RESEARCH SUPPORT

Funded - Ongoing

Title: *Research Scholar Grant “The Vaccines for Children Program and HPV Vaccination among Medicaid/CHIP Enrolled Children in Texas: Public Health Impact and Areas for Improvement”*

Role: Principal Investigator (26% FTE)

Sponsor: American Cancer Society

Duration: 09/01/2025 – 08/31/2029

Amount: \$946,000

Summary: We use a mixed methods approach that integrates advanced spatial modeling using claims and vaccine registry data and cognitive task analysis-based focus groups to investigate access to affordable HPV vaccination through VFC. We aim to quantify spatial accessibility and

understand how eligible individuals navigate informational and social barriers to vaccination.

Title: *Greater Value Portfolio* “Optimizing Value and Outcomes of Palliative Radiation for Bone Metastasis”
Role: Multiple Principal Investigator (15% FTE) (MPIs: *Hu/Suk*)
Sponsor: The Donaghue Foundation
Duration: 01/01/2026 – 12/31/2027
Amount: \$550,500
Summary: This project leverages real-world data (claims and EHR) to integrate causal machine learning (ML) with microsimulation for estimating heterogeneous treatment effects (HTE) of advanced palliative radiotherapy in metastatic cancers, identifying patient subgroups most likely to benefit and evaluating the value using distributional cost-effectiveness analysis.
