Conditions of Sale

1. PRICES

All prices shown herein are subject to the addition of GOODS AND SERVICES TAX (GST).

2. RETURNS/ CREDITS/ RESTOCKING FEES

All products returned for credit having been correctly supplied against customer order, and returned freight paid to Acuflo Levin within 30 days of original supply, are subject to a minimum of 20% restocking fee, calculated from the invoiced value excluding freight, and being subject to Acuflo assessing the products returned are unused and "as new and in resaleable condition".

All items supplied which have been manufactured or imported as result of a customer's requested specification or imported against a customer's specified supply contract quantity will be deemed as strictly non-refundable.

3. WARRANTY

The product Manufacturer warrant to the purchaser of their products, for a period of one (1) year from date of original purchase for use, that any defective product proved to be caused by faulty workmanship or faulty materials, when correctly installed and used in a normal manner, will be repaired or replaced at the Manufacturer's factory, or Acuflo Industries Limited, Levin, with transport charges prepaid. This warranty does not apply to damage or malfunction resulting from accidents, damage in transit, misuse, or neglect. No allowances will be made for labour, removal or reinstallation of any so-claimed defective products.

4. TERMS & CONDITIONS

All orders supplied against this price list are done so strictly against Acuflo's Terms and Conditions of Trade document sighted and agreed to when opening a credit trading account. Additional copies are available upon request.

WHILST EVERY EFFORT WILL BE MADE TO MAINTAIN PRICES LISTED HEREIN, CIRCUMSTANCES BEYOND OUR CONTROL MAY REQUIRE AMENDMENTS WITHOUT PRIOR NOTICE

INGROUND BOXES

Acuflo Meter Boxes have been the industry standard for 30 years. Quality engineered design using UV stabilised, recyclable polypropylene materials. Available in **Midi** and **Jumbo** sizes. Each size offers three different heights to suit various applications.

Outward taper design prevents uplift and allows stacking to reduce freight costs. The wide base flange provides load bearing stability. Boxes can be fitted with selection of standard coloured lids. Personalised lids and colours available on request and may be subject to minimum order quantity.

Pedestrian Midi Boxes

The Midi Box range is suitable for 20mm inline water meters 20 & 25mm manifold meters and manifold meter assemblies.

Pedestrian Jumbo Boxes

Acuflo's Jumbo Meter Boxes follow the Midi Box design philosophy, only bigger. Jumbo boxes are suitable for larger assemblies and in-line water meters. Maximum of three manifolds can be installed in one Jumbo box using the 3-pce Jumbo base. Multi-port distribution manifolds can also be accommodated, up to 3 outlets.

JUMBO BOX 200 TALL

Trafficable Mega Boxes

Mega boxes are suitable for multi-port distribution manifolds and large sized water meter assemblies. Boxes capable of withstanding minimum 2600kg wheel load. Constructed from high strength fibre reinforced SMC, making them lighter than comparable iron or concrete lids. SMC material is UV and corrosion resistant and AMR radio compatible.

BOUNDARY CONNECTIONS

Manifolds and Meter Manifold Assemblies

Dual Check Manifolds are AS/NZS 2845.1 compliant and provide a fast, low cost, universal installation combining isolating valve, strainer and dual check cartridge in a single boundary connection. They allow a universal co-axial OIMLR49 water meter to be easily retro-fitted. Available in DZR, lead free brass or composite materials. Security valve options are available which prevent tampering of meters and flow controllers but still allow customer to isolate their supply.

DUAL CHECK MANIFOLDS

In-Line Meter Assemblies

In-Line meter assemblies consist of an isolating valve, spacer tube and dual check meter tail. The spacer tube is available in two lengths, 154mm and 165mm. It is a temporary installation, allowing water supply during development and is replaced with a water meter by local water authorities. All components are AS/NZS 4020 compliant.

Flow Control Manifolds & Assemblies

Flow Control Dual Check Manifolds are AS/ NZS 2845.1 compliant and provide a means of limiting the water supply from 0.4 lpm to 70 lpm.

All GFC and CFC product is fitted with an additional 456-micron stainless steel mesh filter fitted inside the cap and a security tag is fitted between cap and manifold.

Testable Flow Control Assemblies are a flow control, dual check manifold fitted with a test port & isolating valve, downstream of the manifold. Closing the downstream valve allows for quick and easy testing of flow rate.

Testable Backflow Prevention Assemblies

Testable Backflow Assemblies combine a Wilkins 350 series double check backflow preventer with choice of Acuflo manifold and downstream isolating valve. Manifolds are fitted standard with 400-micron filter cartridge which is easily serviced from above ground, eliminating need for y-strainers.

Assemblies can be built to specific requirements by adding any combination of flow controller, Sensus 620 meter or y-strainers. To prevent tampering a security valve option is available

Backflow assemblies are available for inline water meters. Price on Request
