AI-Powered Compliance Maps

4CRISK's Guide To Al Deployment

AI-Powered linkages between your obligations and your internal framework

4 Steps to Revolutionizing Your Compliance Mapping Process

4CRisk can do this 40 X faster by generating a Compliance Gap Assessment in minutes, by comparing your external obligations (i.e. regulatory or third-party obligations), to your internal documents, such as in-house policies, procedures, risks, controls to standard contracts or frameworks

4CRisk can do this 2 X faster by presenting maps with pre-sorted and information, that your teams can easily review and discuss, and confirm. Teams can make edits using their subjective judgement

4CRisk can do this 2 X faster by integrating with your Issue Management systems, populating key information for the SMEs responsible to make changes

4CRisk can do this 40 X faster by generating a Compliance Gap Assessment in minutes, by comparing your external obligations (i.e. regulatory or third-party obligations), to your internal documents, such as in-house policies, procedures, risks, controls to standard contracts or frameworks
