

Key Instant Recall Facts Year 6 Spring 1

I know fraction, decimal and percentage equivalents.

	1 100% one whole
$\begin{array}{ c c c c c }\hline & \frac{1}{2} & \frac{1}{2} \\ \hline \end{array}$	0.5 50% one half
$\begin{array}{c c} \hline \\ \hline $	0.33 33.3% one third
$\begin{array}{ c c c c c c c c c c c c c c c c c c c$	0.25 25% one quarter
$\frac{1}{5} \frac{1}{5} \frac{1}{5} \frac{1}{5} \frac{1}{5}$	0.2 20% one fifth
111111	0.125 12.5% one eighth
	0.10 10% one tenth

Example Questions

Can you work out 10% of an amount? What do you have to divide by? How can you work out 1% of an amount? What do you divide by? What is this as a fraction?

Activity Suggestions

Look at percentage increases and decreases when you are shopping. What is the new price after a sale? How much difference would there be if the percentage off was greater?

When you are culting up cakes or pizza, what fraction/percentage do you eat? What is left?
