FLEET MANAGER

Online Ship-to-Shore Communications

The **central workspace** for modern vessel oversight.

Fleet Manager gives ship managers and superintendents a single online dashboard to see what's happening across their fleets in real time.

It combines chart status, routing insight, and live tracking data in one secure browser-based platform — accessible anywhere, on any device.

ADVANCED ROUTING & NAVIGATION

- **Port-to-Port & Point-to-Port Routing** – Automatic shortest-path route generation with waypoint control.

- **Areas-to-Avoid & ECA Optimisation** – Smart routing to minimise emissions and regulatory exposure.

- **Accessed ENC** – Instantly review all ENCs on intended vessel's planned routes.

- **Advanced Routing Capabilities** – Evaluate multiple routes, import known vessel routes, and assess safety margins.

- **Ship-to-Shore Communication** – Automated upload of Passage Plans and Chart Update Reports to Fleet Manager for superintendent review.

FLEET TRACKING & MONITORING:

- **Live Tracking & Scheduled Tracking Service** – Real-time and interval-based position reporting for all vessels.

- **Competitor Insights** – Monitor comparable vessels or fleets for benchmarking and situational awareness.

- **Guard Zone Monitoring** – Define custom zones and receive **SMS / Email alerts** when vessels enter or leave.

- **Quick-Access Favourites** – Tag frequently viewed vessels for instant access.

DYNAMIC MAP LAYERS

- **5-Day Weather Forecast Picker & Particle Animation** – Visualise wind, swell, rain, pressure, and temperature.

- **Piracy Overlay** – View live high-risk zones and incident reports.

- **Ports Overlay** – Identify port locations, approach routes, and anchorage details.

- **AIS Overlay** – Review worldwide vessel traffic in real time.

SEALL continues to bring its cutting-edge, innovative product line to the international marine markets, including leisure, workboat, and commercial.

Now powering over

60,000

licensed products globally.

Our smart, user-friendly technology simplifies the display, management, and sharing of navigational data, making critical information more accessible. That's why Seall is the trusted technology partner for modern maritime solutions,
