

PLINTH TABLE
LOW - MARBLE, GREY GALAXY
Designed by *Norm Architects*

Equal parts beautiful and timeless, the Plinth Collection comprises multi-functional podiums for every space, as a standalone sculpture or platform to elevate objects. Profiling the beauty of natural materials and uncompromising craftsmanship, each is precision assembled to reveal the inherent beauty and uniqueness of the material. Perfectly symmetrical, the sharp, clean silhouette of the design stands in striking contrast to the unique veining and patterns of the textural Kunis Breccia stone and light-reflecting marble, offered in five unique varieties, used to create the design.

PRODUCTION PROCESS

2 cm thick marble plates are cut and edges are milled at 45-degree angles before all five plates are glued together in mitre joints. Corners are reinforced by reusing excess marble from the production. The bottom plate is made from plywood, where the adjustable glides are fastened. Being composed of a natural material, each product is unique and the surface may nuance compared to the images.
