## SEO CASE STUDY

# From INVISIBLE to #1 on Google For National & Local SEO Keywords

**Client Business Name:**

LA SHEAR

**Business Location:**

Los Angeles, California

**Client Name:**

Mike Johles

**Client Website:**

<https://lashear.com/>

**Goal:**

Find keywords that can generate profit for client, and go for the #1 position on Google for those keywords.

# SEO process - start

The first thing we always examine is the **NATURE of the clients business**. We want to see WHO his clients are so that we can adapt the strategy to GET new prospects, leads and clients.

The client is **selling Japanese shears to hair salons and hair stylists**. He also sells other equipment for hair salons, but 90% of his business is based on Japanese shears.

So his business is:

1. **Mainly local** - where he would come to the prospects salon and demonstrate several Japanese shears
2. **National** - he can also sell Japanese shears via phone if someone from some other city would call him, so he can help him/her buy Japanese shears over the phone

So we were **targeting BOTH local and national keywords**.

That is THE hardest SEO strategy because you need to create **SEPARATE pages for LOCAL and NATIONAL keywords**.

But we'll get to that later.

So here's **how we applied our SEO SCOOP system**.

## SEO SCOOP SYSTEM:

**S - specify**

**C - core**

**O - on-page SEO**

**O - off-page SEO**

**P - progress**

# S: Specify

Right now - we're **defining the keywords that we want to go after** (keywords we want to rank #1 on Google for).

Our main keyword is:

**“Japanese shears”**

Because **that's what the client is selling**, but that is a NATIONAL keyword. So when someone from Chicago (or any other city in the US) searches “Japanese shears”, - we'll be there.

We want to make sure that we **cover the LOCAL searches and keywords as well** because the client is based in LA, and also sells locally.

So we want to focus on “Japanese shears LA / Japanese shears Los Angeles” keywords as well.

That way, we're **covering NATIONAL searches**, when someone from Chicago, San Diego, New York searches for “Japanese shears”, but we're also **DOMINATING local search results** when someone searches for “Japanese shears LA” or “Japanese Shears Los Angeles.”

Since the client is **selling Japanese shears both LOCALLY and NATIONALLY** (via phone) - it makes sense to go for both.

So we've **defined our main keywords**.

It's time for the next step.

# C: Core

In this step, we **want to make sure that the technical foundation** is solid so that Google can INDEX our website the right way.

## Here's what we did:

1. We created Google Search Console so that our new pages get indexed ASAP and that we're able to track if any issues are preventing us from rankings
2. We created Google Analytics so that we can track our progress
3. We have optimized our robots.txt to make sure we're not BLOCKING any pages
4. We did a SPAM link disavow because some spammy backlinks were pointing to our website
5. We fixed a few shady redirects that were pointing to pages that don't exist anymore
6. We removed duplicate content because multiple pages were ranking for the same keywords, and we separated them
7. We performed "speed optimization" so that our website can run as fast as it can - faster website = better rankings

**Once our technical foundation is TIGHT - it's time for the next step -** content and on-page SEO.

# O: on-page SEO

So the next thing we had to do is **create BETTER content for our targeted keyword than ANYTHING that's ranking right now.**

To BE #1 on Google, we had to have better content than what was ALREADY ranking number #1.

So we Googled “Japanese shears” and “Japanese shears LA / Japanese shears Los Angeles” to see what was ALREADY ranking.

**Top 8 Best Japanese Scissors |ADDICTED**

Top 8 Best **Japanese Scissors** · 1. Yasaka Offset Haircutting Shears · 2. Fuji More Z GGF · 3. Kamisori Sword Barber Scissors · 4. Yamato Royal · 5. Juntetsu Offset ...

We found a content article that said, "Top 8 Best Japanese Scissors". **We needed to create content that's better than that.**

We decided to create a really interactive, **in-depth article on the "Top 10 Best Japanese Shears in 2021" (better than “Top 8 Japanese Scissors”)**.

Competitors have 8. Let's be better and go for 10.

So did that.

We created an in-depth article on "Top 10 Best Japanese Shears in 2021".

Top 10 Best Japanese Shears in 2021

by lashear2020 | Nov 4, 2020 | Japanese Shears | 0 comments

## BEST SELLING JAPANESE SHEARS

We **applied the same process to LOCAL keywords** (Japanese shears LA / Japanese shears Los Angeles).

**We created content that was...**

- Better
- More in-depth
- Longer

... then ANYTHING that was already RANKING for that keyword. **We've beaten them in every form and way.**

Now that we created better content - it's time to **do on-page SEO.**

## Here's what we did:

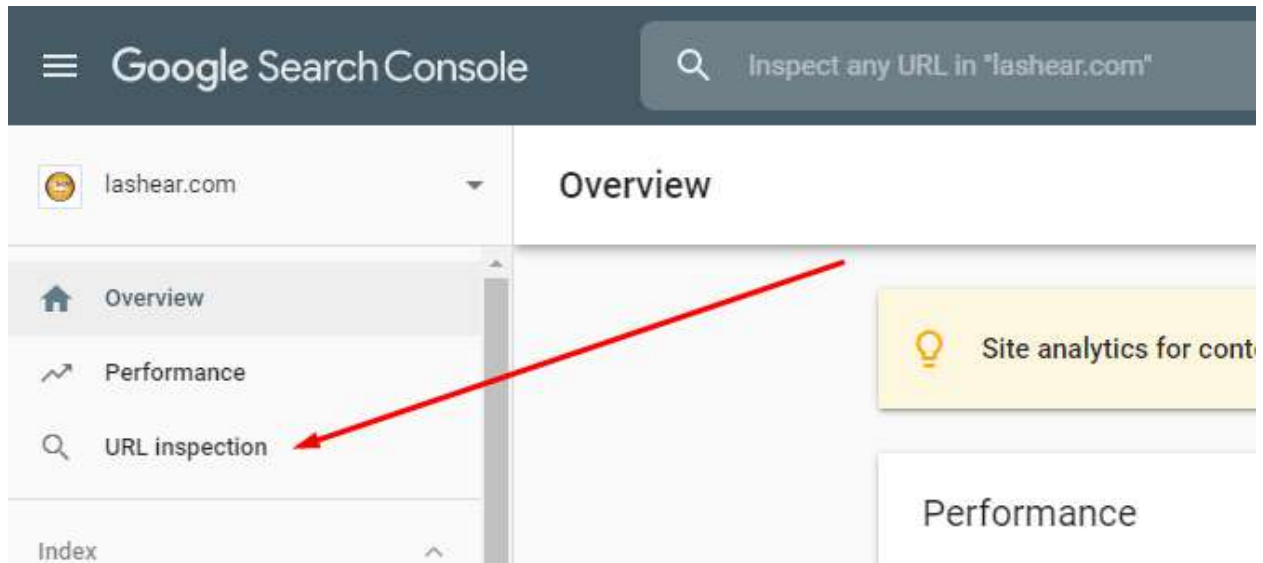

1. We optimized our h1 tag (only 1 per page)
2. We optimized our subheading
3. We inserted our keyword 3-4 times in the paragraph
4. We created SMART meta titles and descriptions
5. We double-checked for any dead links
6. We added ALT tags to all the images
7. We optimized and reduced the sizes of all the images
8. We made our keyword stand out a few times by making it bold
9. We created a plan for INTERNAL linking
10. We optimized our Google My Business for those keywords as well

We were **SEO-ready**, and our content was **LIVE!**

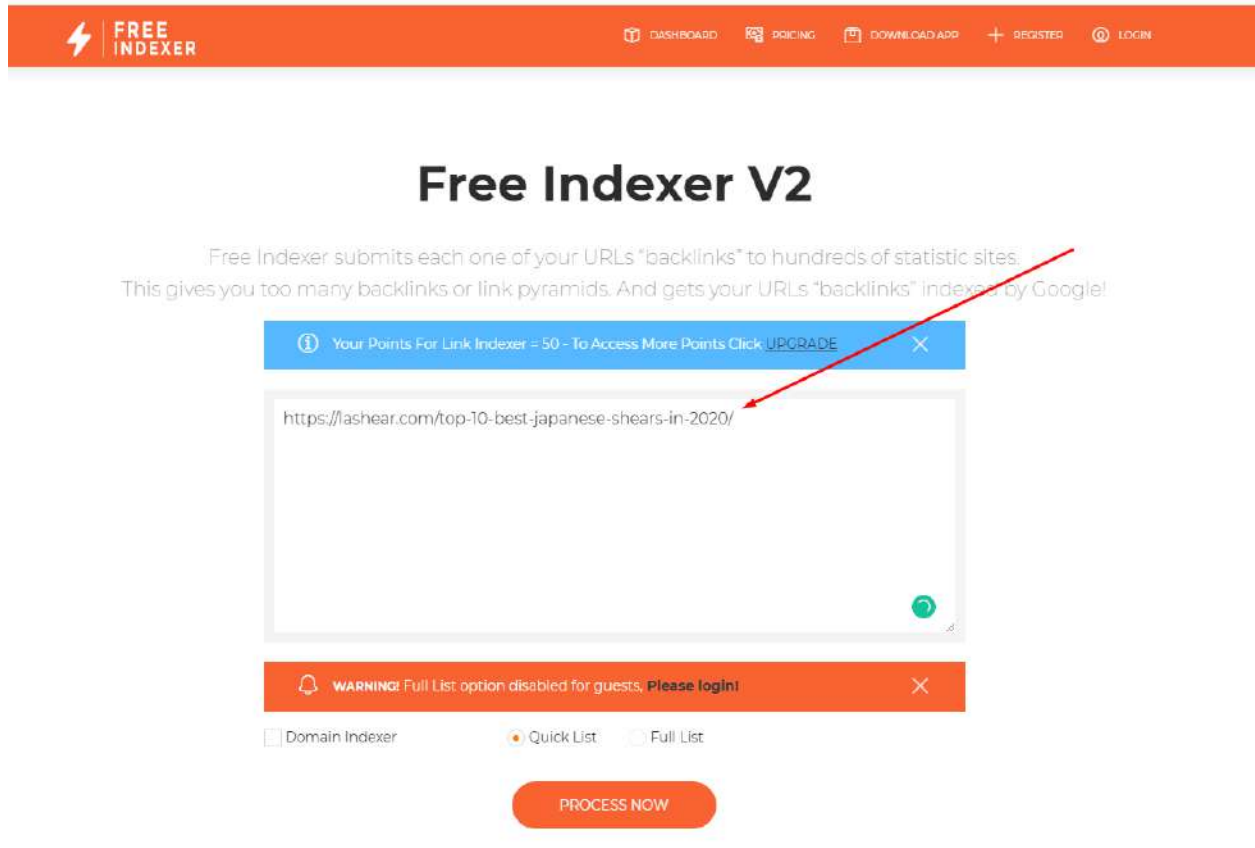

Also, as soon as we published the content, **we did two things:**

**1. Request indexing on Google Search Console**, so we don't have to wait for Google to FIND our content. This way, we're asking for Google to index this page, so we start ranking ASAP.

**2. We used our rapid indexing tool** to create some backlinks so that Google can CRAWL our website as fast as possible.

The screenshot shows the 'Free Indexer V2' interface. At the top is an orange navigation bar with the 'FREE INDEXER' logo and links for DASHBOARD, PRICING, DOWNLOAD APP, REGISTER, and LOGIN. Below the navigation bar is the title 'Free Indexer V2'. A text block explains that the tool submits URLs to hundreds of statistic sites to get them indexed by Google. A blue notification bar at the top of the main content area states 'Your Points For Link Indexer = 50 - To Access More Points Click UPGRADE'. Below this is a text input field containing the URL 'https://ashear.com/top-10-best-japanese-shears-in-2020/'. A red arrow points from the 'UPGRADE' link in the notification bar to the input field. Below the input field is an orange warning bar that says 'WARNING! Full List option disabled for guests, Please login!'. Underneath the warning bar are three radio button options: 'Domain Indexer' (unchecked), 'Quick List' (checked), and 'Full List' (unchecked). At the bottom is a large orange button labeled 'PROCESS NOW'.

This way, **we're SHAVING MONTHS off our SEO process** because we don't have to wait for Google to stumble upon our content. We're SPEEDING up the indexation part.

Once our **content is done and our on-page SEO is tight - it's time to focus on off-page SEO (backlinks).**

# O: off-page SEO (getting backlinks)

Off-page SEO means **getting backlinks**.

**Backlinks are essentially links from other websites.**

You can view them as votes. **The more HIGH-QUALITY VOTES a website has, the better it ranks.**

But it's not as simple as that.

In backlinks, it's all about **QUALITY**.

You can go to Fiverr and buy 50 000 backlinks for \$5. And after that, you can say goodbye to ranking on Google because Google will penalize you.

**You want to get a decent amount of high-quality backlinks with the correct anchor text to the right SEO page.**

Here's an example of HIGH-quality backlink.

*Chris Oseh, freelance medical writer on Kolabtree, lists the top 20 medical journals for physicians to publish in, ranked by impact factor and readership.*

Medical researches and breakthrough discoveries are usually published in medical journals for the public to access. Most physicians prefer to publish their research work in high-authority medical journals because of exposure to a wider audience and the credibility linked to authors published in high impact medical journals. **Getting published** is often a step towards career advancement for physicians and medical doctors.

Credible medical journals are rated according to their impact factor and their peer review process. An impact factor shows the number of times articles in a journal have been cited in a year. Medical journals with high impact factors are more influential in a general or specific area of medicine. Getting published in a journal is a complex and time-consuming task: identifying a research topic, conducting research and collecting data, writing the manuscript, identifying a journal, editing and formatting the paper, getting it reviewed. To make it easy for physicians to immediately understand the top medical journals that doctors aim to publish in, here's a list of high impact medical journals and their key features.

## **The 4 biggest mistakes people make with backlinks are:**

**1. Focus on quantity.** Shitty backlinks will do you no GOOD and are a great way to get your website penalized by Google.

**It's also CRUCIAL to DRIP your backlinks slowly.** If you get 1 000 backlinks in one day, you'll get penalized by Google.

You want to go for a **few quality backlinks EVERY week** because that's what's called a "natural backlink progress".

## **2. The second biggest mistake is people getting NO FOLLOW backlinks.**

There are two types of backlinks. **"Do follow", which contributes to SEO, and "no follow" backlinks, which don't contribute to SEO.**

So people are like, "LOOK, I got 20 high-quality backlinks." And then we're like, "dude - they're no follow. They won't do you any good".

**3. They don't use the correct anchor text.** Anchor text is that blue text that the backlink is linked to. It's those 1-2-3-4 words that you're taken to a different website when you click on them. That's the anchor text.

The biggest mistake people make is they make anchors that are brand names. Now, why is that a mistake? Because with anchor text, you're telling Google what keyword that backlink is connected to. So if your anchor text is your brand name, your rankings for your brand name will increase.

"But where's the problem there?"

You're already ranking for your brand name. That doesn't make any sense to increase your rankings for your brand name.

**You want your anchor text to be your target keyword.**

So if you want your rankings to grow for "Japanese shears," then your anchor text should be "Japanese shears." If you want your rankings to increase for "Japanese shears Los Angeles", your anchor text should be "Japanese shears Los Angeles."

**4. The fourth biggest mistake is they send backlinks to the home page, but the SEO page is not the home page.** If your anchor text is "Japanese shears," you want a backlink to point to your Japanese shears page (<https://lashear.com/top-10-best-japanese-shears-in-2020/>), and not your home page, because you're not looking to rank that page. You're looking to rank your SEO page ([lashear.com/top-10-best-japanese-shears-in-2020](https://lashear.com/top-10-best-japanese-shears-in-2020/)).

If your anchor text is "Japanese shears Los Angeles," you want your backlink to point to the "Japanese shears Los Angeles" SEO page of your website - <https://lashear.com/japanese-shears-los-angeles/>. **Every SEO page has its own anchor text. You want your backlink to point to your SEO page and not the home page.**

So it's not as simple as getting AS MANY BACKLINKS AS YOU CAN.

**Get high-quality, do-follow backlinks every week, with the correct anchor text to the right SEO page - and that's the recipe for long-term SEO success. That's what we do for our clients.**

And that's also where our most significant competitive advantage is.

**We have our OWN network of 74 high-quality websites we use to send backlinks to our clients, for free.** So we can send high-quality, do-follow backlinks to our clients every week - with the correct anchor text.

Check this out. An average price of a **high-quality backlink is \$352, according to Ahrefs.**

And we send about **20 high-quality backlinks to each one of our clients EVERY single month - for FREE.**

**That's \$7,000 worth of value/mo (and our clients get it for free).**

So we don't leave it to chance and hope that some random high-quality website will give us a backlink, because the truth is - it won't.

No one will give you a backlink for free. Why would they? Trust me, we tried.

We've sent thousands of outreach emails, and no one will EVER give you free backlinks.

They're not idiots; they know the value of backlinks. Some of them will SELL you a backlink for \$500, but no one will give it to you for free.

**So our biggest competitive advantage is that we have our OWN network of high-quality websites we can use to send high-quality backlinks to our clients for free, every single month. No additional fees. \$7,000 in value - every month. For free.**

We don't have to beg or pay anyone. Instead, we create a backlink, and voila, rankings increase.

No risk, no additional fees. But this only works if we have:

1. Chosen the right keyword
2. Have a solid technical foundation for SEO
3. Have the best content and the RIGHT on-page SEO

**And you get \$5,000-\$10,000 worth of backlinks every month for free from us.**

All the websites from our network are clean, never been penalized or deindexed by Google, and we bought them on GoDaddy auctions for hundreds (sometimes even thousands) of dollars.

So we have a high-quality backlinks FACTORY we can leverage to increase our Google rankings EACH AND EVERY MONTH. Without ANY additional fees.

**And that's what we did with LA SHEAR. So here's the process:**

- Define the right keywords (Japanese shears, Japanese shears LA / Japanese shears Los Angeles)
- Make sure you have a solid technical foundation to build upon
- Have the best content out there and the best on-page SEO
- Have a good backlinks strategy (backlinks from a high-quality website, with the right type of backlinks - do follow, correct anchor text and the right SEO page)

And the rankings start increasing.

Let's get to the final part.

# P: Progress

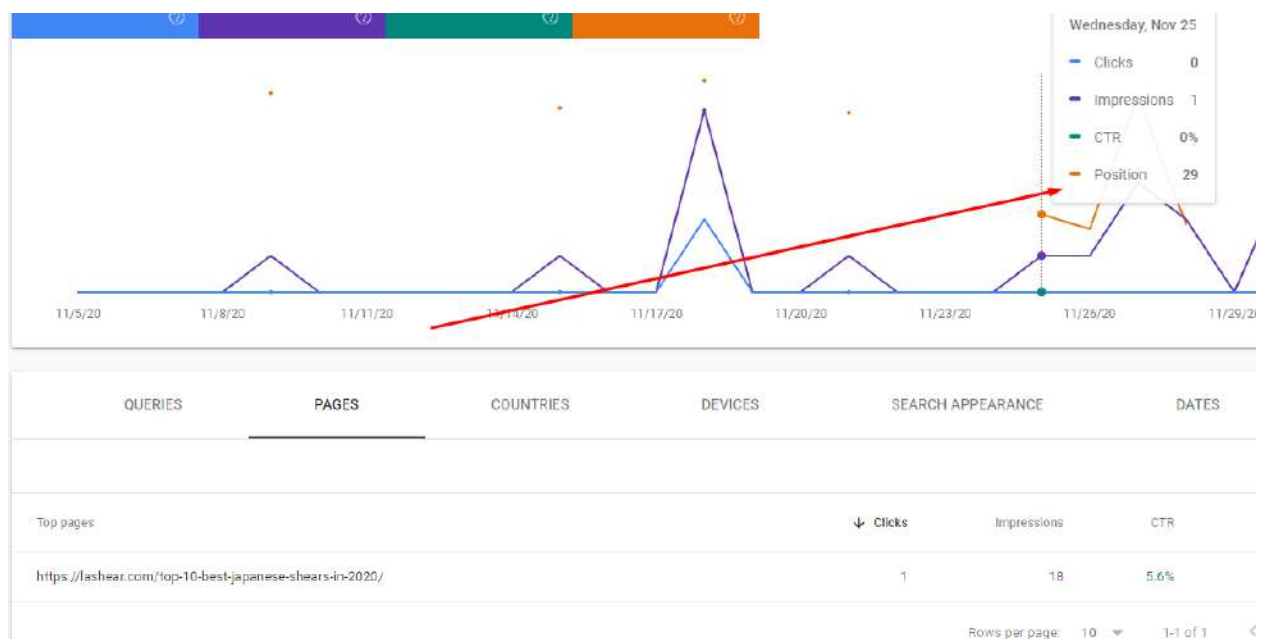

This is the **part where we track our progress.**

**We follow how our rankings are increasing over time.**

We're following the progress in Google Analytics, Google Search Console, Ahrefs, and other SEO software.

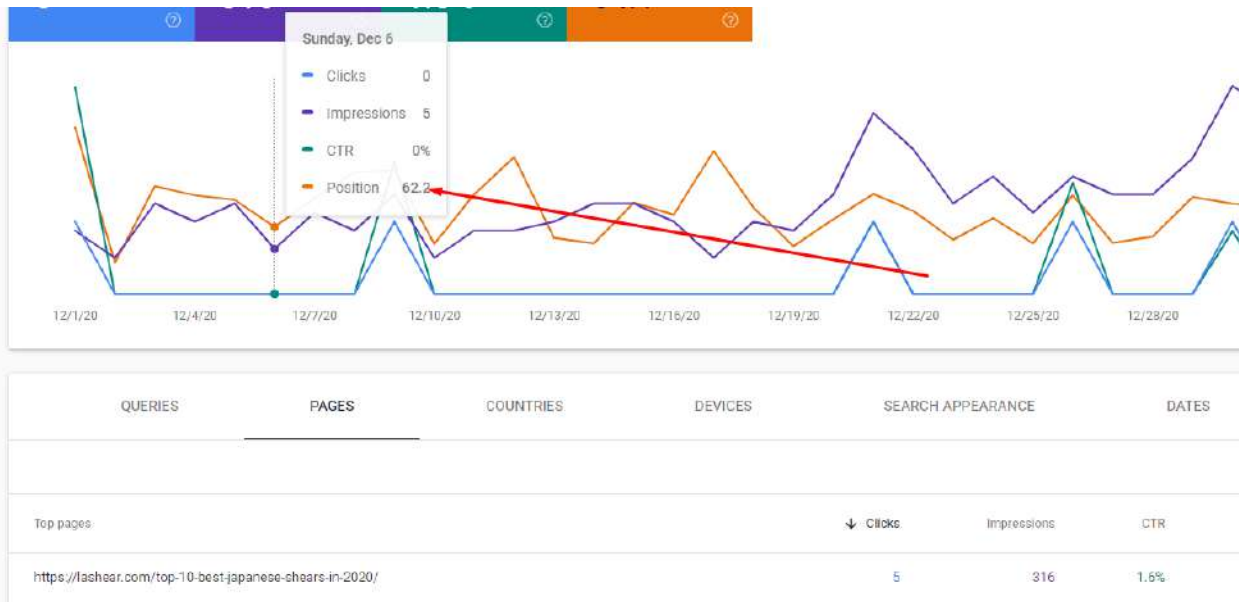

So, here's the path for GROWTH for the "Japanese shears" keyword.

**We first ranked in November in position number 29 (but only for a small amount of searches, not all).**

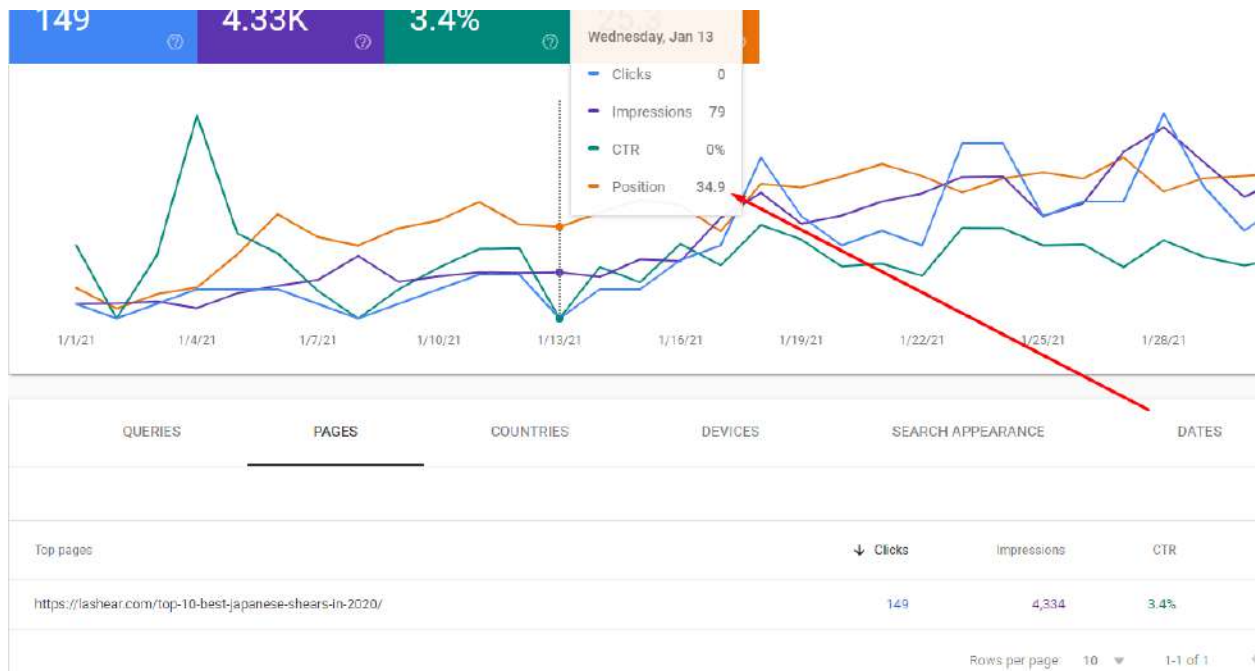

In the beginning, **positions (Google rankings) go up and down all the time.**

In December, we were in position 62.2.

And then, from there - **we went to position number number 34.9 in January.**

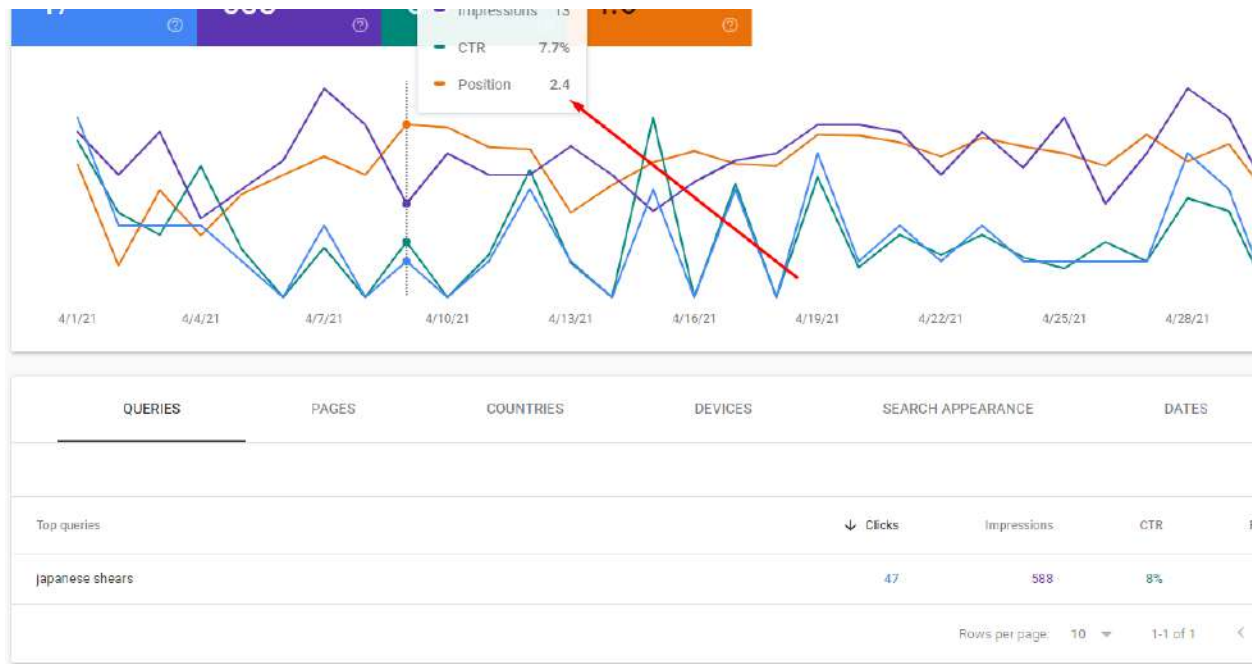

Then in February, **we got to position 16.2.**

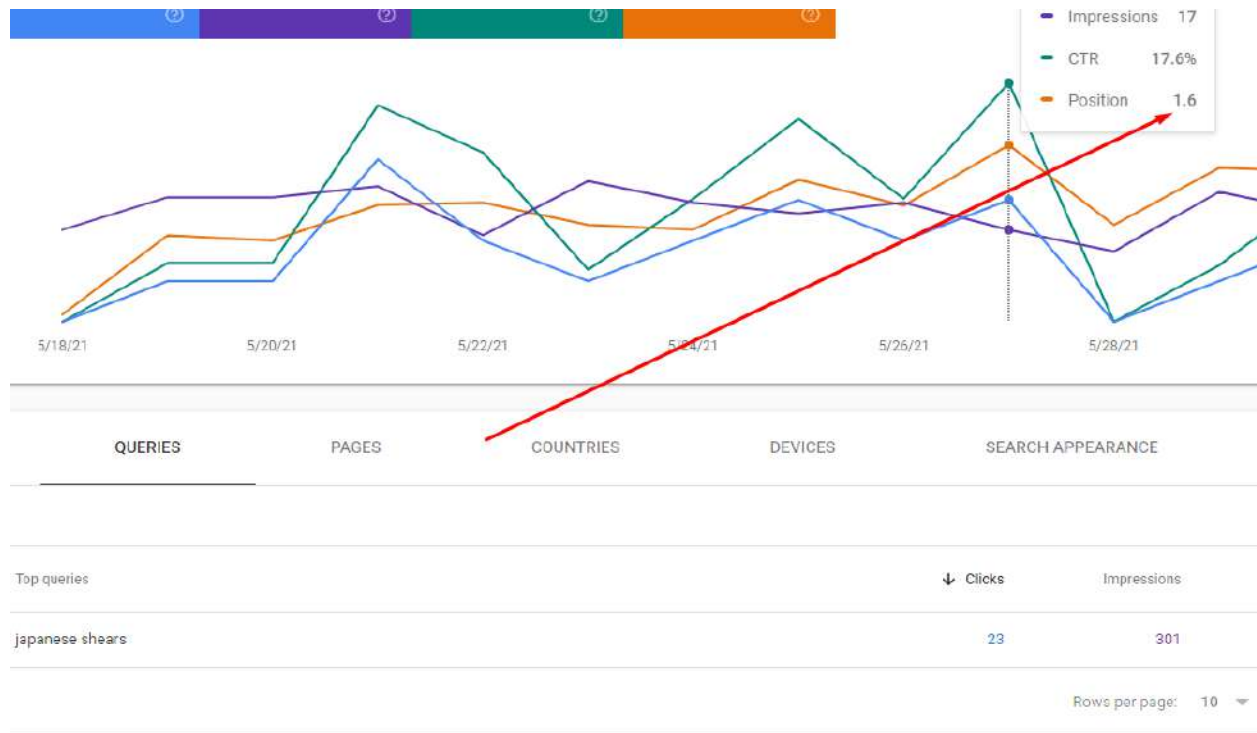

And in March **we got to position 5.6.**

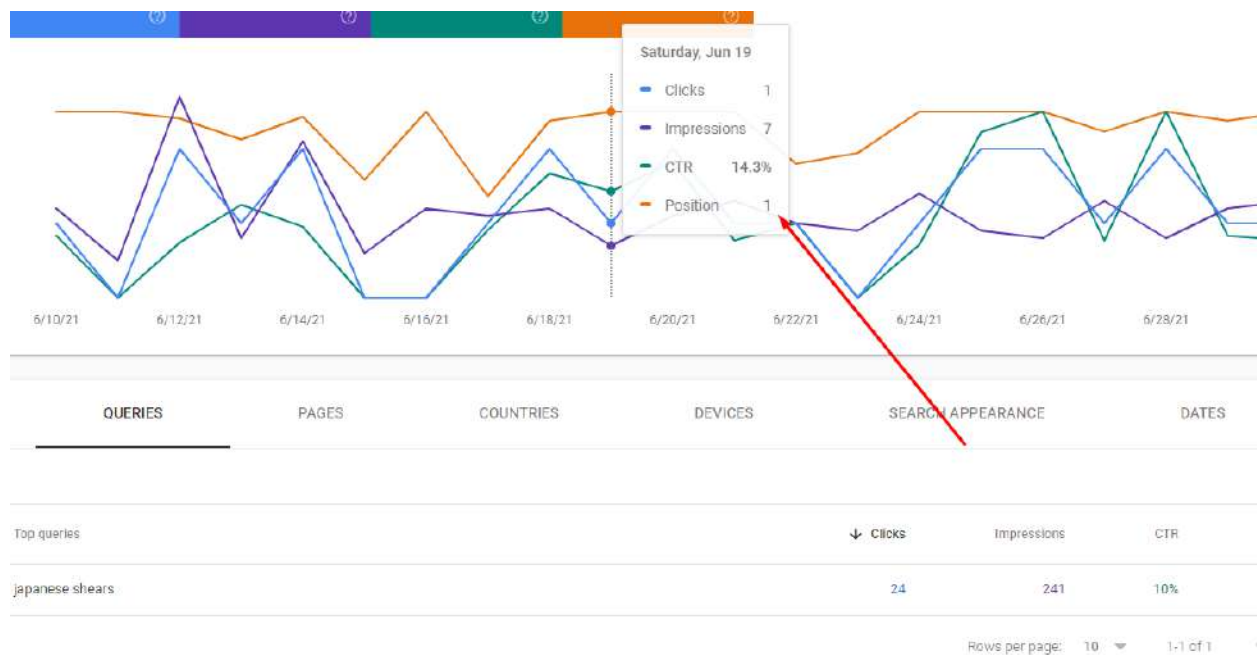

In April we got to position 2.4.

And in May, **we got to position number 1.6**.

And in June - **it's position number 1**.

And we stayed there.

**But it took MONTHS to get to this position.**

**We started in November, and then 8 months later - we're there.**

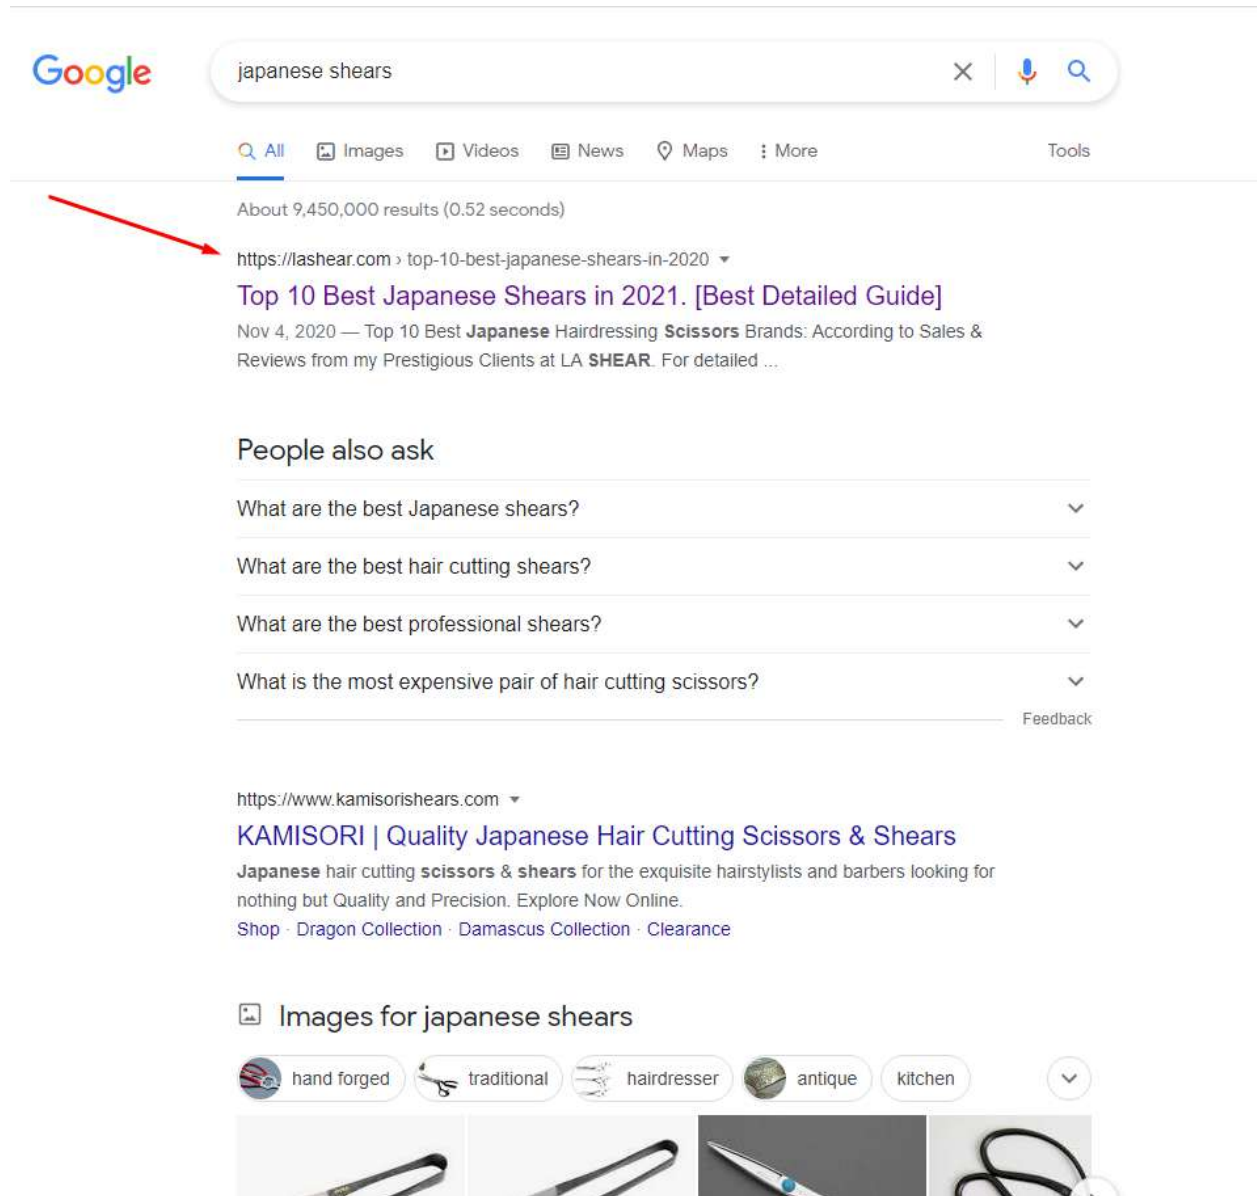

This page is our **TOP SEO performer now, getting THOUSANDS of visitors per month:**

Top pages	↓ Clicks	Impressions
<a href="https://lashear.com/top-10-best-japanese-shears-in-2020/">https://lashear.com/top-10-best-japanese-shears-in-2020/</a>	1,853	56,204
<a href="https://lashear.com/">https://lashear.com/</a>	356	11,384
<a href="https://lashear.com/category/hikari-shears/">https://lashear.com/category/hikari-shears/</a>	230	14,374
<a href="https://lashear.com/top-selling-ys-park-combs/">https://lashear.com/top-selling-ys-park-combs/</a>	213	11,070
<a href="https://lashear.com/sero/">https://lashear.com/sero/</a>	160	5,381

**And all that thanks to our PROVEN SEO SCOOP system.**

## Check it out - for NATIONAL keyword “Japanese shears”:

The screenshot shows a Google search for "japanese shears". The search bar at the top contains the text "japanese shears" with a magnifying glass icon to the right. Below the search bar, the Google logo is on the left, and navigation links for "All", "Images", "Videos", "News", "Maps", and "More" are in the center. A "Tools" link is on the right. Below these links, it says "About 9,450,000 results (0.52 seconds)".

The first search result is from "https://lashear.com" with the title "top-10-best-japanese-shears-in-2020". A red arrow points to this result. The snippet below the title reads: "Top 10 Best Japanese Shears in 2021. [Best Detailed Guide] Nov 4, 2020 — Top 10 Best Japanese Hairdressing Scissors Brands: According to Sales & Reviews from my Prestigious Clients at LA SHEAR. For detailed ...".

Below the first result is the "People also ask" section with four questions, each with a downward arrow to its right:

- What are the best Japanese shears?
- What are the best hair cutting shears?
- What are the best professional shears?
- What is the most expensive pair of hair cutting scissors?

At the bottom right of this section is a "Feedback" link.

The second search result is from "https://www.kamisorishears.com" with the title "KAMISORI | Quality Japanese Hair Cutting Scissors & Shears". The snippet below the title reads: "Japanese hair cutting scissors & shears for the exquisite hairstylists and barbers looking for nothing but Quality and Precision. Explore Now Online. Shop · Dragon Collection · Damascus Collection · Clearance".

Below the second result is the "Images for japanese shears" section. It features a row of filter buttons: "hand forged", "traditional", "hairdresser", "antique", and "kitchen", followed by a downward arrow. Below the filters are four image thumbnails showing different types of shears.
