

GREEN SOUTH
ENERGY SOLUTIONS

CAPABILITY STATEMENT

ABOUT OUR COMPANY

Green South Energy Solutions is a building envelope specialty contractor dedicated to optimizing energy efficiency via expert air sealing. With a proud legacy of enhancing over 2,000 homes, our strong reputation is underscored by a five-star customer review rating. Our proficient teams are well-versed in building science and safety protocols. Leveraging state-of-the-art tools, we ensure exceptional management and unparalleled quality.

With over 15 years of industry experience, our leadership boasts a successful trajectory in the construction domain, particularly emphasizing sustainable design and methods. We've skillfully handled projects of diverse scales and specifications, including those certified under Energy Star, PHIUS, ZERH, and LEED.

OUR MISSION

At Green South Energy Solutions, we champion your sustainable construction projects. We are grounded in positive and honest business relationships, with a relentless pursuit of refining our methods to deliver consistent and guaranteed air sealing results using industry leading technology. Through clear communication, with a commitment to safety and building science education, we set and achieve high standards. We define success by setting clear expectations for every project and working diligently to meet or exceed those expectations for our clients.

WHOM WE SERVE

Our air sealing services have proven effective for both commercial & residential builders, with specific success for the following businesses:

- ✓ Large homebuilders looking for cost effective & guaranteed solutions to reach any ACH50
- ✓ Custom homebuilders that need effective air sealing for complex building structures
- ✓ Multifamily builders that require consistent compartmentalization between units
