

FTTX OUTDOOR 144 SPLICE & 12 DROP DISTRIBUTION BOX

Overview

The CF FTTx High Density Splice Fiber Distribution Boxes are outdoor plastic closures designed to offer mechanical protection for cables and splices while managing up to 144 splicing and providing up to 12 fiber local drops. They are an excellent choice for “pass and drop applications” at multiple dwelling units or business parks.

Features:

- Provides secure outdoor environmental protection from dust, insects and other contaminants
- Complete fiber management accommodates a wide range of fiber counts and mounting applications
- Industry standard high impact plastic
- UV Resistant and IP54 (NEMA3S) Rated
- Hinge structure with key lock system (216 tool key lock available)
- Integrated splice tray offers flexible splice management for individual or full splice capacity.
- Splice tray and fiber storage management are integrated into one compartment, but deploy in independent locations which make the fiber routing clear
- Designed to be compact and craft-friendly to lower installation costs and accelerate connections
- All front access allows for easy maintenance and access to cables
- Designed for wall mounting with a pole-mounting kit available
- Can be pre-terminated with fiber pigtails and stub cables (call for details)

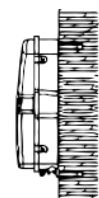

Specifications:
