

The Department of Basic Education has approved this novel for English First Additional Language Grade 8 learners.

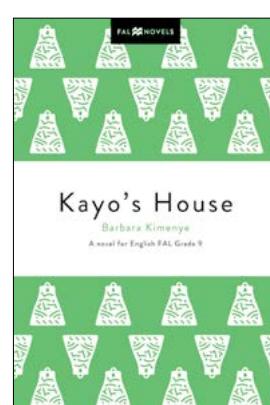

Kayo's House

'You don't understand,' argued Wanda. 'I dreamt last night that Ntali was ill ... I can't get the dream out of my head ... I won't rest until I know she's alright.' Jamu could see that Wanda was determined to go this time. Perhaps it was a mistake, but somebody had to keep an eye on Wanda ... Nobody saw the two girls disappear from the village.

Kayo's House is the gripping story of Wanda and Jamu, two girls who live in a small village in Uganda. Wanda and Jamu are modern girls. They don't believe in the stories of the elders about evil places. One day, while exploring, they find an old house where a woman, Ntali, welcomes them and puts a pendant around Wanda's neck. When the girls return home, Wanda's aunt recognises the pendant and is afraid. Wanda is forbidden to go back, but she dreams that Ntali needs her and goes anyway, taking her friend with her. Who is Ntali, and what danger lies in wait for the two girls?

The Department of Basic Education has approved this novel for English First Additional Language Grade 9 learners.

Kliek

Digital Afrikaans Language Course for Generation-Z

Kliek offers you a simple, easy solution to teaching FAL Afrikaans remotely using an effective blended learning approach.

Get access to these amazing product features:

For Teachers:

- CAPS and IEB aligned content
- Monitor individual and whole-class progress
- Generate learner reports and keep track of learner results
- Assign online activities and get immediate feedback
- Teacher portal available

For Learners:

- Interactive exercises, games and animations
- Get immediate feedback and tips as you learn
- Online exercises that test language skills
- Collaborate through the online chat room
- Support learning from Grade 6 to 12

Kliek Workbooks

The new Kliek workbooks offer a blended learning approach to teaching and learning First Additional Language Afrikaans. This series offers four new grade-specific workbooks for Grades 8, 9, 10 and a combined workbook for 11 & 12. This series allows learners to improve their skills in Afrikaans and to work at their own pace to complete activities in the workbook and online.

TRANSTALING IN DIE KLASKAMER

Transtaling is 'n nuwe benadering tot klaskamer onderrig en is spesifiek van toepassing in 'n land soos Suid-Afrika met sy 11 amptelike landstale. Hierdie praktyk is gebaseer op die wyse wat meertalige mense taalhulpbronne aanwend vir kommunikasie, begrip en betekenisleer. Transtaling beteken nie net die vertaling van die brontaal na die teikentaal nie maar poog om die betrokke tale saam aan te wend en so die leerproses te vergemaklik.

Leerders ontvang dus onderrig in 'n tweede taal maar internaliseer begrippe in hul moedertaal. Leerders mag ook terugvoering en interpretasie van konsepte in hul moedertaal weergee.

Leerders kry die geleentheid om hul moedertaal en hul tweede taal saam in die klaskamer te gebruik om sodoende meer effektief te leer. Die uitdaging vir onderwysers is om transtaling in die klaskamer en in die assessoringsproses aan te wend.

Daar is n paar verskillende benaderings wat onderwysers kan toepas in die klaskamer:

Normaliseer wisseling tussen tale: Tale word deesdae meer vryelik in die klaskamer gebruik daarom is dit aanvaarbaar om tussen die verskillende variëteite van Afrikaans en ook Engels of selfs Xhosa en Zoeloe in die klaskamer te wissel. 'n Goeie voorbeeld hiervan is om in verskillende tale te groet in die klaskamer. Dit bied vir leerders die geleentheid om hul wêreld met hul klasmaats te deel en by mekaar te leer.

Bied geleentheid vir groepbesprekings in verskeie tale: Kinders vind dit makliker om hulself in hul moedertaal uit te druk. Transtaling verbeter kommunikasie in die klaskamer en laat kinders by mekaar leer in 'n gemoedelike omgewing. Moedig kinders aan om woorde in hul moedertaal te deel as hulle vashak. So kan hul mekaar ook help met die toepaslike woord vir 'n begrip.

Gee instruksies in die leerders se moedertaal: As leerders sukkel om instruksies te verstaan word hul soms mismoedig en kry nie die geleentheid om die instruksie reg uit te voer nie. Gee instruksies in albei tale om te verseker dat leerders die geleentheid kry om 'n taak suksesvol te voltooi en die woorde in die instruksies volledig te verstaan.

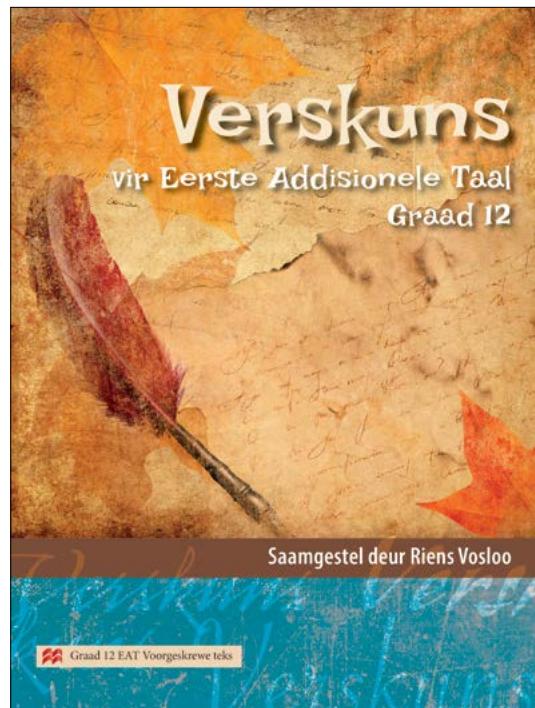

Gee vir leerders toegang tot woordelyste in albei tale om hul woordeskat uit te brei: Stel leerders bloot aan 'n wyer verskeidenheid woorde en help hulle om die korrekte woordvorme te herken en toepas. Toegang tot woordelyste in albei tale bied ook maklike toegang tot vertaalde woorde vir mondelinge of kreatiewe skryfopdragte. Dit kan kinders se selfvertroue verhoog wanneer hulle take uitvoer, wat weer lei tot verbeterde taalgebruik en kommunikasie.

Verskuns vir Eerste Addisionele Taal

Verskuns is 'n uitsonderlike, geïllustreerde bloemlesing om die leser se verbeelding dadelik aan te gryp. Aan die hand van rymende en ritmiese verse gaan lezers die wêreld van verskuns ontdek en geniet. Die wye verskeidenheid kontemporêre en klassieke verse is gekies om belangstelling in en liefde vir die poësie aan te wakker. Dit bied ook uitdagings vir rolspel, dramatisering, voordrag en inspirasie om self gedigte te skryf.

Die bloemlesing is ideaal vir poësie-onderrig. Die gedigte is gekies volgens temas wat aanklank sal vind by die belangstellingsveld van die jong leser, én dit sluit aan by temas wat in die kurrikulum voorgeskryf word. Die biografi eë, woordverklarings, woordelyste, besprekings en vrae ondersteun die leser se interaksie met die gedig, en dit bevorderdeer deeglike begrip van die betekenis en boodskap daarvan.

MCE Cambridge Lower Secondary Mathematics

The MCE Cambridge Lower Secondary Mathematics package has been developed for schools that follow and deliver the Cambridge Lower Secondary Mathematics curriculum framework (0862).

While the series is fully aligned to the Cambridge curriculum framework, the pedagogies and teaching practices follow those used in Singapore, one of the top performing countries in international assessments such as Trends in International Maths and Science Study (TIMSS) and Programme for International Student Assessment (PISA).

The series is written based on the belief that every learner can succeed in mathematics regardless of their English language proficiency and learning readiness. It emphasises the development of learners' conceptual understanding and procedural skills through analysis and reasoning, mathematical discussions and problem-solving, enabling them to achieve mathematical mastery.

This series comes complete with a comprehensive suite of print and digital resources that help 21st century learners and teachers succeed.

MCE Cambridge IGCSE Mathematics

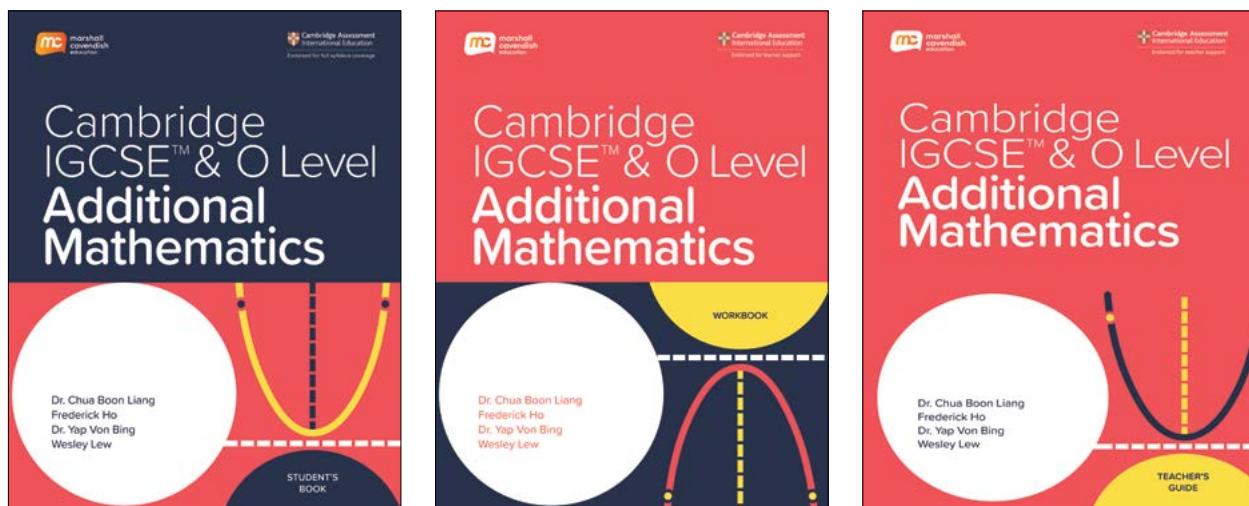

The MCE Cambridge IGCSE™ Core and Extended Mathematics and MCE Cambridge IGCSE™ & O Level Additional Mathematics series have been developed to deliver the latest Cambridge IGCSE and IGCSE (9–1) Mathematics syllabuses (0580/0980) and Cambridge IGCSE and O Level Additional Mathematics syllabuses (0606/4037) for examination from 2025.

While the series are fully aligned to the Cambridge syllabuses, the pedagogies and teaching practices follow those used in Singapore – one of the top performing countries in international assessments such as Trends in International Maths and Science Study (TIMSS) and Programme for International Student Assessment (PISA).

Both series are anchored on the belief that all learners can learn and succeed in maths regardless of their learning readiness. The series emphasise developing learners' conceptual understanding and problem-solving skills, allowing them to eventually achieve mastery. The series also comes complete with a comprehensive suite of print and digital resources that help 21st century learners and teachers succeed.

Cambridge IGCSE Mathematics

Learner's Books: Confidently deliver and ensure full coverage of the revised syllabuses for examination from 2025 using a tried-and-tested approach to improve mathematical skills, with an emphasis on problem solving and interrogating findings in new topics.

- **Understand mathematical principles:** Commentaries and additional explanations are included throughout with plenty of exercises to develop knowledge.
- **Develop problem-solving skills:** Guidance is included on techniques to help complete open-ended investigations and justify reasoning for solutions.
- **Monitor progress with formative assessment:** The Boost eBooks include auto-marked formative Knowledge Tests.

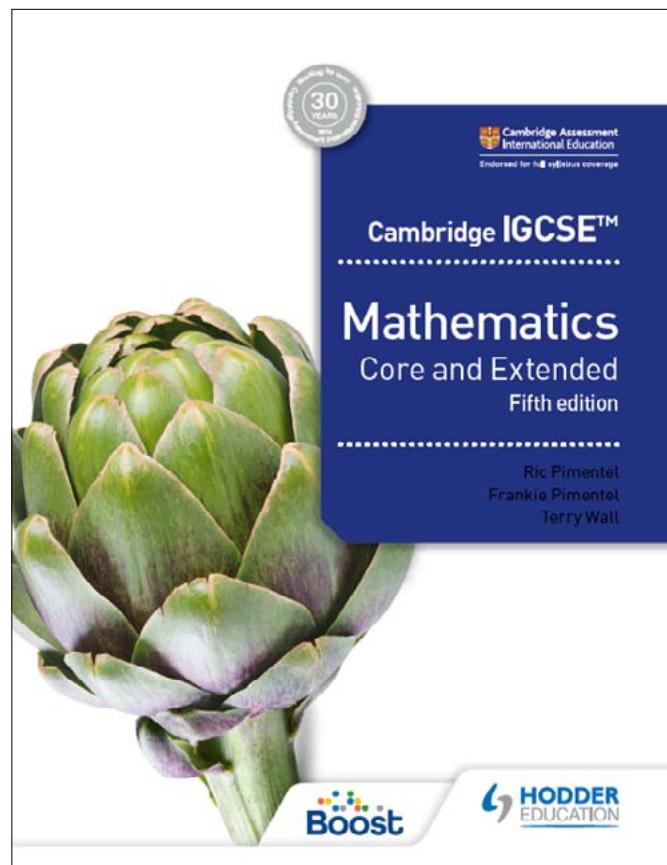

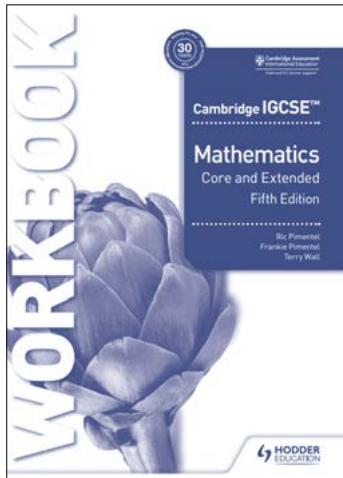

Workbook: An ideal course companion to use in class or at home.

- Provide additional exercises that perfectly supplement the Learner's Books.
- Keep track of learners' work with ready-to-go, write-in exercises.
- Ensure learners know what to expect for assessment with a wide breadth of practice questions.

Teacher's Guide with Boost Subscription

Guide includes:

- Schemes of Work
- Teacher's notes
- CPD videos
- ESL support
- Past paper questions
- Mark schemes
- Numerical answers
- Worked solutions for assessment exercises
- Problem-solving videos
- Assign Knowledge Tests and access results reports.

Further Studies Mathematics for the Revised IEB Curriculum Grades 10–12

Learner's Books

Further Studies Mathematics Grades 10–12 for the Revised IEB Curriculum was written by some of the most experienced mathematics teachers in South Africa including Moira Clarke, Graeme Evans and Dr Stephen Sproule.

The books cover all the material in the curriculum, adopt a lively, learner-friendly tone and provide topical contexts, wherever this is possible. All the solutions are given/provided at the end of each book. The books are available in hard copy and in eBook format.

Cambridge AS & A Level Mathematics

Take mathematical understanding to the next level with this accessible series, written by experienced authors, examiners and teachers.

- Improve confidence as a mathematician with clear explanations, worked examples, diverse activities and engaging discussion points.
- Advance problem-solving, interpretation and communication skills through a wealth of questions that promote higher-order thinking.
- Prepare for further study or life beyond the classroom by applying mathematics to other subjects and modelling real-world situations.

Access Mathematics Test

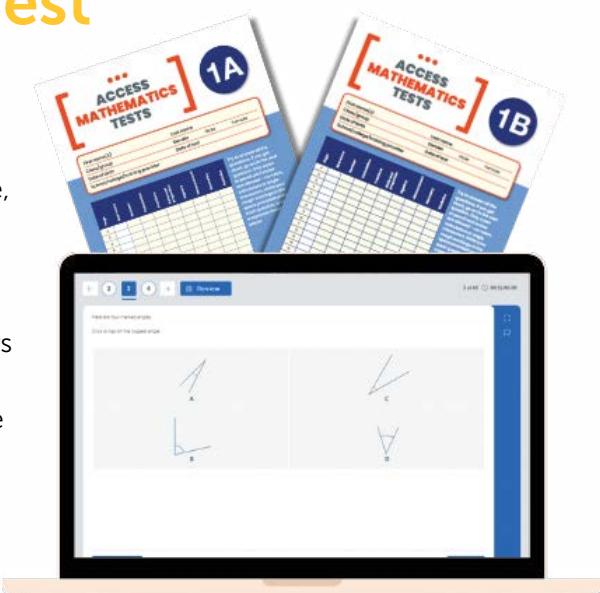

Access Mathematics Tests is a progress test that helps compare learners aged 10–16 against their cohort at a school and national level, understand their mathematical skills and areas where they can improve, and provide targeted interventions throughout their education.

Age range covered: 10–16 years

Number of Tests: 3 sets of parallel forms (6 test papers in total)

Ideal testing time: The assessment can be used at the beginning and end of a period of interventions.

Content assessed: AMT works alongside all major curricula and focuses on mathematical ability and comprehension.

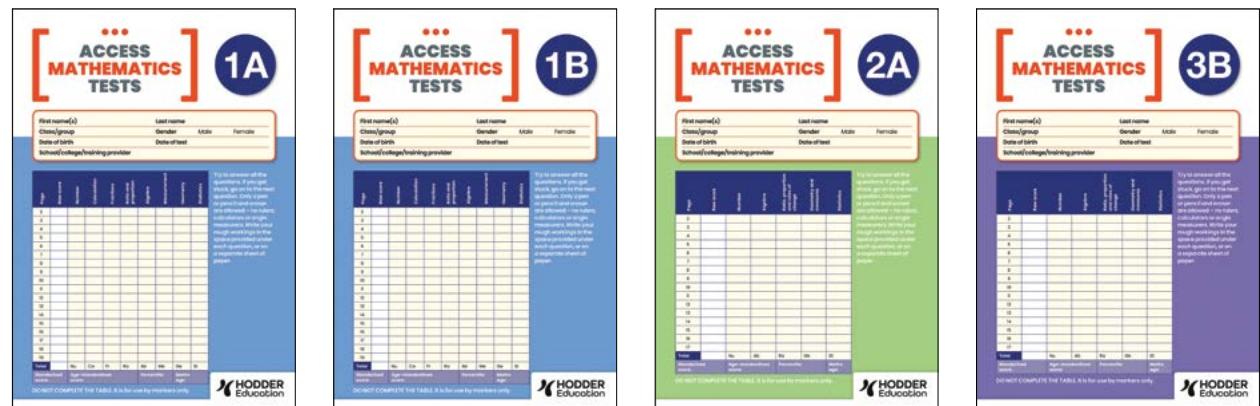

Access our value-added reporting tool

Access Mathematics Tests come with free access to our brand-new online assessment and reporting tool, Boost Insights.

- Quickly analyse results and gaps in learning to inform targeted teaching.
- Bulk upload results from paper tests.
- Effortlessly generate reports for individuals and groups to view and compare learner progress.
- Easily download visual reports that can be shared as PDFs with teachers, senior leaders, MAT leaders, school board members, and parents.

To learn more about Access Mathematics Tests, scan the QR code to view the brochure.

DEALING WITH CONFLICTS IN SCHOOL

A staff complement at school is one big melting pot of different personalities.

In every school there are:

- extroverts who sit and socialise during planning
- introverts who utilise that time to recharge for the rest of the day
- givers, who are frequently eloquently expressive about their beliefs
- those who engage in debates, whose strong will makes it hard to withstand their arguments.

Teachers will inevitably get into disagreements with their colleagues given the variety of personalities present. But ... it doesn't have to digress into a mud-slinging contest.

Life is full of conflict and conflict can be very healthy. It increases awareness of problems that exist and provides a reason for finding a better way forward. When conflict is valued it encourages an environment where change is seen as positive – a way of making things better. In reality, growth cannot occur without it.

As a principal or departmental head, you will have to deal with disagreements on a frequent basis, and timeously. It is important to always have a paper trail, but it is unnecessary to immediately resort to formal documentation to resolve an issue between staff members, thereby making it a bigger issue than it really is.

It is imperative that you as a leader have your ear to the ground and address conflict between staff members as soon as possible so that it does not escalate. The last thing that is wanted is for disagreements or conflicts to escalate to the point that they affect the learners and their education.

This is by no means saying that you should be a conflict-seeker, but one should seek to resolve and address conflict so that all parties mutually agree with the outcome.

When there is a dispute between teachers, you as a leader should immediately ask how you can assist. Teachers will frequently enter your office to voice their displeasure with another teacher.

You, on the other hand, should never voice your opinions about a situation or a colleague, even if you do have them. Your responsibility as a leader is to listen and not to discredit the individual or add fuel to the flame.

Herewith a suggested way to deal with this:

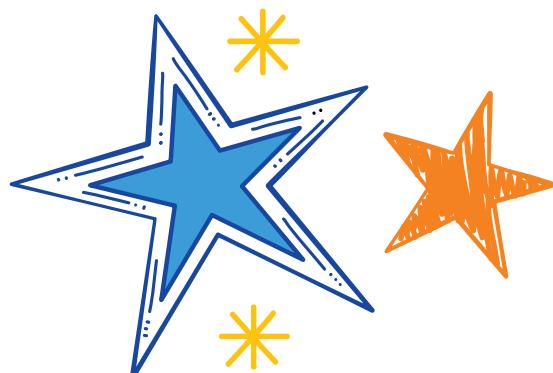

After listening to the details of the conflict, ask the teacher: *"What was the response when you told your colleague how you felt?"* The reaction you will mostly get is one of shock. They will usually respond by telling you that they haven't talked to the person, and in most cases, they have no intention of doing so. Most people don't like addressing the conflict head-on.

Ask yourself the following questions to fully understand and address the conflict in the correct manner:

Who?	Who needs to be involved in the discussions?
What?	What are the facts and feelings in this conflict?
When?	When is an appropriate time to approach the conflict?
Where?	Where is a neutral location to talk about the conflict?
Why?	Why address this conflict?
How?	How do you move forward?

As a leader, it is your responsibility to **mediate** and help resolve conflicts between teachers. The most successful mediators:

- are empathetic
- are non-judgemental
- have patience and persistence
- are optimistic
- are trustworthy
- are sharp minded
- are creative
- have good common sense and
- have a good sense of humour.

As long as you have the right rapport with your teachers, you can ensure any disputes are resolved quickly and completely.

MCE Cambridge IGCSE Physics, Chemistry & Biology

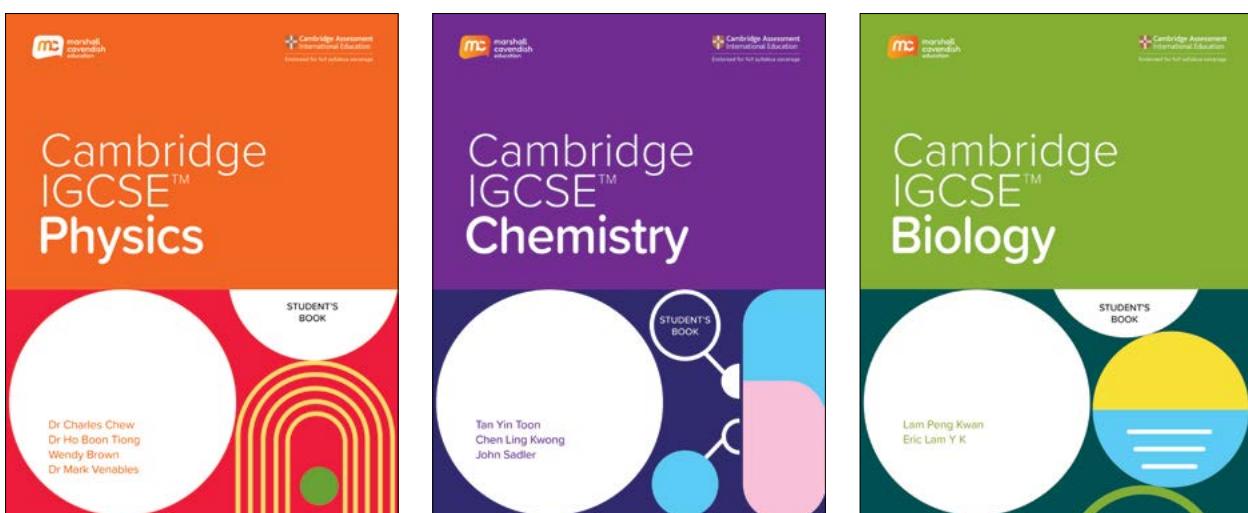

Marshall Cavendish Education Cambridge IGCSE™ Physics, Chemistry and Biology are comprehensive two-year programmes designed to support learners with their study of the Cambridge IGCSE and IGCSE (9–1) Physics (0625/0972), Chemistry (0620/0971) and Biology (0610/0970) syllabuses.

Developed based on robust research, these series bring science learning to life by focusing on real-life examples to which learners can relate. They are designed to excite and engage learners to be curious about scientific concepts, and to promote a deep understanding of topics. This is done by giving learners plenty of opportunities to practise learnt skills, reflect on concepts and share, discuss or journal what they have learnt.

Each series consists of both print and digital learning resources that support blended learning. This provides learners with a more complete and flexible learning experience.

Recognising that there is a potentially diverse learner population whose first language is not English, these series use simple and clear language with plenty of visual representations and also feature a mix of cultural examples for the international audience.

They also cater to learners at various levels of learning readiness by providing additional support and enrichment resources. Overall, these series will provide learners with scientific skills and knowledge for success, and nurture them into confident critical thinkers who are ready for the future.

TIPS, TRICKS AND TECHNIQUES FOR BIOLOGY TEACHERS

Getting learners to engage with and enjoy subjects can be a challenge, but it is key to their understanding and performance in that subject. With life sciences, inspiration is literally all around – but it can still be tricky to unlock what makes it exciting, relevant and accessible for learners. Try to engage their natural curiosity by integrating the topics into current events and issues affecting the world today, as well as things relevant to their day-to-day lives.

Here are some ideas to help biology come alive and inspire your learners:

- **Vary your teaching methods** – use methods such as textbooks, podcasts, videos, games, concept mapping, lecturing, discussions, cooperative learning, reading, practical activities – by engaging all learning styles you not only give each learner a chance to learn in accordance with their learning style, but you also keep your classroom from becoming predictable and stagnant. Varying your teaching style keeps your classroom vibrant and more interesting for all learners.
- **Apply biology practically** – set your learners achievable experimental tasks and get them to conduct their own research – this type of hands-on learning helps increase information retention and improves exam scores by letting them absorb new information for themselves, and boosts their creativity and critical thinking skills. Use the hypothesis-test-conclusion format, which teaches them scientific inquiry by practical application.

Some other ideas for making biology practical:

LET THEM

learn about life cycles
by raising butterflies or
chicks

explore photosynthesis
by planting a garden

dry/press plants and label
their anatomy

test samples of yeast to
test their live/dead status

view/analyse different
kinds of cells under a
microscope

- **Use games** – the biology questions from many existing board games can be used to give lessons a ‘new spin’ – also see <https://askabiologist.asu.edu/> for a collection of biology-centric online games.
- **Go on field trips** – reinforce the lessons taught in class by letting them see concepts out in nature, even if it is just your local park. This provides a change of pace and helps cement ideas learnt in books. A trip to a local science museum or lab can also help them see the progress that has been made in science over time, and gives topics a different context.
- **Use technology** – engage learners in mediums they are familiar with and enjoy, and that cater to a variety of learning styles. Show 3D models of DNA, as well as interactive animated dissections which may be more ethical and accessible in the classroom. Computer simulations are a great way of visually exploring a range of topics from molecular biology to evolution and can be a safe and effective form of introducing learners to laboratory work. Online quizzes can also be a great learning tool.

BIOLOGY

Cambridge IGCSE Biology

Benefit from the knowledge of our renowned expert authors to navigate through the content of the updated syllabuses.

Learner's Book:

- **Develop strong practical skills:** Practical skills features provide guidance on key experiments, interpreting experimental data, and evaluating results; supported by practical questions for practical examinations or alternatives.
- **Build mathematical skills:** Worked examples demonstrate the key mathematical skills in scientific contexts; supported by follow-up questions to put these skills into practice.
- **Deepen and enhance scientific knowledge:** Going further boxes throughout encourage learners to take learning to the next level.

Workbook: Reinforce learning and deepen understanding of the key concepts.

- **Develop understanding and build confidence ahead of assessment:** The Workbook follows the structure of the Learner's Book, topic-by-topic, with every section containing a range of shorter questions to test knowledge, and 'Exam focus' sections providing exam-style questions.

Practical Skills Workbook

Improve scientific inquiry and practical skills with suggested key experiments and simple, structured guidance.

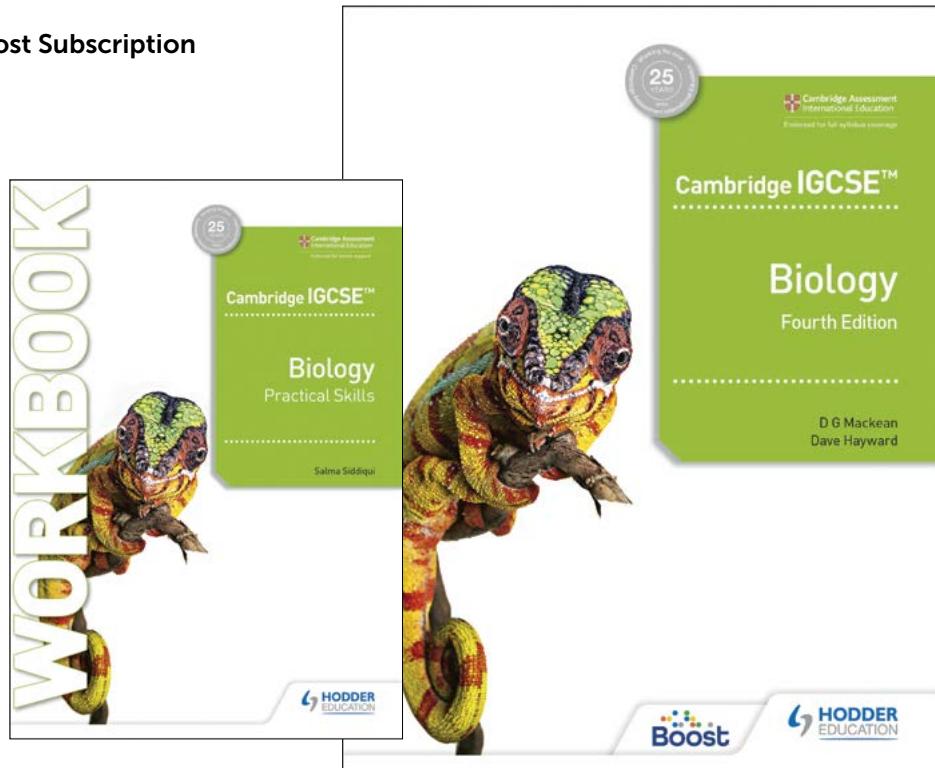

- **Become accomplished scientists:** Each Workbook provides a series of investigations with step-by-step guidance which leads you through the method and the use of apparatus, complete with safety notes.

4 Great Biological Discoveries which revolutionised Life Sciences

Inheritance/Evolution (1800s): Darwin's finches, Mendel's peas, and Wallace's naturalist studies along with their long-reaching conclusions helped to spur the explosion of growth in the area of biology over the last 170 years.

Antibiotics (1928): Fleming's discovery of antibiotics was not only a cure for disease but has also been utilised in innumerable research, as selection tools in transformation and cell culture, as well as in a host of other fields and studies.

HeLa Cell Discovery (1951): The pancreatic cancer cells removed from Henrietta Lacks before she died in 1951 are a benchmark in the history of cancer research and knowledge. The immortal HeLa cells made medical research easier, more robust and repeatable. There have been over 11,000 patents created involving the HeLa cells including the first polio vaccine.

PCR (1983): Polymerase Chain Reactions (PCR) have revolutionised their field of study. PCR has made cloning faster and more reliable and may be the single most indispensable technique used in modern biology.

Step into Science Life Sciences

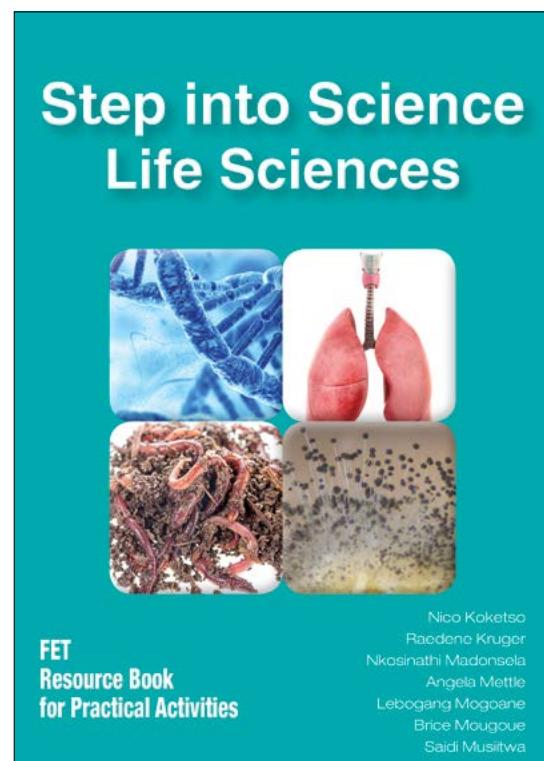

The focus of these **Step into Science FET Resource Books for Practical Activities** is to promote knowledge and skills in scientific inquiry and to encourage the investigating skills that are relevant to the study of Life and Physical Sciences i.e. 'Doing Science'.

Learners should be able to complete investigations, analyse problems, and use practical processes and skills in designing and evaluating solutions. Learners are required to plan and do simple investigations, and solve problems that need some practical ability. The practical activities also develop attitudes and values that underpin this practical ability.

The Programme of Formal Assessment for Physical Sciences and Life Sciences requires one selected practical task per term across Grades 10 to 12. To make the teacher's decision easier, we have provided a selection of practical tasks per knowledge area that can be used for informal (formative) and formal assessment as part of the Programme of Assessment.

The **Step into Science FET Resource Books for Practical Activities** have the following features:

- an introduction to practical work that explains the purpose and aim of practical work, the scientific process, and the process skills which should be developed through practical activities
- guidelines to ensure safety in the science classroom
- a selection of practical activities per knowledge area per grade for the FET Phase. This means a choice of well-designed practical activities, which could be used for informal or formal assessment
- each practical activity consists of:
 - teacher support that indicates the objectives, advance preparation, and improvised resources, where applicable. This enables the teacher to plan the practical tasks and investigations
 - a photocopiable worksheet for the learners to complete, that outlines the practical task according to the scientific process
 - assessment tools and guidelines, including rubrics where relevant and a marking memorandum to assess the worksheet completed by the learners.

Step into Science Physics

The Curriculum and Assessment Policy Statement (CAPS) for FET Sciences states that in all grades, a significant amount of time should be spent on doing practical tasks and investigations, which are an integral part of the teaching and learning process.

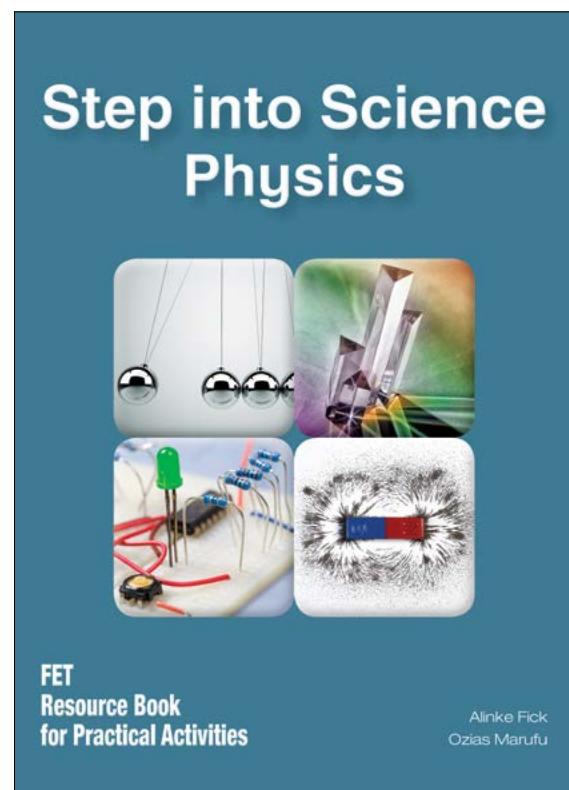

The focus of these **Step into Science FET Resource Books for Practical Activities** is to promote knowledge and skills in scientific inquiry and to encourage the investigating skills that are relevant to the study of Life and Physical Sciences i.e. 'Doing Science'.

Learners should be able to complete investigations, analyse problems, and use practical processes and skills in designing and evaluating solutions. Learners are required to plan and do simple investigations, and solve problems that need some practical ability. The practical activities also develop attitudes and values that underpin this practical ability.

The Programme of Formal Assessment for Physical Sciences and Life Sciences requires one selected practical task per term across Grades 10 to 12. To make the teacher's decision easier, we have provided a selection of practical tasks per knowledge area that can be used for informal (formative) and formal assessment as part of the Programme of Assessment.

The **Step into Science FET Resource Books for Practical Activities** have the following features:

- an introduction to practical work that explains the purpose and aim of practical work, the scientific process, and the process skills which should be developed through practical activities

TEACHING IN A MULTIGRADE CLASS

Teaching in a multigrade class can be very challenging, but if you follow these simple steps, you will easily succeed.

1 See challenges as opportunities

- ✓ Take advantage of diversity within and between groups
- ✓ Balance time and multitask
- ✓ Engage learners and keep them focused
- ✓ Break isolation as a multigrade teacher

2 Manage your classroom

The three dimensions of classroom management:

Teacher

- ✓ Planning
- ✓ Classroom control
- ✓ Use of time
- ✓ Delegation of responsibility

Classroom

- ✓ Physical conditions
- ✓ Materials
- ✓ Activities
- ✓ Routines

Learners

- ✓ Time on task
- ✓ Behaviour
- ✓ Relationships
- ✓ Responsibilities

3 Create a harmonious environment

Child-friendly environment

Structured and unstructured learning

Different teaching methods

Positive discipline

4 Teach effectively

Group strategically

Prepare flexible and appropriate material

Promote self-paced learning

Give extra attention to learners with special needs

5 Adapt curriculum and lesson plans

- ✓ select common themes from one subject suitable for all the grades
- ✓ develop a flexible timetable for all the grades
- ✓ develop daily lesson plans for each unit related to this theme
- ✓ select activities linked to the curriculum
- ✓ develop relevant worksheets for individual or group practice
- ✓ relate concepts from the curriculum to examples from your learners' daily lives

6 Plan systematically

Activities before the lesson include:

Developing a lesson plan
Deciding on methods of presentation
Preparing worksheets and materials, assigning tasks

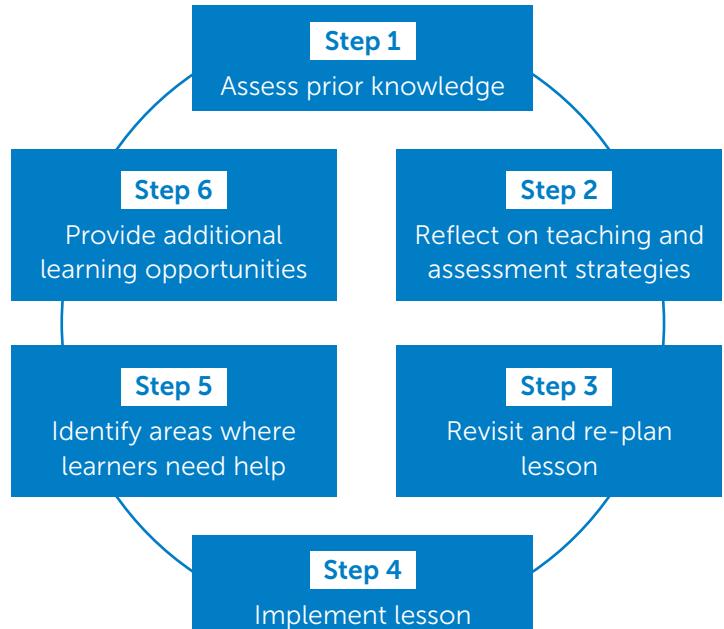

After the lesson, you may want to evaluate the lesson plan and think of interventions for learners requiring extra support.
Reflecting on what did and what didn't work will help improve future lessons.

During the lesson you will need to present the core material to all learners, supervise group work and/or monitor individual practice sessions for every learner in class.

7 Develop teaching strategies

- Strategy 1** Teach all groups together
- Strategy 2** Teach one grade while others work independently
- Strategy 3** Teach one subject to all grades at varying levels of difficulty
- Strategy 4** Develop activities for non-taught groups
- Strategy 5** Develop peer, cross-age-and-grade teaching strategies
- Strategy 6** Relate learning with daily experience

8 Assessment

“Maps are like campfires – everyone gathers around them, because they allow people to understand complex issues at a glance, and find agreement about how to help the land.”

~ Sonoma Ecology Center

Geography for CAPS

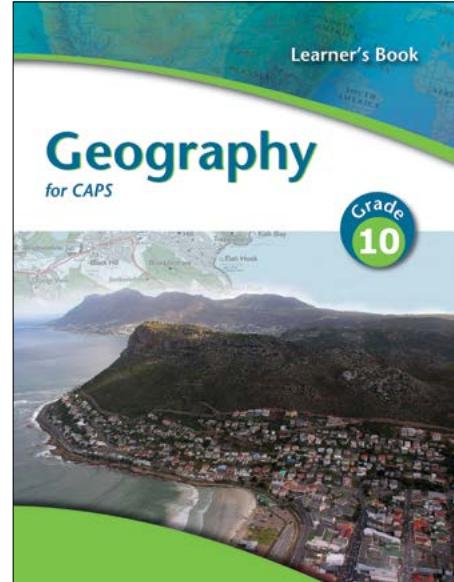

The **Hodder Education** courses have been designed to help learners understand and master all the content and skills that they will need to meet their Grade 10 outcomes.

The language used is simple and clear, and includes detailed explanations throughout. The books feature full-colour illustrations, extensive diagrams and high-quality photographs to reinforce concepts.

Knowledge and skills checklists at the end of each chapter or unit summarise important points covered and provide opportunities for assessment. Real-life concepts are used to explain principles, using settings and scenarios that learners will easily identify with.

Features such as key word boxes, skills boxes and alphabetical glossaries are used to enrich the learning experience. Learners will acquire new vocabulary appropriate to the subject that they are studying and develop skills that they will use across other subject areas.

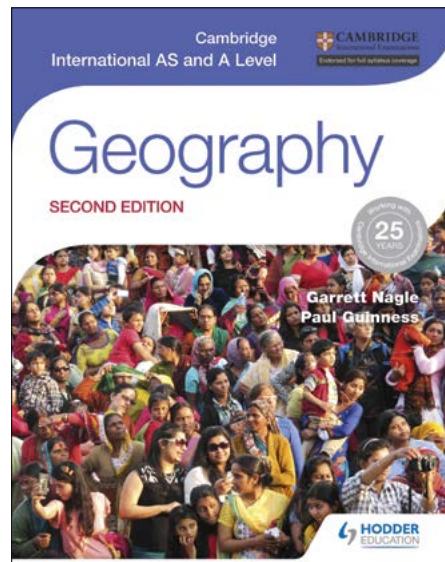

The accompanying Teacher's Guides provide support for teachers, including clear lists of resources needed for each activity, step-by-step suggestions for preparation and answers for all activities. The Teacher's Guides also feature a curriculum map showing how this course meets the requirements of the CAPS documentation.

Solutions for all Map Skills Grades 7, 8 and 9

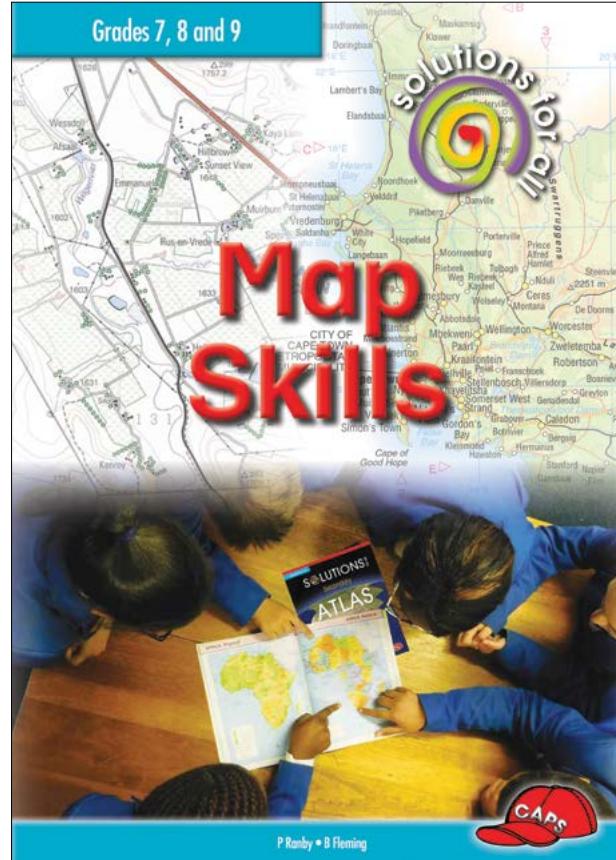

Solutions for all Map Skills is an exciting, CAPS-aligned guide for geography learners in Grades 7, 8 and 9. Its content has been developed by teachers, examiners and lecturers who have an extensive knowledge of the geographical skills and techniques section of the CAPS geography curriculum.

This book provides learners with instruction and guidance supported by a range of practice activities to help them develop competence in the following areas:

- mapwork skills and techniques
- atlas use
- satellite images
- aerial photographs
- 1:50 000 topographic maps
- orthophoto maps.

Key features:

- Simple **definition** of key terms, as well as explanations of the **key concepts** related to each topic
- Opportunities to **apply** and integrate map skills with the geography topics outlined in the CAPS curriculum
- Useful **tips** to help with exam questions
- **Exercises** to practise and develop specific skills
- Clear, **step-by-step** explanation of how to master the skills associated with specific topics
- A selection of grade-specific assessment questions, including **sample exam papers**.

Sample pages

Topic 2: Orthophoto maps

Important words

Topographic map a detailed map that shows natural features, especially mountains, rivers, and human-made features such as roads and urban areas.

Spot height a dot and a number on a map or orthophoto map to show height in metres, e.g. 49

An orthophoto map looks like a vertical aerial photograph (VAP) with some map features marked on it, particularly contour lines, place names and heights.

Useful tips

- Always check the position of the height numbers given on contour lines.
- If the numbers are the correct way up then the slope is ascending in the direction of the numbers, that is, up the slope towards higher ground.
- When the numbers are upside down, the slope is descending towards lower ground.

Key concepts

An orthophoto map contains elements of a VAP and a topographic map. An orthophoto map has an accurate scale of 1:50 000 for all parts of the image. Height is shown using spot heights and contour lines. Contour lines are lines on a map that are at the same height above sea level. Contour lines are marked on orthophoto maps at five-metre (5 m) intervals. Only some of the contour lines have height numbers marked on them. Orthophoto maps display the following information: place names, road names, contour lines, power lines, and constructed features such as schools and police stations. Cartographers use VAPs to make orthophoto maps. They correct the scale on a VAP to make it accurate for every point on the image.

Key skill 1: How to interpret an orthophoto map

1. The pattern made by contour lines helps to identify landscape features such as hills, valleys, spurs and plateaus.
2. The spacing of contour lines (how far apart they are) shows the gradient of a slope, i.e. if a slope is steep or gentle.
3. The shape and the shadows on orthophoto maps provide clues about the height of hills and the steepness of mountain slopes.
4. Contour lines, spot height and the effect of shadows emphasise the relief of the land. Another three techniques help you to identify landscape features.
5. Dark, irregular shapes are typical for these features: forests, deep water, dense vegetation, rivers, a wetland, ploughed fields.
6. Light colours and shades indicate these features: shallow or muddy water, sand, rocks, dry land, even soil.
7. Straight or even lines generally represent features that people have created, such as roads, railways, buildings and field boundaries.
8. Natural features such as rivers, lakes and coasts have uneven or irregular shapes.
9. Large buildings may be schools, factories, blocks of flats or shopping centres.
10. In some settlements, roads may have an irregular street pattern. Buildings may have different sizes. There are often winding paths between the buildings.

Practice questions

Study the extracts A, B and C from the orthophoto maps on page 92.

1. Identify the highest point in Map A.
2. Draw a contour line on the map between points X and Y in Map A. Imagine you are looking at the hills from point Z.
3. In which direction is the river in Map B flowing? Give two pieces of evidence to support your answer.
4. Describe the vegetation close to the river in Map B.
5. Suggest a height for the contour lines at P and at Q in Map C.
6. Identify steep and gentle slopes on each of the orthophoto maps A, B and C.

Grade 8

Revision questions

Maps, atlases and scale

Total: 100 marks

1. Consider the three maps A, B and C.

Title	Grade	ISBN
Solutions for all Map Skills Grades 7, 8 and 9	Grades 7–9	9781431030934

Solutions for all Map Skills

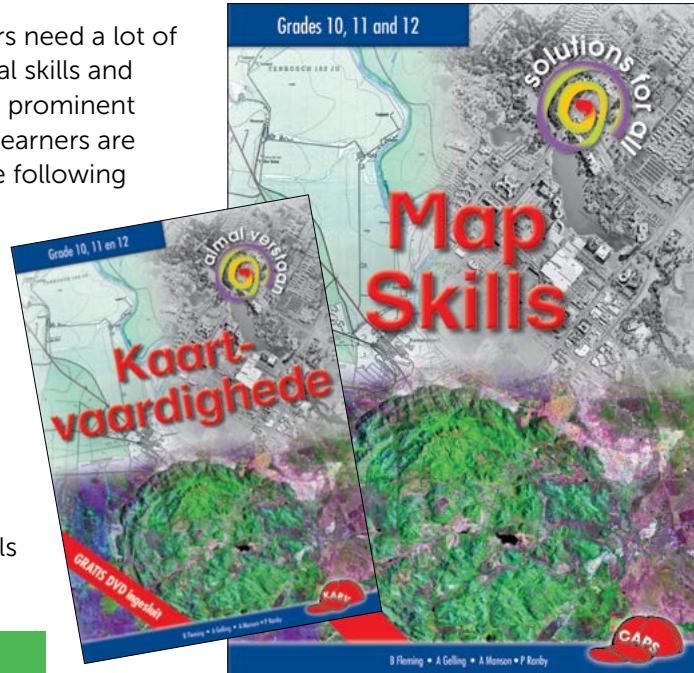

Grades 10, 11 and 12

Solutions for all Map Skills is an exciting, CAPS-aligned guide for Grade 10 to 12 learners taking geography. Its content has been developed by teachers and trainers who have an extensive knowledge of learners' difficulties when dealing with the geographical skills and techniques section in the CAPS curriculum.

To become a truly skilled geographer, learners need a lot of practice in learning and applying geographical skills and techniques. These skills and techniques are a prominent part of the CAPS geography curriculum and learners are required to be able to integrate and apply the following skills throughout the year:

- mapwork skills and techniques
- 1:50 000 topographic maps
- aerial photographs
- orthophoto maps
- Geographical Information Systems (GIS)
- atlas use and fieldwork.

Solutions for all Map Skills equips teachers with all the necessary tools to teach map skills with confidence.

Key features

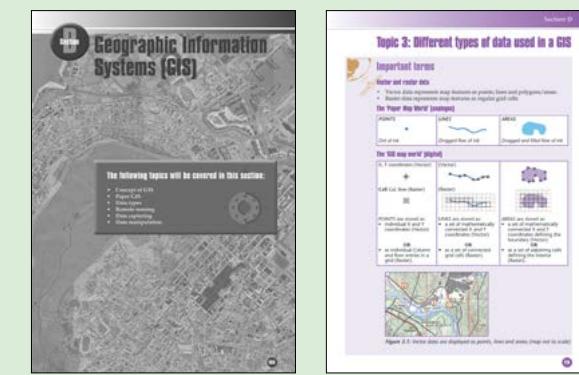

Solutions for all Map Skills gives learners:

- a simple **definition** of what the topic is or what the topic is about
- clear, **step-by-step** explanation of how to master the skills associated with the topic
- useful tips
- **exercises** to practise these skills
- opportunities to **apply** these skills, integrated with the geography topics covered by the CAPS curriculum, with some grade-specific **assessment** questions including **sample exam papers**
- the ability to tackle the mapwork paper in the exam with absolute **self-confidence**
- **sample questions** with worked out answers.

Solutions for all Map Skills includes a DVD containing GIS materials, maps and photos to enhance the learning and teaching in this guide.

Teaching GIS

Solutions for all Map Skills has a section specifically dedicated to GIS written in such a way that the material and concepts can easily be understood. This section teaches GIS by first doing it on paper to get an understanding of the basic principles. Only then do learners move to the related skills, terminology and technology behind GIS.

Solutions for all Secondary Atlas

Solutions for all Secondary Atlas is the ideal atlas for Grade 8 to 12 learners. It is aligned with the CAPS curriculum and reflects all the recent place names and border changes. It offers everything one would expect from a school atlas, as well as:

- an index with cross references to old place names
- content that was compiled with the main recurring themes of the CAPS in mind
- modern cartographic design
- detailed maps of places in the world that often feature in the news, e.g. South-East Asia, the Middle East
- full-colour glossy paper throughout
- a map skills section
- maps, full-colour photographs, statistical data, and explanations in easy-to-read and learner-friendly language.

Sample pages

24 ORTHOPHOTO MAPS

Macmillan uses computers to create orthophoto maps from vertical aerial photographs. An orthophoto map combines a vertical aerial photograph with some of the mapping conventions that appear on topographic maps. Each full orthophoto map sheet covers 3° of latitude and 3° of longitude.

Interpreting orthophoto maps

Some information appears on orthophoto maps that is not included on a vertical aerial photograph:

- Contour lines, spot heights, road names and place names. These features are shown in black on topographic maps.
- Orthophoto maps provide more information about the height and shape of the land by adding contour lines and spot heights. This helps you to imagine the height of the landscape more easily.
- The contour interval is 5 metres on an orthophoto map compared to 20 metres on a 1:50 000 topographic map.

Access to History

Put your trust in the textbook series that has given thousands of A-level history learners deeper knowledge and better grades for over 30 years. Updated to meet the demands of today's A-level specifications, this new generation of Access to History titles includes accurate exam guidance based on examiners' reports, free online activity worksheets and contextual information that underpins learners' understanding of the period.

- Develop strong historical knowledge: in-depth analysis of each topic is both authoritative and accessible.
- Build historical skills and understanding: downloadable activity worksheets can be used independently by learners or edited by teachers for classwork and homework.
- Learn, remember and connect important events and people: an introduction to the period, summary diagrams, timelines and links to additional online resources support lessons, revision and coursework.
- Achieve exam success: practical advice matched to the requirements of your A-level specification incorporates the lessons learnt from previous exams.
- Engage with sources, interpretations and the latest historical research: learners will evaluate a rich collection of visual and written materials, plus key debates that examine the views of different historians.

KEEP CALM AND KEEP LEARNING

The Hilarious Adventures of Teacher Development

Ladies and gentlemen, gather 'round! We're about to embark on a journey more exhilarating than a caffeine-fuelled staff meeting, more rewarding than finding a forgotten chocolate bar in your desk drawer, and more transformative than that first cup of coffee in the morning. Yes, dear teachers, we're talking about the wild, wacky and absolutely essential world of ongoing professional development!

Picture this:

You've just nailed the latest TikTok dance (in front of your learners, no less) and you're feeling on top of the world. But just as you start to wonder if you can ride this wave of coolness forever, reality strikes. Education, like fashion and teenage slang, is always evolving. And just like you wouldn't be caught dead in last season's trends (hello, 80's banana-clip for hair!), your teaching methods need to stay fresh and relevant.

Enter professional development – your trusty sidekick on this adventure. Think of it as the superfood smoothie to your educational diet. Sure, it might look a little green and suspicious at first, but once you take a sip, you're hooked on the benefits.

Why, you ask? Let's dive in:

Stay ahead of the curve

Remember when 'flipped classrooms' sounded like a gymnastics routine? Now it's a standard practice. Professional development ensures you're not just keeping up with the Joneses but leading the parade with pom-poms and confetti.

Unleash your inner tech guru

From smartboards to virtual reality, technology in the classroom is advancing faster than a primary school rumour. Continuous learning helps you harness these tools, so you're not just the teacher who knows how to restart the Wi-Fi but the one who makes lessons as engaging as the latest Marvel movie.

Build a network, not just a staffroom

Professional development workshops are like networking events, minus the awkward small talk. You get to connect with fellow educators, share war stories (we mean teaching strategies), and pick up tips that make your classroom run smoother than a well-oiled pencil sharpener.

Reignite your passion

Let's face it, even the most dedicated teachers can hit a slump. Professional development is the Red Bull for your teaching soul. New strategies, innovative ideas, and a reminder of why you started this journey in the first place can reignite that spark.

Learner success

The ultimate win. When you're growing, your learners are thriving. The latest pedagogical techniques can transform your teaching from good to legendary, making you the hero in your learners' academic stories.

But wait, there's more!

Professional development isn't just a series of monotonous lectures. It's an opportunity to laugh, learn, and maybe even perform a skit or two (drama teachers, we're looking at you). So, embrace the workshops, the seminars, and the occasional trust fall. Yes, it's serious business, but who says you can't have a bit of fun along the way?

So next time you see that email about the latest professional development opportunity, don't hit delete. Channel your inner Indiana Jones, grab your metaphorical whip, and dive in. Because in the ever-changing landscape of education, staying still is not an option.

Remember, keep calm and keep learning. Your future self (and your learners) will thank you.

To grow professionally, choose Macmillan Teacher Campus as your preferred Professional Development partner.

ARTIFICIAL INTELLIGENCE IN THE CLASSROOM

The way that learners learn and teachers teach could be revolutionised by the use of artificial intelligence (AI) in the classroom. AI algorithms can offer tailored criticism and suggestions to learners, resulting in a more interesting and productive learning environment.

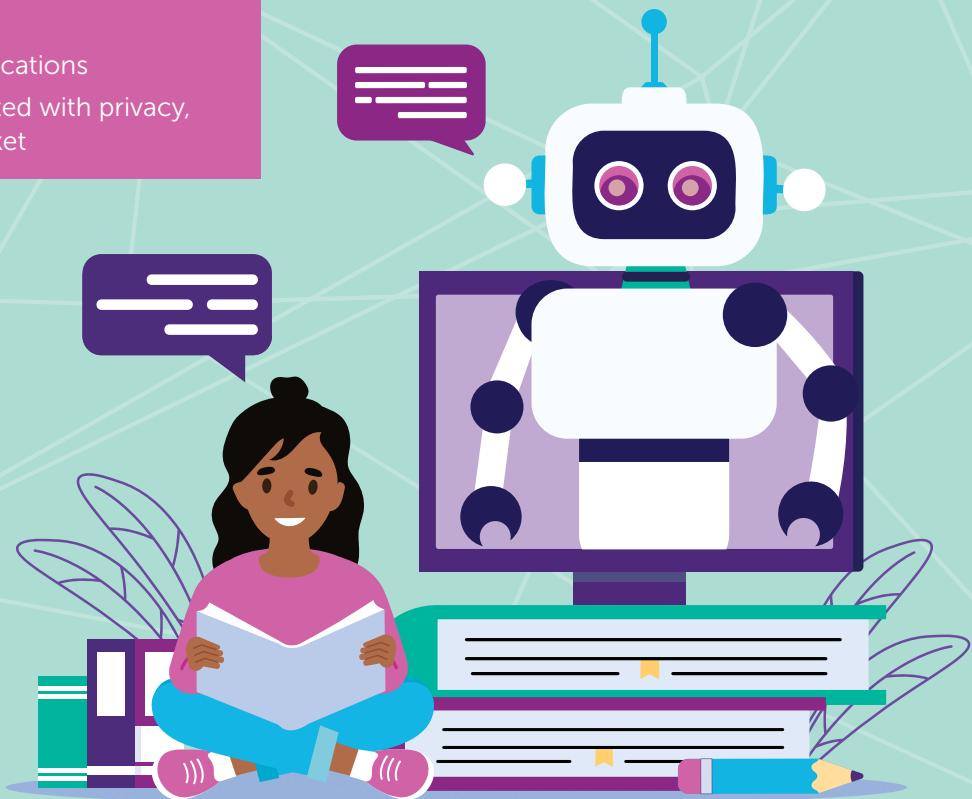

Artificial intelligence is playing a bigger and bigger role in our daily lives, and it has the power to completely change the way we study, work and interact. In the field of education, artificial intelligence has the potential to give learners a more individualised and interesting learning experience and to support teachers in better meeting the needs of each individual learner. Despite these potential advantages, there are still a number of difficulties with implementing AI in the classroom, such as the requirement for technical competence, a lack of resources, and ethical issues.

Advantages of incorporating AI in the classroom

- Learners may benefit from a more individualised learning experience thanks to AI.
- AI algorithms are able to analyse learner data, adjust to their learning preferences, and provide feedback and suggestions that are specific to each learner's needs and aptitudes.
- Teachers can assist learners in developing a critical perspective on AI and better prepare them for the potential and challenges of the digital age.
- Learners develop important 21st-century skills, such as problem solving, critical thinking, and collaboration.

The difficulties of implementing AI in the classroom

- Technical expertise
- Cost of AI tools and applications
- Ethical concerns associated with privacy, security and the job market

Best practices for incorporating AI into the classroom

Best practices for incorporating AI into the classroom can help teachers effectively integrate AI into their teaching practices and provide learners with a more personalised and engaging learning experience. The following are some key best practices to consider:

1

Partner With A Reliable AI Provider

- ✓ Finding a trustworthy AI partner is essential for integrating AI into the classroom successfully.
- ✓ This may be a tech firm, a regional institution, or a nonprofit with a focus on AI teaching.
- ✓ For teachers to successfully integrate AI into their teaching practices, the proper partner can offer support, training and direction.

2

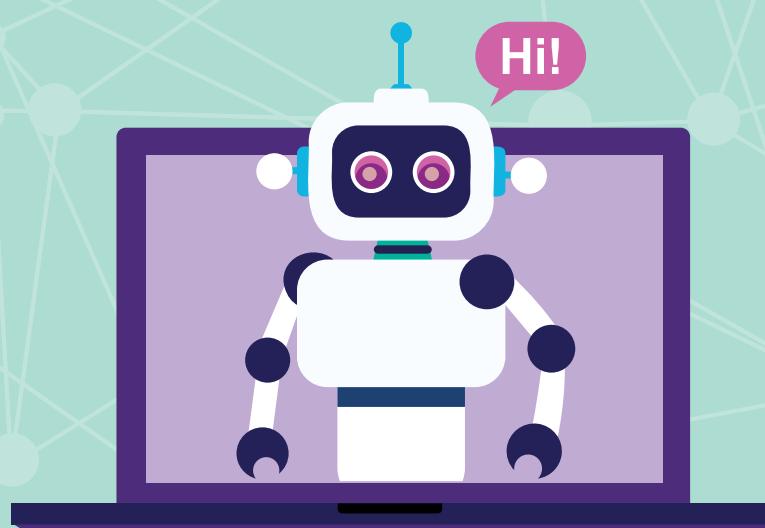

Start Small

- ✓ Rather than trying to implement AI across the entire curriculum, it is recommended that teachers start small and work their way up.
- ✓ This allows teachers to gain experience with the technology, build confidence, and refine their teaching practices over time.
- ✓ For example, teachers could start by incorporating AI-powered learning games into their lessons or using AI algorithms to provide learners with personalised feedback on their assignments.

3

Foster Ethical And Critical Thinking

- ✓ Learners have the chance to develop a critical viewpoint on AI and its effects on society when exposed to AI in the classroom.
- ✓ Teachers should challenge their learners to evaluate the ethical implications of AI and the possible negative effects of its widespread adoption.
- ✓ This can assist learners in developing into responsible, knowledgeable digital citizens who are able to successfully manage the opportunities and problems of the digital age.

MCE Cambridge IGCSE Computer Science

Marshall Cavendish Education Cambridge IGCSE™ Computer Science is a comprehensive two-year programme designed to support learners with their study of the Cambridge IGCSE and IGCSE (9–1) Computer Science syllabuses (0478/0984).

This IGCSE Computer Science series encapsulates the Cambridge Approach into a suite of accessible and approachable learning materials that support blended learning.

It encourages active and inquiry-based learning which helps learners to develop 21st century skills. It is also designed to support learners for whom English is not their first language by using simple and concise language in its content.

Through the engaging chapter openers, colourful illustrations and infographics that convey bite-sized concepts, our series promotes visual learning and delivers an engaging learning experience. Overall, this series enables learners to develop the necessary skills to embrace the rapidly changing technological landscape and become future problem solvers.

Marshall Cavendish Education Cambridge IGCSE™ ICT series is a comprehensive two-year programme designed to support learners with their study of the Cambridge IGCSE and IGCSE (9–1) ICT syllabuses (0417/0983).

This IGCSE ICT series encapsulates the Cambridge Approach into a suite of accessible and approachable learning materials that support blended learning.

Marshall Cavendish Education Cambridge IGCSE™ ICT series promotes visual learning and delivers an engaging learning experience. Difficult concepts are scaffolded and broken down to convey bite-sized concepts, with worked examples to support new learners.

To nurture a 21st century practical problem solver, this series includes real-life scenario-based problems and situations for learners to apply scientific and technological concepts learnt to practical aspects beyond the confines of the classroom.

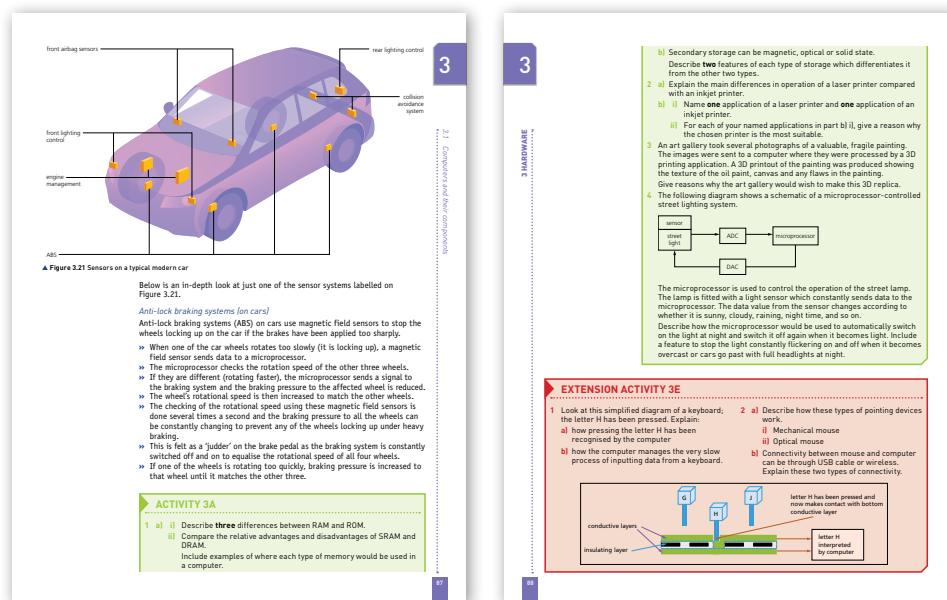

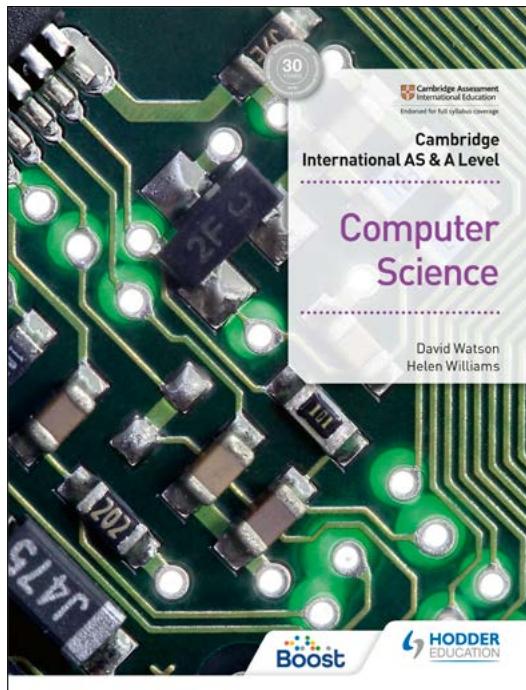

Through engaging chapter openers, the friendly and concise language used, and the visual approach by means of colourful illustrations and infographics to simplify learning concepts, our package delivers an engaging and enjoyable learning experience. This enables learners to develop the necessary skills to embrace the rapidly changing technological landscape and become future thinkers and problem solvers.

Cambridge AS & A Level Information Technology

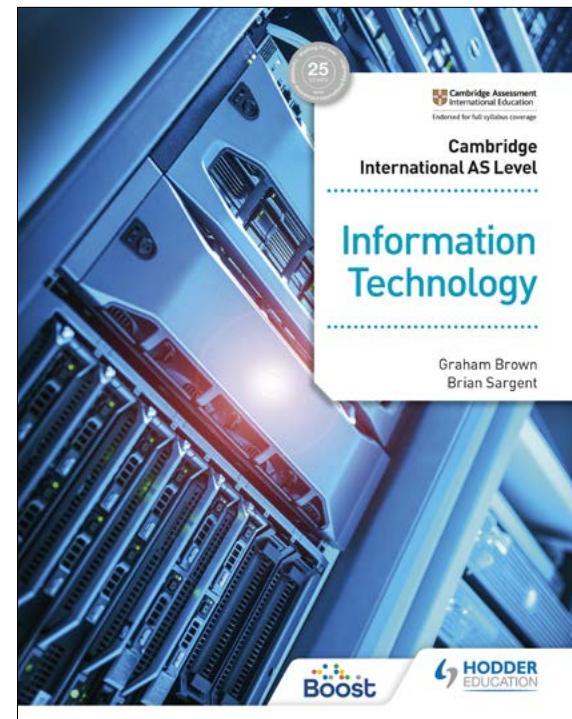

Develop theoretical and practical IT skills with a comprehensive Learner's Book written by experienced authors and examiners.

Learner's Book:

- Improve understanding of concepts and terminology with clear explanations, labelled illustrations, photographs and diagrams, plus a glossary of key terms.
- Develop theoretical and practical skills with a range of exercises, exam-style questions, step-by-step instructions and example answers that all ensure skills are developed alongside knowledge.

Practical Skills Workbook: Support learners' learning with practice questions tailored to topics in the Learner's Book.

- Keep track of work with ready-to-go write-in exercises.
- Ensure all topics are fully understood with practice activities that can be set in class or as homework.
