

The Parent/Teacher Literacy Resource

Joyful Reading Success at Home

Building a Parent-Teacher Partnership for Proven Student Success:

- Practice Skills for Grade Level Mastery
- Prepare Preschoolers for K Success
- Prevent Summer Reading Loss (K to 3)

**Tips and Tools for Parent
Coaching | Fun Filled Games
for Children Learning**

What is the highlight of this Resource?

This Resource is designed to complement the book *Born to Read: Parents Make a Difference*. Each section of this Resource includes the relevant Chapter from Janet's book which can also be downloaded free from the website in its entirety.

[Download the Book ↗](#)

Who is the creator behind the Resource?

Dr. Janet Mort was honoured with the Order of BC in 2020 for her exceptional service to children and their literacy success - her lifelong passion as teacher, principal and superintendent. The collection highlights the expertise of teaching members of her Joyful Literacy Team. Visit joyfulliteracyonline.com for more details.

Why is parent involvement so important?

Parent involvement is one of the top predictors of literacy success.

- Teachers value **parent support** especially when children are challenged.
- Children thrive when parents and teachers **work in harmony**.
- This Resource is designed by **literacy experts**.
- It is research-based featuring the **most essential foundational skills**:
 - the alphabet;
 - phonological awareness;
 - word study;
 - comprehension;
 - fluency; and
 - writing

This Resource is created especially for parents to promote and support a love of reading and therefore reading success for children in their homes.

How will the Resource benefit children at home? Many ways!

1. Summer Reading Boost

Fact: Early Learners lose about 20% of their literacy gains during the summer break. Regular playful practice of foundational skills and daily reading experiences will maintain hard-earned reading success.

2. Parent Coaching for Grade Level Success

Fact: Over 30% of Early Learners do not read at grade level by the end of grade three; however, over 90% are capable of reading at grade level. Extra practice has proven to be the solution. Teachers do all they can in classrooms; a partnership with parents will make all the difference.

3. Preschool Readiness for Kindergarten

Children who enter kindergarten knowing the alphabet and loving books are well on their way to reading at grade level. Parents, grandparents and older siblings will be perfect literacy practice-partners given the right tools.

4. Home-schooling for Online Families

This Resource provides a sequential literacy curriculum and all the literacy resources needed for a dynamic literacy experience in a home environment.

5. Hundreds of Home-based Activities

Children who are challenged with reading need something that is very simple - extra playful practice. Teachers teach the necessary skills at school every day but some children just need extra practice to master the skills. When parents, siblings or other family members practice with them at home. Other offerings in the Resource provide:

- Hundreds of fun games and activities using simple 'kitchen' and outdoor activities children love,
- Links to recommended family-friendly web sites,
- Daily read-aloud suggestions,
- Checklists to track successes, and
- Helpful videos that support family coaching activities.
